Chinese Capital Market Takeover and Restructuring Guide Chengwei Liu,2010-12-22 Although several useful entry guides to China for business investors have appeared in recent years, this is the first book to focus on a business strategy that is becoming increasingly important – and attractive – to businesses in China: the takeover and restructuring of a listed company. This practice orientated book has an additional value, moreover, in that it fully takes into account not only the relevant regulations, most of which were promulgated or updated from 2005 to 2010, but also the actual structures and procedures of nearly ninety announced deals, right up to September 2010. In unprecedented details, the author, an experienced M&A lawyer, describes China specific takeover and restructuring cases involving foreign investors as well as state-owned shareholders on the Shanghai Stock Exchange, the Shenzhen Stock Exchange and 'ChiNext'. The presentation and analysis covers such elements as the following: the standard bids, such as tender offers, negotiated transfers, indirect takeovers and subscriptions for new shares; the special accesses available to a foreign investor such as qualifying as a 'strategic investor' or 'qualified foreign institutional investor' (QFII); the particular situations where 'state-owned shareholder' (SS) is involved or where a share exchange occurs, including where a foreign investor subscribes by injecting, or acquires indirectly via, its 'onshore foreign invested enterprise'; the basic restructuring approaches of a listed company – public offering and private placement; and the full meaning and significance of the 'substantial asset restructuring' (SAR), which may be asset purchases, disposals or swaps, or the SAR in special cases – merger or separation deals. The author's illustration of deal structures and step-by-step procedures, visualized in over 150 charts and checklists, gives the reader a clear path to follow through what can seem like a forbiddingly difficult process – a path rendered more secure by the deal histories presented. For companies with operations in China, or considering such operations, as well as professionals advising on these companies, this book is a goldmine of crucially valuable information and guidance. There is nothing else available that comes close to its authority or expertise in this area.

An Introduction to PERT Cost Frank T. Mooty,1964 A general introduction to PERT COST, an innovation in the field of management. This technique employs a networking, statistical and scheduling methodology using advanced data processing procedures. The PERT COST technique is based on the principle that planning must be developed in a manner that facilitates its use as a management control tool and a management control system must use as its base the planning that governs the program. Accordingly, PERT COST can be used in both the planning and control functions of management. (Author).

Northern Finland's Post-War Colonizing and Emigration K.H. Stone,2012-12-06 As the world's population increases, where will it live? Surely many will end up in cities for a recent United Nations' report anticipates that the globe's urban people will increase from 1. 33 billion in 1970 to 3. 09 billion in the year 2000. In the same period, however, the expectation is that rural population will increase from 2. 25 billion to 3. 02 billion. Of course the latter will be unevenly distributed; 91 per cent are likely to be in the less developed regions of the world while the rural folks of the more developed areas are expected to decline from 335 million to 255 million by 2000 A. D. No matter where, the major part of the increasing rural population probably will go to areas already thinly to densely settled. But not all. Even in parts of the more developed nations and for sure in many of the less developed countries one may expect significant numbers of people to move to what is now uninhabited land. Why? Because this is the nature of people and of nations. Research on the subject discloses that new rural settling is not a limited action that is restricted are ally or in time. Rather it is a natural and continuing process that evidences variety in a nation's desires; these may be expressed directly or indirectly by national governments through sponsored action or simply by permissiveness.
