White Skin, Black Fuel Andreas Malm,The Zetkin Collective,2021-05-18 Rising temperatures and the rise of the far right. What disasters happen when they meet? In the first study of the far right’s role in the climate crisis, White Skin, Black Fuel presents an eye-opening sweep of a novel political constellation, revealing its deep historical roots. Fossil-fuelled technologies were born steeped in racism. No one loved them more passionately than the classical fascists. Now right-wing forces have risen to the surface, some professing to have the solution—closing borders to save the nation as the climate breaks down. Epic and riveting, White

Skin, Black Fuel traces a future of political fronts that can only heat up.

Alcohol Fuel Richard Freudenberger,2009-11-01 Dwindling petroleum supplies and growing environmental concerns are significantly impacting the cost of petro-fuel and its infrastructure. The search for alternative fuel sources has led to ethanol, a gasoline substitute that is already in the marketplace as Gasohol and E-85. But large-scale production of corn-based ethanol is controversial as it threatens the world’s food supply. There are alternatives, however: Brazil uses sugar cane, which is up to six times more productive in energy conversion. After the energy crisis of the 1970s, there was a lot of misinformation about the cost of individual ethanol production. In order to achieve energy independence from gasoline, ethanol lends itself to small-scale production, and especially to cooperative ventures in rural communities, often using “waste” feedstock. Alcohol Fuel is a practical, grassroots book that will give readers all the information they need, covering every aspect of making and using ethanol for fuel, including: *Permitting and planning *Budgeting and setup *Sourcing feedstocks *Finding and building distillation equipment *Storage and safety *Practical applications for converting motor vehicles, farm equipment, and space-heating systems The practical, user-friendly information on basic equipment needs, fermentation recipes, and distillation designs will be of interest to readers looking for information, as well as to those ready to make the switch. Richard Freudenberger was research director of Mother Earth News, where he managed the Alcohol Fuel Program and developed solar and renewable solar and energy projects. He is publisher and technical editor of BackHome magazine and lives in Hendersonville, North Carolina.

Fear Is Fuel Patrick Sweeney,2020-02-03 Fear, the most powerful force in our life, is the least understood. Every one of us experiences it. Many arrange their lives to avoid it. Yet nearly every one of us needs to find more fear. Most of us know fear as the unwanted force that drives phobias, anxieties, unhappiness, and inhibits self-actualization. Ironically, fear is the underlying phenomenon that heightens awareness and optimizes physical performance, and can drive ambition, courage, and success. Harnessing fear can heighten emotional intelligence and bring success to every aspect of your life. Neuroscience and current research on how the brain processes and uses fear have torn the lid off the possibilities of human performance; yet most people are not reaching their complete potential because of a psychological roadblock Sweeney calls the Fear Frontier. Identifying your Fear Frontier and addressing it, Sweeney illustrates in these pages, is the path to success, happiness and fulfillment in almost all aspects of your life. He also provides the most effective steps toward rewiring your mind for a healthier longer life based on courage. Fear is Fuel is a practical guide that instructs readers on a unique path toward translating fear into optimal living. By facing fears, and challenging new ones, readers can harness the power of unique motivations to achieve more, experience more, and enjoy more. The path to a fulfilling life is not to avoid fear but to recognize it, understand it, harness it, and unleash its power.
