Religion, Culture, and Mentalities in the Medieval Low Countries Ludovic Milis, 2005 Ludo Mills graduated from Ghent University in 1961 as the last student of Francois-Louis Ganshof, who in the years after Henri Pirenne's retirement was the most prominent representative of the famous Ghent School of medieval history. This collection contains eleven essays published between 1969 and 1990. Most of them appeared in Dutch or French and have now been translated into English; two essays previously published in English were newly edited. All provide unique insight in the major themes of Milis's work: the religious history of the Low Countries during the early and high Middle Ages, as well as the problem of religious conversion and persuasion; the rise of regular canons in the eleventh and twelfth centuries (also the subject of his doctoral dissertation on the order of Arrouaise, published in 1969); the uses of power and ideology; and the history of French Flanders. All bear witness to Milis's inspiring ability to ask original, probing questions and to write historical syntheses accessible to a wide audience.--BOOK JACKET.

Tunnels and Underground Cities. Engineering and Innovation Meet Archaeology, Architecture and Art Daniele Peila, Giulia Viggiani, Tarcisio Celestino, 2020-06-26 Tunnels and Underground Cities: Engineering and Innovation meet Archaeology, Architecture and Art. The use of underground space is continuing to grow, due to global urbanization, public demand for efficient transportation, and energy saving, production and distribution. Ethics and Governance in Sport Yves Vanden Auweele, Elaine Cook, Jim Parry, 2015-11-06 What is, or what should be, the function of sport in a globalized, commercialized world? Why does sport matter in the 21st century? In *Ethics and Governance in Sport: the future of sport imagined*, an ensemble of leading international experts from across the fields of sport management and ethics calls for a new model of sport that goes beyond the traditional view that sport automatically

encourages positive physical, psychological, social, moral and political values. Acknowledging that sport is beset by poor practice, corruption, and harmful behaviors, it explores current issues in sport ethics, governance and development, considering how good governance and the positive potentials of sport can be implemented in a globalized sporting landscape. Ethics and Governance in Sport suggests a future model of sport governance based on well substantiated projections, and argues that identifying the root causes of harmful behavior, those things that are characteristic of sport, and engaging sport managers, policy makers and leaders of sport organizations, is essential if sport is to thrive. The book's interdisciplinary examination of sport, encompassing philosophy, sociology, economics, management and sport development, and its forward-looking approach makes it important reading for advanced students, researchers and policy makers with an interest in the place and development of modern sport. Its clear messages invite self-reflection and discussion, especially within sports organizations.

Policing Cooperation Across Borders Saskia Hufnagel, 2016-04-22 This book provides new insights into police cooperation from a comparative socio-legal perspective. It presents a broad analysis of comparable police cooperation strategies in two systems: the EU and Australia. The evolution of regulatory trends and cooperation models is analysed for both systems and possible transferable strategies identified. Drawing on interviews with practitioners in the EU and Australia this book highlights a number of areas where the EU can be compared to a federal system and addresses the advantages and disadvantages of being a Union or a federation of states with a view to police cooperation practice. Particular topics addressed are the evolution of legal frameworks regulating police cooperation, informal cooperation strategies, Joint Investigation Teams, Europol and regional cooperation. These instruments foster police cooperation, but could be improved with a

view to cooperation practice by learning from regulatory techniques and practitioner experiences of the respective other system.
