International Marriages and Marital Citizenship Asuncion Fresnoza-Flot,Gwénola Ricordeau, 2017-07-14 While marriage has lost its popularity in many developed countries and is no longer an obligatory path to family formation, it has gained momentum among binational couples as states reinforce their control over human migration. Focusing on the case of Southeast Asian women who have been epitomized on the global marriage market as 'ideal' brides and wives, this volume examines these women's experiences of international marriage, migration, and states' governmentality. Drawing from ethnographic research and policy analyses, this book sheds light on the way many countries in Southeast Asia and beyond have redefined marriage and national belonging through their regime of 'marital citizenship' (that is, a legal status granted by a state to a migrant by virtue of his/her marriage to one of its citizens). These regimes influence the familial and social incorporation of Southeast Asian migrant women, notably their access to socio-political and civic rights in their receiving countries. The case studies analysed in this volume highlight these women's subjectivity and agency as they embrace, resist, and navigate the intricate legal and socio-cultural frameworks of citizenship. As such, it will appeal to sociologists, geographers, socio-legal scholars, and anthropologists with interests in migration, family formation, intimate relations, and gender.

Embedded Courts Kwai Hang Ng,Xin He, 2017-10-26 *Embedded Courts* is laden with tension. Chinese courts are organized as a singular and unified system yet grassroots courts in urban and rural regions differ greatly in the way they use the law and are as diverse as the populations they serve. Based on extensive fieldwork and in-depth interviews, this book offers a penetrating discussion of the operation of Chinese courts. It explains how Chinese judges rule and how the law is not the only script they follow - political, administrative, social and economic factors all influence verdicts. This landmark work will revise our understanding of the role of law in China - one that cannot be easily understood through the standard lens of judicial independence and separation of powers. Ng and He make clear the struggle facing frontline judges as they bridge the gap between a rule-based application of law and an instrumentalist view that prioritizes stability maintenance.

The Missionary's Curse and Other Tales from a Chinese Catholic Village Henrietta Harrison, 2013-06-01 *The Missionary's Curse* tells the story of a Chinese village that has been Catholic since the seventeenth century, drawing direct connections between its history, the globalizing church, and the nation. Harrison recounts the popular folk tales of merchants and peasants who once adopted Catholic rituals and teachings for their own purposes, only to find themselves in conflict with the orthodoxy of Franciscan missionaries arriving from Italy. The village's long religious history, combined with the similarities between Chinese folk religion and Italian Catholicism, forces us to rethink the extreme violence committed in the area during the Boxer Uprising. The author also follows nineteenth century Chinese priests who campaigned against missionary control, up through the founding of the official church by the Communist Party in the 1950s. Harrison's in-depth study provides a rare insight into villager experiences during the Socialist Education Movement and Cultural Revolution, as well as the growth of Christianity in China in recent years. She makes the compelling argument that Catholic practice in the village, rather than adopting Chinese forms in a gradual process of acculturation, has in fact become increasingly similar to those of Catholics in other parts of the world.

Semantics Engineering with PLT Redex Matthias Felleisen, Robert Bruce Findler, Matthew Flatt, 2009-07-10 The first comprehensive presentation of reduction semantics in one volume, and the first tool set for such forms of semantics. This text is the first comprehensive presentation of reduction semantics in one volume; it also introduces the first reliable and easy-to-use tool set for such forms of semantics. Software engineers have long known that automatic tool support is critical for rapid prototyping and modeling, and this book is addressed to the working semantics engineer (graduate student or professional language designer). The book comes with a prototyping tool suite to develop, explore, test, debug, and publish semantic models of programming languages. With PLT Redex, semanticists can formulate models as grammars and reduction models on their computers with the ease of paper and pencil. The text first presents a framework for the formulation of language models, focusing on equational calculi and abstract machines, then introduces PLT Redex, a suite of software tools for expressing these models as PLT Redex models. Finally, experts describe a range of models formulated in Redex. PLT Redex comes with the PLT Scheme implementation, available free at <http://www.plt-scheme.org/>. Readers can download the software and experiment with Redex as they work their way through the book.
