The Art-Work of the Future Richard Wagner,William Ashton Ellis,2014-02-27 The Artwork of the Future is one of a series which Wagner produced in a period of intensive writing following his exile after the Dresden May uprising of 1849. It follows Art and Revolution and precedes Jewishness in Music, developing the ideas of the one and prefiguring some of the issues of the other. Wagner wrote the whole essay over about two months in Zurich. He wrote to his friend Uhlig on November 1849, 'This will be the last of my literary works'. On this, as on many other matters in his life, Wagner was to change his mind. The essay is dedicated to the philosopher Ludwig Feuerbach, whose works (perhaps particularly Principles of the Philosophy of the Future), inspired some of its ideas. In September and October 1849, Wagner had read both Feuerbach's Reflections on Death and Immortality and his The Essence of Christianity. Wagner's biographer Ernest Newman opined that Wagner's prose style in this essay and others was also heavily influenced by Feuerbach, who was 'constitutionally prone to the antithetical'; whilst

noting that within a few years Wagner rejected Feuerbach's philosophy for that of Schopenhauer. The title of the essay was to haunt Wagner; thereafter his opponents were to taunt him as a self-appointed prophet of 'the music of the future'. Wagner begins, 'As Man stands to Nature, so stands Art to Man.' Man, or more particularly the Volk (the community of 'men who feel a common and collective want') creates Art to fill that want. Those who feel no want are outsiders to the Volk and crave only pointless luxury - true Art thus comes only from the atavistic needs of the Volk. When luxury (by which Wagner implies base entertainment posing as true art - i.e. Grand Opera and its like) has been abolished by the Volk they will be able to join to create the Artwork of the Future. Wagner goes on to talk of the three basic elements of art, which he lists as 'Dance, Tone [i.e. music] and Poetry' which were originally united in ancient Greek drama (as extolled by Wagner in Art and Revolution). Modern attempts to unite these give rise to the 'unnatural abortion, the Oratorio', and to the 'shameless insolence' of contemporary opera Only when these and other tawdry entertainments are swept aside will the Artwork of the Future arise.

Aesthetics in Present Future Brunella Antomarini,Adam Berg,2013-06-10 The theme of Aesthetics in Present Future concerns the new chances the arts have and the deep changes they are undergoing, due to the new media, and the digital world in which we are growingly immersed. That this world is to be understood from an aesthetic point of view, become clear if we think of how much of what we produce, and observe and study is offered through images in particular and perceptual means in general.

**The Future of Serious Art** Bidisha,2020-11-12 Where and who do we want to be? How might we get there? What might happen if we stay on our current course? In The Future of Serious Art, Bidisha uses her personal journey

through novels, TV and film to mirror the seismic changes that have occurred in culture and its industries in recent years. The digital revolution has brought all of TV, cinema and music into the palms of our hands. It's easier than ever to bring stories to life, but what happens when artistic work is rebranded as 'content creation'? Where does this leave literary novelists and arthouse filmmakers? What about those auteur-directors who make mainstream but thoughtful films for the big screen? As a storyteller herself, and a woman of colour who isn't a millennial, Bidisha asks who is taken seriously as an artist, what is taken seriously as art now and how that might change over the next century. This brief but mighty book is one of five that comprise the first set of FUTURES essays. Each standalone book presents the author's original vision of a singular aspect of the future which inspires in them hope or reticence, optimism or fear. Read individually, these essays will inform, entertain and challenge. Together, they form a picture of what might lie ahead, and ask the reader to imagine how we might make the transition from here to there, from now to then.

His portrait of the future is nevertheless realistic as it is derived from the imminent technological revolutions and the multidisciplinary experience of the sectors top-tier experts. Scion|ce is a vivid and lucid dream on the inescapable and exponential technological confluences. Thereby the author urges all of us to meditate on this future in which technology is subjugated to humans, but with a constant threat of humans becoming subjugated to technology. Hence, this wakeup into the future is meant to enlighten and future-proof decision-making at all levels of society. As the author rightly says, Let us write the history of the future together.
