Cruising (With) Class Stan Zimmerman, 2007-02-26 Many beginning sailors soon yearn for a larger boat - with a galley, head and berths - so they can extend their time on the water and range of action. However, the simple mechanics of sailing do not include the variety of arts necessary to cruise successfully. *Cruising (with) Class* began as a series of lectures at the Sarasota (Florida) Sailing Squadron with the intention of teaching basic skills to beginning cruisers. Comfort on the water is not a matter of soft cushions. It comes from confidence in the ability to voyage safely. Reading the weather, planting the anchor, calculating the tides, navigating a coast, avoiding fatigue, choosing equipment, coping with storms, reacting to disasters, these are the arts of a cruiser. Although the book calls on the author's 25 years of cruising small sailboats, it is not a travelogue. Instead, it is a precise iteration of lessons learned the hard way, and presented in sailor-to-sailor fashion so others can avoid disaster and find comfort bred in confidence on the water.

When I Was a Loser John McNally, 2007-03-06 For Anyone Who's Ever Been a Teenager Who's teenage years weren't terrible? Remember the scary older kids? The sadistic gym teacher? The smelly kid who sat next to you in science class? Your first fumbling kiss? That time you threw up in the cafeteria? Your first attempt at putting on a condom? The period that arrived unexpectedly? That awful fight with your parents? The first time you got drunk? That note you wrote that you shouldn't have written? The day you forgot to zip your fly? That monster zit? When, you wondered, would it all end? In *When I Was a Loser*, John McNally, author of the novel *America's Report Card*, assembles twenty-five original essays--often hilarious, sometimes tenderhearted, always evocative--about defining moments of high school loserdom. Brad Land, Julianna Baggott, Owen King, Johanna Edwards, and many more fresh, talented writers explore their own angst, humiliation, heartache, and other staples of teen life. These essays perfectly capture what it was like to be in high school: to experience so many things for the first time, to assert independence while desperately trying to fit in, to feel misunderstood and unable to articulate the wild swings between heartbreak, anger, and euphoria. One writer recalls how his grandmother helped him with his home perm in preparation for the Senior Class picture; another recounts her discovery, sometime after hitting puberty, of the power she held over boys and men, while at the same time she felt herself at their mercy; a third remembers the casual cruelties visited on him by the cooler kids, and the cruelties he, in turn, inflicted on kids below him on the social ladder. Utterly candid and compulsively readable, these essays conjure up and untangle those raw and formative years. The writers cringe and laugh at the teenagers they were, but at the same time, they honor their adolescence and the way it shaped their lives. Because, in truth, beneath the layers of adult respectability, we all still carry a little bit of our teenage selves around with us.

Practical Doomsday Michal Zalewski,2022-01-11 Disasters happen. Be prepared. Here's how. As a leading security engineer, Michal Zalewski has spent his career methodically anticipating and planning for cyberattacks. In *Practical Doomsday*, Zalewski applies the same thoughtful, rational approach to preparing for disasters of all kinds. By sharing his research, advice, and a healthy dose of common sense, he'll help you rest easy knowing you have a plan for the worst—even if the worst never comes. The book outlines a level-headed model for evaluating risks, one that weighs the probability of scenarios against the cost of preparing for them. You'll learn to apply that model to the whole spectrum of potential crises, from personal hardships like job loss or a kitchen fire, to large-scale natural disasters and industrial accidents, to recurring pop-culture fears like all-out nuclear war. You'll then explore how basic lifestyle adjustments, such as maintaining a robust rainy-day fund, protecting yourself online, and fostering good relationships with your neighbors, can boost your readiness for a wide range of situations. You'll also take a no-nonsense look at the supplies and equipment essential to surviving sudden catastrophes, like prolonged power outages or devastating storms, and examine the merits and legal implications of different self-defense strategies. You'll learn: How to identify and meaningfully assess risks in your life, then develop strategies for managing them Ways to build up and diversify a robust financial safety net—a key component of nearly all effective preparedness strategies How to adapt your prep plans to a variety of situations, from shelter-in-place scenarios to evacuations by car or on foot Sensible approaches to stockpiling food, water, and other essentials, along with recommendations on what supplies are actually worth having Disasters happen, but they don't have to dominate your life. *Practical Doomsday* will help you plan ahead, so you can stop worrying about what tomorrow may bring and start enjoying your life today.

Sierra Hotel : flying Air Force fighters in the decade after Vietnam , 2001 In February 1999, only a few weeks before the U.S. Air Force spearheaded NATO's Allied Force air campaign against Serbia, Col. C.R. Anderegg, USAF (Ret.), visited the commander of the U.S. Air Forces in Europe. Colonel Anderegg had known Gen. John Jumper since they had served together as jet forward air controllers in Southeast Asia nearly thirty years earlier. From the vantage point of 1999, they looked back to the day in February 1970, when they first controlled a laser-guided bomb strike. In this book Anderegg takes us from glimmers of hope like that one through other major improvements in the Air Force that came between the Vietnam War and the Gulf War. Always central in Anderegg's account of those

changes are the people who made them. This is a very personal book by an officer who participated in the transformation he describes so vividly. Much of his story revolves around the Fighter Weapons School at Nellis Air Force Base (AFB), Nevada, where he served two tours as an instructor pilot specializing in guided munitions.

The Web Application Hacker's Handbook Dafydd Stuttard, Marcus Pinto, 2011-03-16 This book is a practical guide to discovering and exploiting security flaws in web applications. The authors explain each category of vulnerability using real-world examples, screen shots and code extracts. The book is extremely practical in focus, and describes in detail the steps involved in detecting and exploiting each kind of security weakness found within a variety of applications such as online banking, e-commerce and other web applications. The topics covered include bypassing login mechanisms, injecting code, exploiting logic flaws and compromising other users. Because every web application is different, attacking them entails bringing to bear various general principles, techniques and experience in an imaginative way. The most successful hackers go beyond this, and find ways to automate their bespoke attacks. This handbook describes a proven methodology that combines the virtues of human intelligence and computerized brute force, often with devastating results. The authors are professional penetration testers who have been involved in web application security for nearly a decade. They have presented training courses at the Black Hat security conferences throughout the world. Under the alias PortSwigger, Dafydd developed the popular Burp Suite of web application hack tools.

Homeland Cory Doctorow, 2013-02-05 In Cory Doctorow's wildly successful Little Brother, young Marcus Yallow was arbitrarily detained and brutalized by the government in the wake of a terrorist attack on San Francisco—an experience that led him to become a leader of the whole movement of technologically clued-in teenagers, fighting back against the tyrannical security state. A few years later, California's economy collapses, but Marcus's hacktivist past lands him a job as webmaster for a crusading politician who promises reform. Soon his former nemesis Masha emerges from the political underground to gift him with a thumbdrive containing a Wikileaks-style cable-dump of hard evidence of corporate and governmental perfidy. It's incendiary stuff—and if Masha goes missing, Marcus is supposed to release it to the world. Then Marcus sees Masha being kidnapped by the same government agents who detained and tortured Marcus years earlier. Marcus can leak the archive Masha gave him—but he can't admit to being the leaker, because that will cost his employer the election. He's surrounded by friends who remember what he did a few years ago and regard him as a hacker hero. He can't even attend a demonstration without being dragged onstage and handed a mike. He's not at all sure that just dumping the archive onto the Internet, before he's gone through its millions of words, is the right thing to do. Meanwhile, people are beginning to shadow him, people who look like they're used to inflicting pain until they get the answers they want. Fast-moving, passionate, and as current as next week, Homeland is every bit the equal of Little Brother—a paean to activism, to courage, to the drive to make the world a better place.
