Independent Thinking on Laughter Dave Keeling,2020-03-09 Dave Keeling's Independent Thinking on Laughter: Using humour as a tool to engage and motivate all learners is an uplifting manifesto packed with tips and techniques to help educators unleash the power of humour and laughter in the learning environment. Foreword by Ian Gilbert. Education is too important to be taken seriously: everyone in our schools from the youngest learner to the, ahem, 'most senior' teacher likes to laugh. And beyond the many stress-busting and morale-boosting benefits that laughter brings on an individual level, the collective rewards of laughter in the classroom setting are also numerous such as enhancing openness and teamwork, stimulating imagination and creativity and, above all, strengthening the student-teacher relationship. No one is more familiar with the power of classroom conviviality than 'stand-up educationalist' and Independent Thinking Associate Dave Keeling, who in this book takes readers on an enlightening journey into the part that humour can play in improving the learning experience for all concerned. Writing with his trademark wit, Dave shares handy hints acquired from his experience in the world of comedy and offers a veritable smorgasbord of activities for use with learners all proven to generate laughter, enhance learning and make the teacher look great. The teacher's mission, if they choose to accept it, is to take these ideas and exercises and adapt, enjoy, explore and generally mess about with them to their heart's content. An inspiring read for all teachers and educators. Independent Thinking on Laughter is an updated edition of The Little Book of Laughter (ISBN 9781781350089) and is one of a number of books in the Independent Thinking On series from the award-winning Independent Thinking Press.

How Stella Learned to Talk Christina Hunger,2021-05-04 INSTANT NEW YORK TIMES BESTSELLER An incredible, revolutionary true story and surprisingly simple guide to teaching your dog to talk from speech-language pathologist Christina Hunger, who has taught her dog, Stella, to communicate using simple paw-sized buttons associated with different words. When speech-language pathologist Christina Hunger first came home with her puppy, Stella, it didn't take long for her to start drawing connections between her job and her new pet. During the day, she worked with toddlers with significant delays in language development and used Augmentative and Alternative Communication (AAC) devices to help them communicate. At night, she wondered: If dogs can understand words we say to them, shouldn't they be able to say words to us? Can dogs use AAC to communicate with humans? Christina decided to put her theory to the test with Stella and started using a paw-sized button programmed with her voice to say the word "outside" when clicked, whenever she took Stella out of the house. A few years later, Stella now has a bank of more than thirty word buttons, and uses them daily either individually or together to create near-complete sentences. How Stella Learned to Talk is part memoir and part how-to guide. It chronicles the journey Christina and Stella have taken together, from the day they met, to the day Stella "spoke" her first word, and the other breakthroughs they've had since. It also reveals the techniques Christina used to teach Stella, broken down into simple stages and actionable steps any dog owner can use to start communicating with their pets. Filled with conversations that Stella and Christina have had, as well as the attention to developmental detail that only a speech-language pathologist could know, How Stella Learned to Talk will be the indispensable dog book for the new decade.
