**A Frog's Life** Irene Kelly, 2018-05-08 A stunningly illustrated introduction to our planet's many frog species! Frogs, frogs, and more frogs! This exciting survey of the world's frog species will introduce children to varieties as diverse as the golden poison frog (the planet's most toxic animal), the Amau frog (so tiny it's no bigger than a housefly), and the Chinese gliding frog (which can fly up to 17 feet)! Their different hunting techniques, preferred foods, body types, and methods of defense are covered, as are the universal basics of the frog life cycle. Colorful, scientifically accurate illustration is paired with a distinguished nonfiction writer's plain, energetic text in this excellent introduction to the diversity and fundamentals of frogs. Back matter includes information on frog disappearances and conservation efforts. A Cybils Awards Finalist in the Elementary Nonfiction category!

**Web Writing** Jack Dougherty, Tennyson O'Donnell, 2015-04-21 The essays in *Web Writing* respond to contemporary debates over the proper role of the Internet in higher education, steering a middle course between polarized attitudes that often dominate the conversation. The authors argue for the wise integration of web tools into what the liberal arts does best: writing across the curriculum. All academic disciplines value clear and compelling prose, whether that prose comes in the shape of a persuasive essay, scientific report, or creative expression. The act of writing visually demonstrates how we think in original and critical ways and in ways that are deeper than those that can be taught or assessed by a computer. Furthermore, learning to write well requires engaged readers who encourage and challenge us to revise our muddled first drafts and craft more distinctive and informed points of view. Indeed, a new generation of web-based tools for authoring, annotating, editing, and publishing can dramatically enrich the writing process, but doing so requires liberal arts educators to rethink why and how we teach this skill, and to question those who blindly call for embracing or rejecting technology.

**Logic of Feeling** Luke Munn, 2020-12-04 From the virulence of fake news to the rise of psychographic profiling, emotion has become ascendant. The new frontier of capitalization is not outward, but inward—the inner life of affect and emotion, desire and disposition. This book lays that new reality out with a series of close case studies. A new set of technologies are emerging, from facial coding to affective computing, that attempt to render the emotional into the machine-readable. At the same time, social media and smart home devices are becoming empathic, attempting to draw out our affective participation and elicit our emotional expression. In these encounters with the medial and the technical, the emotional is remade. Combining a close analysis of contemporary technologies such as Affectiva, Facebook, and Alexa with critical media theory, *Logic of Feeling: Technology's Quest to Capitalize Emotion* examines how the quest to operationalize this inner life begins to reconfigure feeling itself.

*American Roadkill* Don H. Corrigan, 2021-10-11 Slaughtered along our highways, roadkill may be observed regularly, but aren't likely to be given much thought. Research scientists, animal rights activists, roadkill artists, writers, ethicists and lyricists, however, are increasingly sounding the alarm. They report that we are killing the very animals we love, and are driving many of them to the brink of extinction. Detailing the death and destruction of mammals, reptiles, amphibians, and insect pollinators, this study examines the ways in which we are thus jeopardizing our own futures. Beginning in the Model T era, biologists counted the common carnage of the time--cottontails, woodchucks, and squirrels, mostly. That record-keeping continues today. Beyond the bleak statistics, zoologists are rerouting migratory paths of animals and are advocating for cat and dog companions. This book illuminates both our successes and failures in keeping animals out of harm's way and what those efforts reflect about ourselves and our capacity to care enough to alter the road ahead.

*Frog Vs Toad* Ben Mantle, 2022-07-05 Frog is a frog and Toad is a toad. They are clearly totally different from each other. So when an unlucky fly mistakes Frog and Toad for two frogs, the two are determined to set the record straight. After all, Toad is obviously stronger, while Frog is unmistakably the superior hopper . . . and before long, things start to get a bit heated among the amphibian population in the swamp. But when the two rivals have a close encounter with a snappy alligator, both Frog and Toad see the benefit of joining forces. Perhaps they're not so different after all?--Publisher's description.

Noah is convinced that escaping to Mars would be easier than facing his dad, but Lottie is keen to save the planet one creature at a time!

*The Doll Blogs* Debbie Behan Garrett, 2010-12-31 To serve the doll-collecting community, particularly avid Black-doll enthusiasts, Ms. Garrett continues to write about the dolls she loves. In this, her third doll publication, dolls, both old and new, blog their experiences over a two-year period as chosen dolls in Garrett's extensive and quite eclectic Black-doll collection. If you love dolls, possess a vivid imagination, and enjoy combining the two, you will derive great pleasure reading *The Doll Blogs*, another first for Debbie Behan Garrett. Garrett takes the reader on an imaginative voyage in doll-collecting world where she meets and greets new dolls, reacquaints herself with old ones, and continues the passion for all as a doll whisperer, allowing the dolls to speak through her. The dolls (some more vocal than others, with personalities all their own) find delight in telling their unique stories, sharing their experiences, and relaying how they entered Garrett's collection. This first book devoted to dolls that speak in blog form is masterfully engaging, a sure delight.

**Brave Red, Smart Frog** Emily Jenkins, 2017-09-05 Step into a wintry forest where seven iconic fairy tales unfold, retold with keen insight and touches of humor. There once was a frozen forest so cold you could feel it through the soles of your boots. It was a strange place where some kisses broke enchantments, and others began them. Many said witches lived there -- some with cold hearts, others with hot ovens and ugly appetites -- and also dwarves in tiny houses made of stones. In this icy wood, a stepmother might eat a girl's heart to restore her own beauty, while a woodcutter might become stupid with grief at the death of his donkey. Here a princess with too many dresses grows spiteful out of loneliness, while a mistreated girl who is kind to a crone finds pearls dropping from her mouth whenever she speaks. With empathy and ear for emotion, Emily Jenkins retells seven fairy tales in contemporary language that reveals both the pathos and humor of some of our most beloved stories. Charming illustrations by Rohan Daniel Eason add whimsical details that enhance every new reading.

**The Humane Gardener** Nancy Lawson, 2017-04-18 In this eloquent plea for compassion and respect for all species, journalist and gardener Nancy Lawson describes why and how to welcome wildlife to our backyards. Through engaging anecdotes and inspired advice, profiles of home gardeners throughout the country, and interviews with scientists and horticulturalists, Lawson applies the broader lessons of ecology to our own outdoor spaces. Detailed chapters address planting for wildlife by choosing native species; providing habitats that shelter baby animals, as well as birds, bees, and butterflies; creating safe zones in the garden; cohabiting with creatures often regarded as pests; letting nature be your garden designer; and encouraging natural processes and evolution in the garden. *The Humane Gardener* fills a unique niche in describing simple principles for both attracting wildlife and peacefully resolving conflicts with all the creatures that share our world.

**The Book of Frogs** Tim Halliday, 2016-01-29 "A huge, beautiful compendium of 600 frogs from around the world, from the famed poison-arrow variety on up to the intriguingly named plaintive rain frog." --Wired With over 7,000 known species, frogs display a stunning array of forms and behaviors. A single gram of the toxin produced by the skin of the Golden Poison Frog can kill 100,000 people. Male Darwin's Frogs carry their tadpoles in their vocal sacs for sixty days before coughing them out into the world. The Wood Frogs of North America freeze every winter, reanimating in the spring from the glucose and urea that prevent cell collapse. *The Book of Frogs* commemorates the diversity and magnificence of all of these creatures, and many more. Six hundred of nature's most fascinating frog species are displayed, with each entry including a distribution map, sketches of the frogs, species identification, natural history, and conservation status. Life-size color photos show the frogs at their actual size--including the colossal seven-pound Goliath Frog. Accessibly written by expert Tim Halliday and containing the most up-to-date information, *The Book of Frogs* will captivate both veteran researchers and amateur herpetologists. As frogs increasingly make headlines for their troubling worldwide decline, the importance of these fascinating creatures to their ecosystems remains underappreciated. *The Book of Frogs* brings readers face to face with six hundred astonishingly unique and irreplaceable species that display a diverse array of adaptations to habitats that are under threat of destruction throughout the world. "If you are a serious (and I mean serious) fan of the frog, you are in for a real treat." --Boing Boing
