John Paley

**Frozen Paws – Part 10** Chrissy Peebles,2015-11-16 This is book 10 in The Crush Saga. The Crush Saga continues with Julie’s story. Julie leaves Big Bear Lake when she is chased by evil that wants to consume her powers. She dyes her hair, packs her stuff, and goes on the run... She hooks up with a werewolf pack that is branched off from The Ice Pack. They vow to help her. But can she really hide from her enemies? Julie is eighteen years old, discreetly going about her life as the daughter of a witch. Her biggest concern is trying to convince her mother to let her marry her boyfriend, a werewolf. Everything changes when, after a fight with her mother, Julie goes for a drive and ends up in a car accident. The other driver gets out of his car and attacks Julie with inhuman strength. She is forced to use magic to defend herself, and accidentally kills her attacker in the process. A few short hours later, the same man walks out of the hospital without a scratch on him. Julie goes on the run, hunted by a coven of vampires long thought to be extinct. Even in a town full of Immortals, Julie is not safe. The only way for her to stop running is to defeat the vampires that hunt her. With help from two new friends and fellow vampires, Julie goes on a journey to find three rare ingredients to use in a potion that will destroy the entire coven that hunts her. She constantly battles not only against vampires, shape-shifters and ghosts—but also with herself. Can she learn what it means to be part of a pack? The answer will determine her success or failure. keywords: vampires, vampire series, supernatural, paranormal, coming of age, genetic engineering, science fiction, mash ups, free book, vampires, free vampire books, free books vampires, free science fiction books vampire, vampire books free, romance, werewolf, fantasy, horror, mystery, new adult & college romance, occult, urban, young adult fantasy, paranormal, paranormal romance, fantasy witches, shapeshifter wolf romance, dystopian, superhero fantasy ebooks, demon, werewolf romance, angels, keywords: vampires, free book, vampire series, supernatural, paranormal, coming of age fantasy, science fiction , mash ups , bad girlfriend , vampire girl , bullied, vampire vengeance, anti-heroes, vengeance , free vampire books , free books vampires , free science fiction books , free mash up book , free fantasy book , free supernatural books , free paranormal books , strong female lead fantasy , strong female characters , strong female vampire vampire romance, young adult paranormal, paranormal new, adult romance, werewolf romance, vampires, demons and devils, shapeshifter wolf romance, horror, new adult fantasy romance, coming of age, new adult, young adult, gothic, free books, free, free vampire books, free vampire romance books, free vampire and werewolf books, free werewolf books, free fantasy books, young adults, young adults free books, lycan, vamps, dark fantasy, paranormal romance

*Concept Analysis in Nursing* John Paley,2021-02-15 Concept analysis is an established genre of inquiry in nursing, introduced in the 1970s. Currently, over 100 concept studies are published annually, yet the methods used within this field have rarely been questioned. In *Concept Analysis in Nursing: A New Approach*, Paley provides a critical analysis of the philosophical assumptions that underpin nursing’s concept analysis methods. He argues, provocatively, that there are no such things as concepts, as traditionally conceived. Drawing on Wittgenstein and Construction Grammar, the book first makes a case for dispensing with the traditional concept of a ‘concept’, and then provides two examples of a new approach, examining the use of ‘hope’ and ‘moral distress’. Casting doubt on the assumption that ‘hope’ always stands for an ‘inner’ state of the person, the book shows that the word’s function varies with the grammatical construction it appears in. Similarly, it argues that ‘moral distress’ is not the name of a mental state, but a normative classification used to bolster a narrative concerning nursing’s identity. *Concept Analysis in Nursing* is a fresh and challenging book written by a philosopher interested in nursing. It will appeal to researchers and postgraduate students in the areas of nursing, health, philosophy and linguistics. It will also interest those familiar with the author’s previous book, *Phenomenology as Qualitative Research*.

*Frozen Earth* Doug Macdougall,2013-02-15 In this engrossing and accessible book, Doug Macdougall explores the causes and effects of ice ages that have gripped our planet throughout its history, from the earliest known glaciation—nearly three billion years ago—to the present. Following the development of scientific ideas about these dramatic events, Macdougall traces the lives of many of the brilliant and intriguing characters who have contributed to the evolving understanding of how ice ages come about. As it explains how the great Pleistocene Ice Age has shaped the earth's landscape and influenced the course of human evolution, *Frozen Earth* also provides a fascinating look at how science is done, how the excitement of discovery drives scientists to explore and investigate, and how timing and chance play a part in the acceptance of new scientific ideas.

Macdougall describes the awesome power of cataclysmic floods that marked the melting of the glaciers of the Pleistocene Ice Age. He probes the chilling evidence for Snowball Earth, an episode far back in the earth's past that may have seen our planet encased in ice from pole to pole. He discusses the accumulating evidence from deep-sea sediment cores, as well as ice cores from Greenland and the Antarctic, that suggests fast-changing ice age climates may have directly impacted the evolution of our species and the course of human migration and civilization. Frozen Earth also chronicles how the concept of the ice age has gripped the imagination of scientists for almost two centuries. It offers an absorbing consideration of how current studies of Pleistocene climate may help us understand earth's future climate changes, including the question of when the next glacial interval will occur.

*Freeze Kill* David Kreinberg,2013-12-24 What would you do with the power to stop time? Would you use it to help people? Or maybe you would use it for your own benefit regardless of how legal it is. Rob a few banks undetected, sneak into movie theaters without paying; much can be accomplished with such an ability. Sam takes things a bit further. At the tender age of five, the child used the new found ability to brutally murder kindergarten teacher, Mrs. Derinzel right in the middle of class. Thus, a serial killer with a horrifying gift was born. Twenty one years have passed since that event, but the murders have not slowed down. The students of the kindergarten class have grown up, each one greatly effected by the tragedy from their childhood. Some became so obsessed with trying to capture the elusive killer, they created an organization to do so. But with unlimited suspects and no means to defend themselves, the former students will experience a dreadful sense of futility and despair like never before.

*Life in a Frozen World* Mary Batten,2020-11-03 Antarctica is one of the most extreme environments on Earth—the coldest, windiest, driest place on the planet. This frozen continent affects weather, ocean currents, and sea levels all over the Earth. From award-winning, experienced nature writer Mary Batten comes a remarkable nonfiction picture book that plumbs the mysteries of this hostile environment. With clear, engaging language, Batten explores fascinating questions that scientists the world over have been researching, such as how a wide variety of wildlife can survive in this frigid environment and how Antarctica might be the key to long-standing questions about the Earth and climate change New York Times bestselling illustrator Thomas Gonzalez brings Batten's text to life with detailed, realistic paintings. An ideal resource for young science lovers and educators, this informative volume is perfect for classroom units on climate change, conservation, ecology, oceanography, and more.
