12 Seconds of Silence Jamie Holmes,2020 The riveting story of the American scientists, tinkerers, and nerds who solved one of the biggest puzzles of World War II--and developed one of the most powerful weapons of the war 12 Seconds of Silence is the remarkable, lost story of how a ragtag group of American scientists overcame one of the toughest problems of World War II: shooting things out of the sky. Working in a secretive organization known as Section T, a team of physicists, engineers, and everyday Joes and Janes took on a devilish challenge. To help the Allies knock airplanes out of the air, they created one of the world's first smart weapons. Against overwhelming odds and in a race against time, mustering every scrap of resource, ingenuity, and insight, the scientists of

Section T would eventually save countless lives, rescue the city of London from the onslaught of a Nazi superweapon, and help bring about the Axis defeat. A holy grail sought after by Allied and Axis powers alike, their unlikely innovation ranks with the atomic bomb as one of the most revolutionary technologies of the Second World War. Until now, their tale was largely untold. For fans of Erik Larson and Ben Macintyre, set amidst the fog of espionage, dueling spies, and the dawn of an age when science would determine the fate of the world,12 Seconds of Silence is a tribute to the extraordinary wartime mobilization of American science and the ultimate can-do story.

All Aunt Hagar's Children LP Edward P. Jones,2006-09-05 Edward P. Jones, a prodigy of the short story, returns to the form that first won him praise in this new collection of stories, All Aunt Hagar's Children. Here he turns an unflinching eye to the men, women, and children caught between the old ways of the South and the temptations

that await them in the city, people who in Jones's masterful hands emerge as fully human and morally complex. With the legacy of slavery just a stone's throw behind them and the future uncertain, Jones's cornucopia of characters will haunt readers for years to come.

Build Tony Fadell,2022-05-03 **New York Times, Wall Street Journal, and USAToday Bestseller** Tony Fadell led the teams that created the iPod, iPhone and Nest Learning Thermostat and learned enough in 30+ years in Silicon Valley about leadership, design, startups, Apple, Google, decision-making, mentorship, devastating failure and unbelievable success to fill an encyclopedia. So that's what this book is. An advice encyclopedia. A mentor in a box. Written for anyone who wants to grow at work—from young grads navigating their first jobs to CEOs deciding whether to sell their company—Build is full of personal stories, practical advice and fascinating insights into some of the most impactful products and people of the 20th century. Each quick 5-20 page entry builds on the previous one, charting Tony's personal journey from a product designer to a leader, from a startup founder to an executive to a mentor. Tony uses examples that are instantly captivating, like the process of building the very first iPod and iPhone. Every chapter is designed to help readers with a problem they're facing right now—how to get funding for their startup, whether to quit their job or not, or just how to deal with the jerk in the next cubicle. Tony forged his path to success alongside mentors like Steve Jobs and Bill Campbell, icons of Silicon Valley who succeeded time and time again. But Tony doesn't follow the Silicon Valley credo that you have to reinvent everything from scratch to make something great. His advice is unorthodox because it's old school. Because Tony's learned that human nature doesn't change. You don't have to reinvent how you lead and manage—just what you make. And Tony's ready to help everyone make things worth making.
