First In Last Out Paul Winter, 2021-05-12 ...the level of research, the quality of graphics, and the readability are exceptional. [...] It is a subject area not covered often and it is a worthy addition to the bookshelves of readers with an interest in early Southwest Pacific air campaigns of World War Two. – Sir Henry Beverley

Lieutenant General RM The official document *Amphibious Warfare Handbook No. 10a: The Organisation, Employment and Training of Commandos* is a unique piece of postwar Royal Marines Commando doctrine, never before published, or quoted at length. Prepared in 1951 at the height of the Korean War by the Chief of Amphibious Warfare and the Commandant General Royal Marines, this seventy-page aide memoir is, in essence, the distillation of major lessons learned by the British wartime Combined Operations Headquarters regarding amphibious warfare, raiding, cliff assaults, sabotage, intelligence-gathering, specialized infantry work, guerrilla warfare and Commando tactics. In addition, it offers its readership a delineation of the characteristics, skills and qualities required of a Royal Marines Commando. Published to mark the seventieth anniversary of its official issue, this rare example of bespoke Commando doctrine is a timely and highly relevant addition to a growing body of work on The Corps of Royal Marines. Currently undergoing significant institutional changes by means of the Future Commando Force (FCF) program, the Royal Marines are having to challenge their existing operating concept, force structures, doctrine, and organizational design to meet the emerging defense challenges of the 21st century. It serves to remind those currently evolving the FCF concept of General Sir John Hackett's advice, namely, To see where we are going, we must know where we are, and to know where we are, we need to discover how we got here.

Commando Chris Terrill, 2008-10-14 Chris Terrill is a man in search of his limit. He's 55 years old. He is not a soldier. He is being trained by the Royal Marines and he is going to Afghanistan. The only difference is that instead of a gun, Chris will be holding a camera and filming the whole ordeal for a major TV series. The Royal Marines Commando training base in Lympstone Devon, has a famous motto: '99.9% need not apply'. Of those who start training, after a very tough selection process, nearly 50% fail to make it through the most gruelling physical tests of any armed forces in the world in an eight month training regime. The elite who do eventually pass out are generally eighteen years old and at the peak of physical condition. But Chris Terrill is the exception: this book will tell of his heroic struggle to become the oldest man to win the coveted Royal Marines Commando Green Beret and enter the record books. And after six months of hell, what next? Chris will follow the raw recruits on a tour to Southern Afghanistan. He will tell the story in book and film of the fears and hopes of the youngsters as they are plunged into one of the planet's most dangerous wars in the outlaw mountain terrain of Helmand Province. He will tell of ferocious battles against the Taliban, of firefights, of jaw-dropping heroism, British sang froid and humour and tragedy as casualties are suffered -- all from the unique perspective of a civilian who has achieved the ultimate accolade: to be accepted as an honorary Royal Marines Commando. *Commando* is a brilliant account of modern war on the front line.

Scotland on the Frontline Chris Brown, 2012-01-01 Traditionally Scotland has made a contribution to Britain's wars well out of proportion to her population and her military achievements are recognised throughout the world. 'Scotland at War' provides an outline of Scotland's war effort drawing on extensive photographic evidence from commercial, state and personal collections, looking beyond the experience of individual regiments to provide a wider picture of the experience of the Scottish soldier, sailor and airman in the struggles against Germany, Japan and Italy. This book will provide any teacher or student of military history an insight into what it was really like at the Front.

America's Commandos Leroy Thompson, 2001-02-11 America deployed a diverse group of special operations forces (SOF) throughout World War II and in Korea. These elite units quickly earned a redoubtable reputation and proved themselves adept at hit-and-run raids, gathering intelligence in long range patrols, rescuing PoWs and living and fighting in hostile environments. This valuable study includes more than 100 rare and unusual photographs of the men, uniforms, special equipment and insignia of these elite troops. Units covered include the Marine Raider regiments and Paramarines; Ranger battalions; 'Merill's Marauders'; the Special Service Force, OSS teams; Naval CDUs; and ski and mountain troops. *America's Commandos* is a key addition to the G.I. Series and examines some of America's most feared and capable elite forces.

Hitler's Secret Commandos Helmut Blocksdorf, 2008-08-21 An extensive history of the amphibious attack unit created by Nazi Germany during World War II. *Hitler's Secret Commandos* is the history of the K-Verband naval commando unit, established in 1943 to wreak havoc amongst invading allied forces involved in amphibious landings or actions, against German-occupied coasts. Following the Italian and British example, the basic idea was for a small, exceptionally well-trained and reliable commando force using the maximum element of surprise. Midget U-boats and small torpedo-carrying craft along the lines of the "explosive boats" used by the Italian Navy were designed for individual operations while a naval assault troop was formed for missions against important enemy operational targets near the sea after being landed from naval vessels offshore. Using German archive material, first-hand accounts and other published material this is the first comprehensive history of the K-Verband. It charts the development, structure, selection, training and equipment the Commando unit used together with a detailed narrative of the operations undertaken. The material has been translated from a German text, previously published in Germany with wide acclaim.

We Died With Our Boots Clean Kenneth McAlpine, 2010-12-26 At the age of seventeen, Kenneth McAlpine ran away from the Repton school to join Churchill's new elite special force, the Royal Marine Commandos. As the youngest member of the youngest commando force, after three months he found himself fighting on the beaches of Normandy. In *We Died With Our Boots Clean*, McAlpine tells his own unique story of World War II and his highly eventful military career. From an unusual encounter with Montgomery and Patton, a concerted attempt to kill a sergeant major and his best friend's arrest for swearing at the Queen of Holland, McAlpine paints a fascinating picture of commando life and the harsh training that prepared soldiers for frontline combat in an elite unit. Full of absorbing anecdotes such as his time in a military prison and a rescue operation at a concentration camp, this book is an essential part of a World War II enthusiast's library.

Basics on European Social Law Christina Hiebl, 2021-01-07 *European Social Law at a glance* The present book sets out – in a concise manner – the social law of the European Union. Apart from core areas of European labour law, the regulation of which is based on the EU's competence in social policy, it covers notably the numerous rights based on the free movement of workers and other EU citizens, as well as the coordination of social security. Beyond that, the book refers to other fields of EU regulation which are prone to cause conflicts between the member states' national social law and the relevant EU norms, which remain challenging to resolve to this day. Extensive reference is made to the case law of the European Court of Justice, which continues to have a paramount role in shaping the social law of the EU as it stands. The book is primarily aimed at students confronted with European social law for the first time. Besides, it should constitute a well-structured source of reference for law practitioners in the rising number of cases where EU law is of relevance for national legal practice.

Halo: Mortal Dictata Karen Traviss, 2019-01-01 The final novel of the Kilo-Five Trilogy by #1 New York Times bestselling author Karen Traviss—part of the expanded universe based on the award-winning video game series Halo! 2553. With the thirty-year-long Covenant War finally over, the Office of Naval Intelligence faces old grievances rising again to threaten Earth. Angry and bitter colonists—still wanting to settle scores from an insurrection put on hold for three decades—crave justice...as does a man whose life was torn apart by ONI when his young daughter was abducted for the SPARTAN-II program. Black-ops squad Kilo-Five now find its collective loyalty tested beyond the breaking point when the father of their Spartan comrade, still searching for the truth about her disappearance, prepares to glass Earth's cities to get an answer. How far will Kilo-Five go to stop him? And will he be able to live with the truth when he finds it? The painful answer lies with someone long dead, and a conscience that still survives in the most unlikely, undiscovered place...

Special Trust and Confidence Cathy Downes, 2013-11-26 This is an examination and an analysis of the systems of recruitment, selection, education and training for junior officers in the British Armed Forces. It is a study based around four core institutions: The Royal Military Academy, Sandhurst, The Britannia Royal Naval College, Dartmouth, the Department of Initial Officer Training, Royal Air Force College, Cranwell and the Officers Training Wing, Commando Training Centre, Royal Marines, Lympstone. The conclusions reveal the enduring dilemmas involved in the preparation of officer aspirants for entry to the British military profession.

Tobruk Commando Gordon Landsborough, 2015-11-19 Gentlemen, we are going to capture Tobruk and destroy it. 'Operation Agreement' started as a fairly simple plan to destroy Rommel's bomb-proof oil-storage tanks at Tobruk on the eve of Alamein. But, catching the imagination of GHQ, the plan snowballed alarmingly. As well as a commando unit led by the plan's originator, Colonel Haselden, it came to include the RAF, the Royal Navy, the Marines and two of the largest destroyers in the Mediterranean. It was a daring attempt to rob Rommel at one stroke of the three essentials to success in North Africa - oil, a supply port and shipping. But the calculated risks began to out balance the chances of success when it seemed that every dockyard worker in Alexandria and every cocktail-party-goer in Cairo knew about the raid before the officers and men set out. The operation went on, and became a tragedy of slaughtered men and sunken ships. Tobruk Commando is a classic adventure story of the Second World War. The fast-moving action centres on the small commando of men which set out secretly through the deserts towards Tobruk. After a long journey across the desert sand, they arrived disguised as a group of POWs and their German captors. Expertly written, this is a wonderful tale of heroic bluff and a venture to test the courage and nerves of the toughest men.

Man Down Marine Mark Ormrod, 2010-04-01

When Shall Their Glory Fade James Dunning, 2011-04-11 Written by a Commando veteran of World War II, this is a remarkable, vivid and honest account of the battles and actions behind the award of the thirty eight Battle Honours that were awarded to the Army Commandos by Her Majesty the Queen in 1958. These Battle Honours are emblazoned on the Commando Flag that hangs in Westminster Abbey in London, almost opposite the tomb of the Unknown

Warrior. The story of each honour is presented in the most direct way, using the stories and experiences of the commandos, officers and men who actually took part in the fighting. It should be emphasised that the operations mentioned as battle honours recognised only those deemed to be thoroughly outstanding feats of arms and represent only a fraction of the raids and battles fought by the Commandos in their five years of active service. The formation of the Commandos was due to Winston Churchill, who proposed their formation in a directive dated 18 June 1940, which advocated limited offensive action against the enemy's extended and vulnerable coastline. This compilation includes photographs of training and combat in Norway, Dieppe, Normandy, Flushing and many more locations.

Last Raid Will Fowler, 2016-04-04 When Germany occupied the originally 'demilitarised' Channel Islands in 1940, Hitler ordered the area to be staunchly fortified with colossal permanent structures like Battery Moltke on Jersey. As it was the only piece of the British Isles in Nazi control, he was determined that the islands should remain German forever. Churchill was equally obsessed, urging numerous commando raids and harebrained schemes for the invasion and liberation of the islands. But when France was freed in 1944, the Channel Islands were completely bypassed. German troops were cut off from their supplies and the island population began to starve. Occupied for almost the entire war, these quintessentially English islands serve as a fascinating microcosm of what Britain might have been like under Nazi rule. With one German soldier to every three islanders, resistance had to remain at a low level: possession of a radio merited a prison sentence. *The Last Raid* is an atmospheric account of life under German occupation, as well as the political manoeuvring behind the scenes. With the first detailed account in English of the Granville Raid, a unique German commando operation, Will Fowler combines the social experience of war with the military to form a fascinating chronicle of the fight for the Channel Islands during the Second World War.

We Were Warriors Johnny Mercer, 2017-06-01 'An adrenalin-fuelled, gritty story of heroism on the frontline in Afghanistan' - Andy McNab Unflinching and laced with wry humour, Johnny Mercer's *We Were Warriors* is an action-packed account of his journey from young commando to a captain with one of the most pressurized and skilled jobs in the army. A captain in 29 Commando, Johnny Mercer served in the army for twelve years. On his third tour of Afghanistan he was a Joint Fires Controller, with the pressurized job of bringing down artillery and air strikes in close proximity to his own troops. Based in an area of northern Helmand that was riddled with Taliban leaders, he walked into danger with every patrol, determined to protect them. Then one morning, in brutal close quarter combat, everything changed . . . In *We Were Warriors* Johnny takes us from his commando training to the heat, blood and chaos of battle. With brutal honesty, he describes what it is like to risk your life every day, pushing through the fear that follows watching your friends die. He took the fight back to the enemy with a relentless efficiency that came at a high personal cost. Back in the UK, seeing the inadequate care available for veterans and their families, he was inspired to run for Parliament in the hope he could improve their plight. 'This is NOT the stereotypical account of war, it's without doubt the best first hand account in a war zone I've ever read.' - Tom Marcus, ex MI5 Surveillance Officer, author of *Soldier, Spy*

Britain's Airborne Forces of WWII Mark Magreehan, 2021-05-31 The Second World War saw huge advancements in military tactics and technology occurring at an unprecedented pace. One such development was the employment of forces able to deploy at short notice by parachute across the globe, utilizing the opportunities created by the advancements in aeronautical technology. These forces were created to deliver an in-depth shock effect, and few have attracted more attention than Britain's famed Parachute Regiment. This formation was born from the humble

beginnings of a fledgling unit drawn together from the British Army and Royal Air Force after Winston Churchill called for a new capability to be created following German airborne successes in the opening stages of the Second World War. Despite being initially poorly equipped, operating outdated aircraft and wearing clothing copied from captured German examples, the Parachute Regiment rapidly grew into what would become two complete airborne divisions – formations which played a key role in the destruction of the Axis forces. The equipment needed by these men rapidly changed as the war evolved and this is clearly illustrated in the author's fine and unique collection of rare airborne items from that period, several of them being the sole surviving items known to exist. The chronological historical information on Britain's paratroopers' role and development during the Second World War in this highly illustrated book is not only supported by a comprehensive and rare collection of items displaying the development and expansion of their equipment for each operation, but also by hundreds of original pictures which embrace the entire period. Additionally, the book also briefly covers the Polish Parachute Brigade and the Canadian parachute formations embedded into the British order of battle. This book provides a comprehensive pictorial display of Britain airborne forces which will prove to be a 'must have' tool for military history enthusiasts, airborne collectors, re-enactors and modelers, as well as current serving soldiers linked by service to this truly special military formation.
