H.D. and the Public Sphere of Modernist Women Writers, 1913-1946 Georgina Taylor, 2001 This book locates H.D. within an Anglo-American 'public sphere' of women writers, a discursive arena in which individuals come together in debate and discussion. The theoretical framework used is that outlined in Jurgen Habermas's *The Structural Transformation of the Public Sphere*, modified in order to consider this group as a 'counter-public sphere', a non-dominant group whose interests were non-identical to those of the dominant public sphere. From 1913 a network of little magazines enabled women writers to come together in unprecedented numbers in public exchange. The ethos of this public sphere was a challenge to all convention, including challenges to the perceived sentimentality of earlier women's writing; H.D.'s Imagism was crucial in this. Initially this public sphere avoided engagement with the wider socio-political world, focusing instead on psychic reality. Writing became increasingly experimental in a new wave of avant-garde activity, fuelling heated debate in the magazines around the nature of 'literature'. By the mid 1920s this particular literary sphere had lost direction, but continued to experiment and seek new ways forward. New discussions around cinematic forms (in which H.D. participated) kept critical discussion very much alive. In the 1930s the work emerging from this network was increasingly politically aware. This was a period of highly disturbed writing such as H.D.'s *Nights* and Djuna Barnes's *Nightwood*, internalizations of the sadomasochism enacted on the world stage. After the war, this public sphere declined into personal exchanges in letters and private circulation of manuscripts.

Chemical Engineering Computation with MATLAB® Yeong Koo Yeo, 2017-08-01 Most problems encountered in chemical engineering are sophisticated and interdisciplinary. Thus, it is important for today's engineering students, researchers, and professionals to be proficient in the use of software tools for problem solving. MATLAB® is one such tool that is distinguished by the ability to perform calculations in vector-matrix form, a large library of built-in functions, strong structural language, and a rich set of graphical visualization tools. Furthermore, MATLAB integrates computations, visualization and programming in an intuitive, user-friendly environment. *Chemical Engineering Computation with MATLAB®* presents basic to advanced levels of problem-solving techniques using MATLAB as the computation environment. The book provides examples and problems extracted from core chemical engineering subject areas and presents a basic instruction in the use of MATLAB for problem solving. It provides many examples and exercises and extensive problem-solving instruction and solutions for various problems. Solutions are developed using fundamental principles to construct mathematical models and an equation-oriented approach is used to generate numerical results. A wealth of examples demonstrate the implementation of various problem-solving approaches and methodologies for problem formulation, problem solving, analysis, and presentation, as well as visualization and documentation of results. This book also provides aid with advanced problems that are often encountered in graduate research and industrial operations, such as nonlinear regression, parameter estimation in differential systems, two-point boundary value problems and partial differential equations and optimization.

Complexities in Obsessive Compulsive and Related Disorders ,2021-09-17 Obsessive-Compulsive and Related Disorders (OCDs) have received considerable attention over the past two decades culminating with the inclusion of a new classification category of Obsessive-Compulsive and Related Disorders (OCDs) in DSM-5. This group of conditions includes OCD along with two newly minted conditions (Hoarding Disorder and Excoriation Disorder) and others previously classified as Somatoform Disorders (Body Dysmorphic Disorder) and Impulse Control Disorders (Hair Pulling Disorder). The implications for research on these conditions, as well as their relations with one another, are significant since their aggregation is based on putative central mechanisms with limited empirical support to date. Indeed, the past decades have seen a dramatic surge in research on OCDs. Such scholarship has occurred across several domains including clinical phenomenology, assessment, and psychological therapies. A complete synthesis of the emerging data across these domains would be beyond the scope of a single journal article or series of articles while having the ability to comprehensively discuss advances in the field and stimulating in these areas Many of the available textbooks, although meritorious in their own right, are outdated and do not address the most recent research advances and emerging clinical implications. Indeed, the past decade has seen a tremendous growth in knowledge on treatment, assessment, treatment augmentation, and basic science that is not contained fully within existing volumes (see discussion of specific texts further below). Thus, providing a comprehensive textbook that addresses recent advances will provide a much needed update to the field of OCDs. Furthermore, recent texts primarily address OCDs from a biological standpoint, neglecting psychosocial theoretical and intervention approaches that enjoy the most empirical support of any conceptual and treatment approaches for most of the relevant conditions. As a result, the literature has been dominated by a single predominant perspective, which does not fully represent the available data or perspectives of front-line clinicians and researchers alike. As researchers and clinicians will be increasingly focused on this topic in light of the changes to DSM-5 - together with the dearth of current objective available information - this book will be a timely addition to the literature in guiding clinicians in advances in OCDs that will impact their practice. Third, a number of conditions outside the OCD chapter in DSM-5 are often proposed as related to OCD (e.g., misophonia).
