Pieometry Lauren Ko, 2020-10-13 New York Times bestseller The pie-making genius behind the popular Instagram account @lokokitchen reveals the secrets of her mind-blowing creations in this gorgeous full-color cookbook featuring 50 incredible sweet and savory pie and tart designs In a few short years, Lauren Ko made all hell bake loose, going from novice pie baker to internet star and creator of today's most surprising and delightful pie and tart designs. Her unique geometric style uses fruit and dough cut and woven into stunning shapes to highlight color and texture. With an elegant symmetry that matches their knockout flavor, her dazzlingly intricate and inventive designs look difficult to produce, but can be achieved with little more than a knife, ruler, and some patience. In *Pieometry*, Lauren reveals her secrets, sharing stories about her designs and the inspiration behind them. Warm and funny, she recounts the spectacular piesasters that led to some of her best creations, and breaks down her most beautiful designs, describing how to make naturally-colored dough, intricate weaves, and striking cut-out patterns. *Pieometry* provides clear, step-by-step instructions, accompanied by helpful photographs, which any patient baker can follow to build these pies from bottom crust to top in their own kitchens. Lauren makes it easy to mix and match doughs, fruits, fillings, and designs, and each recipe includes suggestions for alternative ingredients. Best of all, the beautiful finished pie and tart photos are just as much of a treat to look at as the pies are to eat. But even if you make a mistake here and there, her flavors save the day! When it comes to flavor, *Pieometry* offers a balance of sweet and savory pies that are a feast for the senses, including: Of a Shingle Mind: Honey ricotta tart with an herbed pastry shell and beets Berried Treasure: Lavender blackberry cream with a shortbread crust and berries Wave of Wonders: Cardamom coffee cream with a shortbread crust and pear Once in a Tile: Pumpkin black sesame pie with a black sesame crust C and Easy: Butternut bacon macaroni and cheese pie with a whole wheat cheddar chive crust Squiggle Room: Grilled cinnamon pineapple pie with a basic butter crust Whether you want to impress at the holidays or just spruce up a family meal, *Pieometry* is your guide to transforming a rustic traditional dessert into a modern masterpiece.

The Pipil Language of El Salvador Lyle Campbell, 2011-07-22 The series builds an extensive collection of high quality descriptions of languages around the world. Each volume offers a comprehensive grammatical description of a single language together with fully analyzed sample texts and, if appropriate, a word list and other relevant information which is available on the language in question. There are no restrictions as to language family or area, and although special attention is paid to hitherto undescribed languages, new and valuable treatments of better known languages are also included. No theoretical model is imposed on the authors; the only criterion is a high standard of scientific quality. To discuss your book idea or submit a proposal, please contact Birgit Sievert.

Artificial Structures and Shorelines H. Jesse Walker,2012-12-06 This volume is the result of an initiative of the Commission on the Coastal Environment of the International Geographical Union. The initial concept from which the plan has proceeded was presented at the 24th International Geographical Congress in Japan in 1980. AUTHORSHIP AND COVERAGE All of the articles in this volume have been written by specialists familiar with the coastal segment discussed. Nearly all have been prepared by citizens of the country (and, for that matter, even each subregion) considered. In the case of exceptions (e.g. Suriname), the authors have conducted fieldwork on the coast of the country they treat. In order to preserve the on-the-spot integrity of the volume, it was decided not to fill in the blanks along the world's coastline with library researched chapters. Thus, coverage is variable. Nearly every coastal country in Europe is represented whereas for Africa and South America there are major gaps. In addition, there are 2 instances of overlap. In the case of England (with a shoreline of nearly 3,000 km) a complementary chapter on Lincolnshire (with a shoreline of only 155 km) is included. The other case is the general article on the Baltic Coast of the USSR which is supported by chapters on Estonia and Lithuania.

Digital finance and inclusion in the time of COVID-19 Benni, N.,2021-01-04 The COVID-19 pandemic has impacted digital financial inclusion trends across the world in many and complex ways. In developing and emerging contexts, this crisis also holds the potential to propel an unprecedented acceleration in the process of financial digitization and turn out to be a game-changer for digital financial inclusion. The aim of this study is to illustrate the opportunities and risks associated with the surge in uptake and use of digital financial service, providing ideas on how to leverage the paradigm

changes affecting the overall approach and perspective towards digital financial services – on the part of various stakeholders – to advance financial inclusion and development. It also seeks to showcase how digital financial services have been used – in both traditional and innovative ways – to mitigate the impact of the COVID-19 crisis on economies and societies, by both public and private actors.

Spatial and Temporal Dimensions for Legal History Massimo Meccarelli, María Julia Solla Sastre, 2016-07-01

<http://dx.doi.org/10.12946/gplh6><http://www.epubli.de/shop/buch/53894>The spatiotemporal conjunction is a fundamental aspect of the juridical reflection on the historicity of law. Despite the fact that it seems to represent an issue directly connected with the question of where legal history is heading today, it still has not been the object of a focused inquiry. Against this background, the book's proposal consists in rethinking key confluences related to this problem in order to provide coordinates for a collective understanding and dialogue. The aim of this volume, however, is not to offer abstract methodological considerations, but rather to rely both on concrete studies, out of which a reflection on this conjunction emerges, as well as on the reconstruction of certain research lines featuring a spatiotemporal component. This analytical approach makes a contribution by providing some suggestions for the employment of space and time as coordinates for legal history. Indeed, contrary to those historiographical attitudes reflecting a monistic conception of space and time (as well as a Eurocentric approach), the book emphasises the need for a delocalized global perspective. In general terms, the essays collected in this book intend to take into account the multiplicity of the spatiotemporal confines, the flexibility of those instruments that serve to create chronologies and scenarios, as well as certain processes of adaptation of law to different times and into different spaces. The spatiotemporal dynamism enables historians not only to detect new perspectives and dimensions in foregone themes, but also to achieve new and compelling interpretations of legal history. As far as the relationship between space and law is concerned, the book analyses experiences in which space operates as a determining factor of law, e.g. in terms of a field of action for law. Moreover, it outlines the attempted scales of spatiality in order to develop legal historical research. With reference to the connection between time and law, the volume sketches the possibility of considering the factor of time, not just as a descriptive tool, but as an ascriptive moment (quasi an inner feature) of a legal problem, thus making it possible to appreciate the synchronic aspects of the 'juridical experience'. As a whole, the volume aims to present spatiotemporality as a challenge for legal history. Indeed, reassessing the value of the spatiotemporal coordinates for legal history implies thinking through both the thematic and methodological boundaries of the discipline.
