**Wild Your Garden** Jim and Joel Ashton,Ashton Joel,2020-04-02 It's up to every single one of us to do our bit for wildlife, however small our gardens, and The Butterfly Brothers know just how that can be achieved. Alan Titchmarsh Join the rewilding movement and share your outdoor space with nature. We all have the potential to make the world a little greener. Wild Your Garden, written by Jim and Joel Ashton (aka The Butterfly Brothers), shows you how to create a garden that can help boost local biodiversity. Transform a paved-over yard into a lush oasis, create refuges to welcome and support native species, or turn a high-maintenance lawn into a nectar-rich mini-meadow to attract bees and butterflies. You don't need specialist knowledge or acres of land. If you have any outdoor space, you can make a difference to local wildlife, and reduce your carbon footprint, too. Wildlife gardening is one of the most important things you can do as an individual for increasing biodiversity and mitigating the effects of climate change. From digging a pond to planting a native hedge, the Butterfly Brothers can help you every step of the way. Kate Bradbury

**Birds and Berries** Barbara K. Snow,1988 The book's subtitle - A study of an ecological interaction - properly reflects the author's theme but may tend to hide the fact that the relationships between birds and berries can be much more than the simple, mutually advantageous systems ('eat my fruits, spread my seeds') they may seem at first to be. Therein lies the core of the book - the less obvious intricacies and implications of plant/ bird associations, the coevolution of species in some cases and the adaptations of a species (bird or plant) to further its own advantage. To complicate the scene, too, there are the 'exploiters', the pulp-predators and seed-predators that feed at the plant's expense. In Part 1 of the book the authors provide accounts by species of the trees and shrubs they observed over many years in their study area of southern England; similarly, Part 2 records the bird species they watched feeding, or attempting to feed, or preventing other birds from feeding, on the fruits. Part 3 ranges widely and is not confined to Britain and Europe. It investigates the strategies and adaptations evolved and employed by plants to ensure their success, and their attempts at defence against the bird 'predators'. It looks at the birds themselves, their foraging techniques and fruit preferences, the limitations of a fruit diet and adaptations to it, the time and energy budgets of fruit-eaters and, finally, the intriguing question of coevolution of plants and birds. This thought-provoking text offers many insights not generally perceived by ornithologist or botanist and is illustrated in masterly fashion by John Busby's lively drawings. Jacket paintings by John Busby.--Bloomsbury Publishing.

**(Classic Reprint)** Waldo Lee Mcatee,2018-03-18 Excerpt from Fruits Attractive to Birds: Northern Plains States, Region No. 3 (North Dakota, South Dakota, Nebraska, and Kansas) It should be noted that the fruit - bearing seasons recorded, being collected from varied sources, tend to be maxima. As a rule they are not likely to be realized or even approached in a single locality unless numerous specimens of a given species are present and so distributed in sun and shade as to favor both early and late fruiting. The word extralimital as here used in certain table headings covers plants from other States or regions of the United States as well as Wholly introduced, exotic, or foreign plants. *The Small Fruits, And, the Birds of Nebraska (Classic Reprint)* Joseph H. Hadkinson,2018-02-08 Excerpt from The Small Fruits, And, the Birds of Nebraska As the two things most essential to plant life are air and water, so in the preparation of the soil the prime object should be to so pre pare it as to retain all the moisture possible. All living plants con tain a very large per cent of water. For instance, the potato contains nearly 75 per cent, while experiments have developed the fact that an ash tree cut down in January contained 29 per cent of water, maple 34 per cent, and fir 53 per cent. The same kinds of trees felled early in April contained 39, 40, and 61 per cent respectively. This water must come from the soil, and as the roots are the feeders that convey it to the plant or body of the tree, the most essential thing is the feed ing ground of the roots. *Disapproving Rabbits* Sharon Stiteler,2007-10-16 Try as hard as you like, there's just no pleasing a disapproving rabbit Let them hop around your house, they'll disapprove of your decorating skills. Feed them tasty veggies, they'll disapprove of your culinary skills. Sit together in your yard, and they'll disapprove of your gardening (even as they devour it). Long thought of as mindless raiders of gardens and happy couriers of colored eggs, it's almost as if rabbits have been getting the best of us for years, secretly disapproving of all our non-rabbit ways. Fortunately Sharon Stiteler, known as the Bird Chick for her work in the birding community, began to notice something not-quite-right about her pet rabbit Cinnamon. It appeared that Cinnamon didn't approve . . . of anything. After studying a great many photos, Sharon has soundly and without-out-a-doubt proved that rabbits have some major attitude.
