Global Mental Health Sabine Bährer-Köhler, Francisco Javier Carod-Artal, 2017-10-06 This international survey defines mental health as a basic human right, and tracks the emergence of mental health prevention and promotion as a global priority. Locating mental illness within a cycle of negative causes and effects affecting human quality of life, the editors identify modern policy barriers to promotion/prevention initiatives, particularly the favoring of the biomedical health model by major stakeholders. The book's selection of successful programs from diverse countries displays a lifespan approach, emphasizing the centrality of interdisciplinary educational settings in providing primary and secondary prevention and promotion interventions, and the ongoing fight against missing financial investigations, discrimination and stigma. Together, these papers make a forceful argument for rights-based responses to worldwide mental health needs as part of the commitment toward global human rights and long-term development goals. Included in the coverage: · Mental health priorities around the world. · Social determinants of mental health. · Mental health and stigma: aspects of anti-stigma interventions. · Promoting social and emotional wellbeing and responding to mental health problems in schools. · The promotion and delivery of mental health services in primary care settings. · Economic evaluation of mental health promotion and mental illness prevention. Bringing to the fore public health concerns that are too often marginalized, *Global Mental Health* is necessary reading for health professionals, health and clinical psychologists, psychiatrists, medical sociologists, and policymakers.

Mastery of Your Anxiety and Worry (MAW) Richard E. Zinbarg, Michelle G. Craske, David H. Barlow, 2006-03-23 Generalized Anxiety Disorder occurs in approximately 4% of the population and is characterized by excessive uncontrollable worry about everyday things. The constant worry can be extremely impairing if left untreated, even to the point of causing physical symptoms. Written by the developers of an empirically supported and effective cognitive-behavioral therapy program for treating GAD, this second edition therapist guide includes all the information and materials necessary to implement a successful treatment protocol. The therapeutic technique described in this book is research-based with a proven success rate when used in both individual and group formats, as well as with clients currently taking medication. Designed to be used in conjunction with its corresponding workbook, this therapist guide outlines a 10-session program comprised of four primary treatment modules including, cognitive restructuring, progressive muscle relaxation, worry exposures, and in vivo exposure exercises. New features to this edition include expanded chapters that provide detailed instructions for conducting each session, session outlines, and recommended homework assignments. This user-friendly guide is a dependable resource that no clinician can do without! *Treatments That Work™* represents the gold standard of behavioral healthcare interventions! · All programs have been rigorously tested in clinical trials and are backed by years of research · A prestigious scientific advisory board, led by series Editor-In-Chief David H. Barlow, reviews and evaluates each intervention to ensure that it meets the highest standard of evidence so you can be confident that you are using the most effective treatment available to date · Our books are reliable and effective and make it easy for you to provide your clients with the best care available · Our corresponding workbooks contain psychoeducational information, forms and worksheets, and homework assignments to keep clients engaged and motivated · A companion website (www.oup.com/us/ttw) offers downloadable clinical tools and helpful resources · Continuing Education (CE) Credits are now available on select titles in collaboration with PsychoEducational Resources, Inc.

Advances in Cryptology – CRYPTO 2022 Yevgeniy Dodis, Thomas Shrimpton, 2022-10-11 The 4-volume sets LNCS 13507, 13508, 13509, 13510 constitutes the refereed proceedings of the 42nd Annual International Cryptology Conference, CRYPTO 2022, which was held in Santa Barbara, CA, USA, in August 2022. The total of 100 papers included in the proceedings was reviewed and selected from 455 submissions. The papers were organized in the following topical sections: Cryptanalysis; randomness; quantum cryptography; advanced encryption systems; secure messaging; lattice-based zero knowledge; lattice-based signatures; blockchain; coding theory; public key cryptography; signatures, idealized models; lower bounds; secure hash functions; post-quantum cryptography; symmetric cryptanalysis; secret sharing and secure multiparty computation; unique topics; symmetric key theory; zero knowledge; and threshold signatures.

Applications of Blockchain and Big IoT Systems Arun Solanki, Vishal Jain, Loveleen Gaur, 2022-08-29 This new volume explores a plethora of blockchain-based solutions for big data and IoT applications, looking at advances in real-world applications in several sectors, including higher education, cybersecurity, agriculture, business and management, healthcare and biomedical science, construction and project management, smart city development, and others. Chapters explore emerging technology to combat the ever-increasing threat of security to computer systems and offer new architectural solutions for problems encountered in data management and security. The chapters help to provide a high level of understanding of various blockchain algorithms along with the necessary tools and techniques. The novel architectural solutions in the deployment of blockchain presented here are the core of the book.

Solutions for Cyber-Physical Systems Ubiquity Druml, Norbert, Genser, Andreas, Krieg, Armin, Menghin, Manuel, Hoeller, Andrea, 2017-07-20 Cyber-physical systems play a crucial role in connecting aspects of online life to physical life. By studying emerging trends in these systems, programming techniques can be optimized and strengthened to create a higher level of effectiveness. Solutions for Cyber-Physical Systems Ubiquity is a critical reference source that discusses the issues and challenges facing the implementation, usage, and challenges of cyber-physical systems. Highlighting relevant topics such as the Internet of Things, smart-card security, multi-core environments, and wireless sensor nodes, this scholarly publication is ideal for engineers, academicians, computer science students, and researchers that would like to stay abreast of current methodologies and trends involving cyber-physical system progression.

Emotions and Service in the Digital Age Charmine E. J. Härtel, Wilfred J. Zerbe, Neal M. Entrepreneurial Strategies for Value Creation in Times of Uncertainty Wojciech Dyduch, 2024-01-01 Entrepreneurial (re)orientation in the face of crisis: Is it worth modifying entrepreneurial strategy? Abstract PURPOSE: This article aims to determine how companies in the SME sector modify their business strategies in response to changes in the external environment. The research focused on modifications to entrepreneurial strategies expressed through the fundamental dimensions of entrepreneurial orientation (EO): risk-taking, innovativeness, and proactiveness. Additionally, it identified which types of reactions (modifications in strategies) lead to the most favorable changes in firm performance. The external environment was determined based on the market situation that resulted from the emergence of the COVID-19 pandemic. METHODOLOGY: This is quantitative research. The study utilized data from 126 small printing

businesses operating throughout Poland. Analyses were conducted on the data that reflected modifications in entrepreneurial behaviors and performance during three periods: the pre-crisis period, the initial phase of the crisis (the full lockdown period), and the second phase of the crisis (the period of easing the restrictions). The identification of the behavior types was carried out using cluster analysis. **FINDINGS:** The results of the research led to the conclusion that, with a change in market conditions, companies significantly change their levels of EO. In particular, the surveyed companies reduced their levels of EO during the outbreak of the COVID-19 pandemic. At the same time, this decrease was mainly due to significant decreases in risk-taking. The levels of EO increased when the conditions improved due to significant increases in innovativeness and proactiveness. Moreover, the analysis enabled the identification of four types of reactions to the emergence of the crisis as well as three types of reactions to the improvement of the external conditions that resulted from the easing of restrictions and the introduction of anti-crisis support measures for businesses. Additionally, it was demonstrated that the type of reaction had a significant impact on the changes in the performances of the examined companies. In particular, it was shown that the lowest decline in performance during the initial phase of crisis could be observed in passive enterprises, i.e., those that did not modify their entrepreneurial strategies (did not alter their levels of individual dimensions of EO). The greatest increase in performance was achieved during the period of easing restrictions by those companies that significantly enhanced their activities across all of the considered dimensions of EO. **IMPLICATIONS:** The research results provided insights for entrepreneurs in strategic management. Specifically, they learned about the modifications in entrepreneurial behaviors that could lead to the most favorable and optimal improvements in a firm's performance when market conditions change. **ORIGINALITY AND VALUE:** The study contributes to the literature concerning reactions to changes in market conditions. This innovative approach considers dynamics where the changes themselves are variables. In particular, this research identifies types of entrepreneurial reactions to market condition changes in terms of dimensions of entrepreneurial orientation. Furthermore, it provides an answer to how firm performance evolved regarding various reaction types (using the example of the printing industry). **Keywords:** entrepreneurial orientation, crisis management strategies, strategy adaptation, strategy modification, business strategy, risk-taking, innovativeness, proactiveness, crisis, COVID-19, external environment, small businesses, firm performance, cluster analysis, entrepreneurial behavior

Redefining rural entrepreneurship: The impact of business ecosystems on the success of rural businesses in Extremadura, Spain

Abstract

PURPOSE: Regarding the growth of public policies fostering rural entrepreneurship, the primary objectives of this work involve examining the concept of rural entrepreneurship, identifying key aspects that differentiate it from non-rural entrepreneurship, and assessing the role of the local entrepreneurial ecosystem in supporting the initiation and growth of rural ventures. To achieve these goals, the study adopts a novel approach by integrating an analysis of rural entrepreneurship features with an exploration of the entrepreneurial ecosystem's impact. **METHODOLOGY:** After a review of the previous academic literature, the characteristics of rural entrepreneurship have been delimited, distinguishing it from non-rural. The research results have been obtained using a questionnaire, after a descriptive analysis of the sample, and an analysis of the difference in means by contrasting hypotheses using IBM SPSS Statistics 26. **FINDINGS:** This article explores the factors that contribute to rural entrepreneurship, challenging the notion that geographic location is the sole defining characteristic. Through the conducted investigation, it has been determined that a company's classification as rural is not solely based on its geographical location in rural areas or involvement in primary sector activities. Other aspects, such as a strong connection with the local community or the ability to create value, are also essential in defining a rural enterprise. Additionally, it examines how business ecosystems can foster the

growth and success of rural entrepreneurship. **IMPLICATIONS:** This study provides an analysis of how rural entrepreneurship can drive endogenous development in rural areas. It also offers insights for government entities and policymakers to implement effective support measures and strategies in business ecosystems within rural environments. This study highlights that the resources found in rural entrepreneurial ecosystems may not be sufficient to support rural entrepreneurship. It's important to acknowledge that rural entrepreneurship requires specific resources that may not currently be available in business ecosystems. To increase the number of viable rural businesses, new resources tailored to rural entrepreneurship must be created, leveraging the area's endogenous resources and growth models. **ORIGINALITY AND VALUE:** This study examines the distinctive attributes of rural entrepreneurship, with a deliberate departure from exclusive emphasis on geographical location or primary economic sector. Drawing upon empirical research conducted among a cohort of rural enterprises, the analysis reveals that neither physical location nor primary sector affiliation substantially contribute to the establishment of these rural businesses. Instead, a profound connection to, and a heightened sense of belonging within the rural milieu emerge as pivotal determinants. Furthermore, rural entrepreneurship emerges as a promising avenue for the development of the region, offering substantial growth prospects. The investigation encompasses a scrutiny of the resources within the rural business ecosystem and their capacity to stimulate rural entrepreneurial activity. This emerging focal point represents a novel field of concern for governmental bodies and political institutions operating in rural areas. **Keywords:** entrepreneurship, rural entrepreneurship, business ecosystems, rural business success, entrepreneurial ecosystem, rural development strategies, endogenous development, rural ventures, geographic location impact, local community engagement, policy implementation for rural areas, value creation, embeddedness

Making of intrapreneurial managers: Investigating unethical behavior, risk-taking, and decision-making speed as antecedents

Abstract PURPOSE: The entrepreneurship-ethics nexus draws considerable interest from researchers and practitioners with little resolution. Our purpose with this paper is to contribute to the debate by shedding light on the relationship between managers' attitudes toward unethical behavior and their subsequent entrepreneurial intention (EI) in an emerging economy context. Given the complex and multifaceted interplay between unethical behavior and EI, we extend our investigation by including decision-making speed and attitude toward risk to explain the relationship further. We take a granular approach to facets of unethical behavior to gain deeper insights into the specificity of influences they pose on subsequent behavioral intentions. **METHODOLOGY:** Primary data were collected from 214 Kosovan managers employed in companies from different industries. Hypothesized relationships were tested by conducting hierarchical regression analyses. **FINDINGS:** Our results indicate that managers with higher EI are not necessarily unethical overall. We did not find support for the hypothesis that managers with stronger attitudes toward unethical behavior demonstrate higher entrepreneurial intentions. Focusing on dimensions of unethical behavior, we find that managers who favor bribery are more entrepreneurially inclined. Furthermore, we find that managers who are quick decision-makers and risk-takers express higher EI. **IMPLICATIONS:** Theoretically, we add to the existing body of research on ethics and entrepreneurship by empirically examining the relationship between attitude toward unethical behavior and EI and the viability of the Theory of Planned Behavior as a framework for integrating unethical behavior in entrepreneurship research. Our study affirms the extension of the theoretical and empirical underpinnings concerning ethics and entrepreneurship, contemplating that they are pervasive across contexts. We provide important practical implications for managers, especially in the corporate entrepreneurship and training context. Managers are encouraged to foster an entrepreneurial-friendly environment that abides by ethical standards. Our study also informs

policymakers of the importance of formal education on entrepreneurship as a mechanism to enforce ethical awareness in future entrepreneurs and intrapreneurs. **ORIGINALITY AND VALUE:** This study is among the first attempts to test the relationship between unethical behavior and EI in a managerial sample and non-western context. **Keywords:** entrepreneurial intention, unethical behavior, bribery, risk-taking, decision-making speed, intrapreneurial managers, entrepreneurship-ethics nexus, hierarchic regression analysis, corporate entrepreneurship, theory of planned behavior, ethical standards, entrepreneurship Entrepreneurial agility and organizational performance of IT firms: A mediated moderation model **Abstract PURPOSE:** The Information and Communication Technology (ICT) sector is playing an important role in the growth of the world's economy. However, limited knowledge exists concerning the underlying mechanisms and boundary-spanning conditions under which entrepreneurial agility (EA) affects the organizational performance (OP) of IT firms. This study draws on the Dynamic Capability Theory (DCT) to examine the effect of entrepreneurial agility (EA) on the organizational performance (OP) of Italian IT firms with the mediating role of open innovation (OI) and the moderating role of environmental dynamism (ED). **METHODOLOGY:** Employing an explanatory research design and convenience sampling technique via an online survey to gather data from a sample of 411 Italian IT firms, the study tested the formulated hypotheses using the structural equation modeling technique in AMOS statistical software. **FINDINGS:** The results revealed that EA, directly and indirectly, influences OP of IT firms. Moreover, the mediation analysis unveils that OI plays a complementary, partial mediation role in the EA—OP nexus. Finally, ED moderates this focal relationship, such that in the presence of high environmental dynamism, the relationship between EA and OP gets stronger compared to low environmental dynamism. **IMPLICATIONS:** The findings imply that IT firms should emphasize adopting agile procedures and structures that allow them to react to new problems and opportunities swiftly by building a culture of innovation through the adoption of OI strategies (inbound, outbound, and coupled) to tap into the broader range of expertise and resources in the business environment. To improve the link between OI and OP, managers should prioritize building relationships with external partners, such as customers, suppliers, and academic institutions. IT firms should also prioritize building a diverse and inclusive workforce that can bring diverse perspectives and experiences to the innovation process to enhance their innovation capabilities and create products and services that better meet the needs of customers. **ORIGINALITY AND VALUE:** The study's value lies in extending the ongoing scholarly discussion on the nexus between EA and OP by exploring OI as an intermediary mechanism that connects EA, OP, and ED as a boundary-spanning condition that moderates the focal relationship. This research highlights the interplay between EA, OI, ED, and OP, using the DCT as a theoretical foundation. It is the first to examine such interrelationships in the IT sector. In addition, the study provides new insight for researchers focusing on the information technology (IT) sector. **Keywords:** entrepreneurial agility, organizational performance, IT firms, dynamic capability theory, open innovation, environmental dynamism, mediated moderation model, structural equation modeling, information and communication, technology sector, innovation management **Decoding startup failures in Indian startups: Insights from Interpretive Structural Modeling and Cross-Impact Matrix Multiplication Applied to Classification Abstract PURPOSE:** Start-ups are widely acknowledged as crucial catalysts for innovation and drivers of economic progress. However, their vulnerability to failure continues to pose a persistent and significant obstacle. In light of this, the study intends to ascertain the various elements responsible for the elevated incidence of start-up failures and examine their contextual associations. It further aims to establish the hierarchical structure and identify the crucial factors of start-up failure. **METHODOLOGY:** The paper uses the Interpretive Structural Modeling (ISM) approach to determine the structural hierarchy

and interconnections among the causes of start-up failures identified through the comprehensive analysis of existing literature and experts' opinions. MICMAC (Cross-Impact Matrix Multiplication Applied to Classification) analysis is also being utilized to categorize these identified failure causes into autonomous, independent, dependent, and linking factors by their driving and dependency powers. FINDINGS: A structural framework depicting the interrelationships among the factors has been derived, showing the failure factor, 'poor market positioning' factor at the highest level, and the 'lack of entrepreneurial efficiency' at the lowest level of the model. The results also revealed that lack of entrepreneurial efficiency, poor management, and external environmental issues are the most significant independent factors upon which all other failure factors rely. It also categorizes 'poor market positioning' as the dependent factor, signifying its passive role in the failure of start-ups. IMPLICATIONS: As previous literature has discussed the various factors responsible for the failure of start-ups in isolation, the current study fills out the gap in the literature by establishing linkages among those factors. The study's insights emphasize the value of effective management teams and entrepreneurial skills in averting start-up failures. It highlights the importance of skill development and mentorship to enhance the capabilities of entrepreneurs and their teams. Furthermore, the research indicates that policymakers and support groups can create focus initiatives addressing issues like market validation, team dynamics, and financial management to enhance the start-up environment. These initiatives may encompass entrepreneurship training, financial assistance, and mentorship through the 'Start-up India' Program, Bharat Fund platform, etc. ORIGINALITY AND VALUE: Previous studies on entrepreneurial failure are based on AHP (Analytical Hierarchical Process), content analysis, and quality management methodologies. This is potentially the first study using the ISM-MICMAC approach that explores the complex world of start-up failures in India and illustrates the relative influence and interdependence of various failure factors of start-ups through a hierarchical model. The effectiveness of agile leadership in practice: A comprehensive meta-analysis of empirical studies on organizational outcomes Abstract PURPOSE: The COVID-19 pandemic and the digital transformation have hastened the demand for enterprises to be more flexible and adaptive in a fast-changing environment, making agile leadership a prominent business trend. Agile leadership improves innovation efficiency, employee performance, and team effectiveness. However, there is limited research on agile leadership's effects on organizational outcomes. Thus, this study provides a meta-analytic review of the impact of agile leadership on organizational outcomes that cover various common dimensions like operational, employee, customer, financial, and social environments. METHODOLOGY: The study has two phases: the first phase performs bibliometric literature analysis, and the second phase performs meta-analysis. In the bibliometric literature analysis, 74 articles that were published between 2004 and 2023 were identified from Scopus and Google Scholar, and their type of publication, year of publication, countries involved in agile leadership research, keywords involved, and their association are examined. For the meta-analysis, 24 articles that performed empirical research were chosen from which the various independent and dependent variables studies, along with their standard regression coefficients (β) and correlation coefficients (γ) that represent the relationship between agile leadership or agile leaders and that of other factors, were extracted and examined. FINDINGS: The study found that there was a significant rise in publications on agile leadership after 2020, and Turkey, the United States, and Indonesia were involved more than other countries. Moreover, agile leadership is studied more in terms of operational outcomes and employee outcomes. The

results of the meta-analysis indicate that agile leadership has a strong relationship with factors like interpersonal trust ($\beta=0.93$), organizational performance ($\beta=0.90$), organizational effectiveness ($\beta=0.89$), individual career success ($\beta=0.89$) and innovation management ($\beta=0.81$). Thus, it is clear that agile leadership has a stronger impact on operational outcomes than employee outcomes. Agile leadership characteristics such as digital innovation, trust, competency, result orientation, and wisdom are significant for organizational growth, team collaboration, team effectiveness, and organizational innovation. **IMPLICATIONS:** Identifying agile leadership concepts helps assess the progress of empirical research, improve leadership theories and models, and identify potential growth opportunities. The success of agile leadership depends on factors like a company's culture, industry, and size, and this can be studied further. Furthermore, organizations may need to adjust their strategies on customer service, financial management, and investment so that they better reflect the values of agile leadership. **ORIGINALITY AND VALUE:** This study classifies numerous different research models that shed light on the efficiency of agile leadership based on a comprehensive literature review that serves as the basis for this study. In addition, this study identifies potential problem areas that need to be fixed, and as a result, it makes a contribution to the research on agile leadership. **Keywords:** agile leadership, organizational outcomes, operational outcome, employee outcome, interpersonal trust, leadership practice, organizational performance, meta-analysis, digital transformation, innovation management, employee performance, interpersonal trust, team effectiveness, COVID-19, strategic flexibility Relationship between entrepreneurial orientation, innovative co-branding partnership, and business performance **Abstract PURPOSE:** This study aimed to determine the relationship between entrepreneurial orientation (EO), innovative co-branding partnership, and business performance. EO was analyzed through five dimensions: innovativeness, proactiveness, risk-taking, competitive aggressiveness, and autonomy. **METHODOLOGY:** As part of the first phase of brand management research, the quantitative survey was conducted in June 2023 among managers of companies operating in Poland using an online questionnaire. 280 responses were obtained, of which 266 questionnaires were qualified for further calculations. Incomplete questionnaires were eliminated. Hypotheses were formulated regarding the positive impact of the five dimensions of EO (innovation, proactivity, risk-taking, competitive aggressiveness, and autonomy) on business performance and innovative co-branding partnership, and the positive impact of innovative co-branding partnership on business performance. Structural equation modeling using partial least squares (PLS-SEM) was applied to support the conceptual framework and proposed hypotheses. The calculations were performed in Smart PLS version 4.0.9.5. **FINDINGS:** The results indicate that three EO dimensions (innovativeness, proactiveness, and competitive aggressiveness) influence business performance. There was no effect of risk-taking and autonomy on business performance. In addition, three EO dimensions (innovativeness, competitive aggressiveness, and autonomy) influence innovative co-branding partnership. No effect of risk-taking and proactivity was found on innovative co-branding partnership. This means that two EO dimensions (innovativeness and competitive aggressiveness) positively influence innovative co-branding partnership and business performance. Furthermore, innovative co-branding partnership was proven to influence business performance. **IMPLICATIONS for theory and practice:** The results of the study point to theoretical implications for further exploration of entrepreneurial orientation and its dimensions. The practical implications relate to recommendations for managers. Managers should make efforts to increase innovation, market activity, and competitiveness of the market offer. It is necessary to monitor the actions taken in the context of their impact on selected market, consumer, product, and brand performance. In addition, managers should analyze the possibilities of undertaking cooperation of this nature to increase business performance. **ORIGINALITY AND VALUE:** This study provides a better understanding of the

impact of entrepreneurial orientation on business performance using innovative co-branding. Compared to previous studies, it has an advantage in research by introducing the issue of innovative co-branding, which can be used for the development of new business activities. In addition, this study focuses on several areas of business performance, including product, brand, consumer, and financial performance. Keywords: entrepreneurial orientation, innovativeness, proactiveness, risk-taking, competitive aggressiveness, autonomy, innovative co-branding partnership, business performance, Structural Equation Modeling (SEM), brand management, market performance

The Routledge International Handbook of Dyslexia in Education Gad Elbeheri, Lee Siang, 2022-07-20 The Routledge International Handbook of Dyslexia in Education showcases the various examples, expertise, and successful initiatives attempted to include students with dyslexia around the globe. It highlights progress and identifies gaps for growth globally to stand united against dyslexia as a literacy problem and a specific learning disability challenge. Taking a truly global view, each chapter from world-leading experts highlights issues related to the definition of dyslexia and how it is recognised locally, its implications on relevant legislations and educational policy and how teacher training programs on dyslexia are delivered at both pre-service and in-service levels. Contributors to this handbook also discuss and compare the services and tools available to identify individuals with dyslexia, such as nationally standardized tests and tools for dyslexia assessment. Students, researchers, teachers and other educational professionals who require highly relevant, research-informed guidance on dyslexia and its awareness, identification, training, outreach, and intervention around the globe will find this handbook an essential and timely resource. Readers will also be able to identify shared experiences and good lessons from around the world, as well as learn about better strategies to guide their journey in their own local community.

Resource Activation Christoph Flückiger, Günther Wüsten, Richard Zinbarg, Bruce Wampold, 2010-02-01 This concise practice-oriented manual effectively shows how psychologists, psychiatrists, social workers, supervisors, and counselors can quickly identify and put to therapeutic use an individual's own talents and resources. Written in an easy and relaxed style using everyday language, this manual illustrates how to actively take a person's resources into consideration during therapy and counseling sessions, and how to integrate them into existing intervention concepts. The first part illustrates approaches that can be used to focus attention on assessment and dialog, and that shed light on a person's individual resources from various angles. These therapeutic approaches can be used in the framework of existing manuals and guidelines to focus on how to do things. The second part illustrates procedures offering a framework for further applying the different perspectives and provides sample worksheets for practical use.

Practical Computer Vision Applications Using Deep Learning with CNNs Ahmed Fawzy Gad, 2018-12-05 Deploy deep learning applications into production across multiple platforms. You will work on computer vision applications that use the convolutional neural network (CNN) deep learning model and Python. This book starts by explaining the traditional machine-learning pipeline, where you will analyze an image dataset. Along the way you will cover artificial neural networks (ANNs), building one from scratch in Python, before optimizing it using genetic algorithms. For automating the process, the book highlights the limitations of traditional hand-crafted features for computer vision and why the CNN deep-learning model is the state-of-art solution. CNNs are discussed

from scratch to demonstrate how they are different and more efficient than the fully connected ANN (FCNN). You will implement a CNN in Python to give you a full understanding of the model. After consolidating the basics, you will use TensorFlow to build a practical image-recognition model that you will deploy to a web server using Flask, making it accessible over the Internet. Using Kivy and NumPy, you will create cross-platform data science applications with low overheads. This book will help you apply deep learning and computer vision concepts from scratch, step-by-step from conception to production. What You Will Learn Understand how ANNs and CNNs work Create computer vision applications and CNNs from scratch using Python Follow a deep learning project from conception to production using TensorFlow Use NumPy with Kivy to build cross-platform data science applications Who This Book Is For Data scientists, machine learning and deep learning engineers, software developers.

No Useless Mouth Rachel B. Herrmann, 2019-11-15 Rachel B. Herrmann's *No Useless Mouth* is truly a breath of fresh air in the way it aligns food and hunger as the focal point of a new lens to reexamine the American Revolution. Her careful scrutiny, inclusive approach, and broad synthesis—all based on extensive archival research—produced a monograph simultaneously rich, audacious, insightful, lively, and provocative.—*The Journal of American History* In the era of the American Revolution, the rituals of diplomacy between the British, Patriots, and Native Americans featured gifts of food, ceremonial feasts, and a shared experience of hunger. When diplomacy failed, Native Americans could destroy food stores and cut off supply chains in order to assert authority. Black colonists also stole and destroyed food to ward off hunger and carve out tenuous spaces of freedom. Hunger was a means of power and a weapon of war. In *No Useless Mouth*, Rachel B. Herrmann argues that Native Americans and formerly enslaved black colonists ultimately lost the battle against hunger and the larger struggle for power because white British and United States officials curtailed the abilities of men and women to fight hunger on their own terms. By describing three interrelated behaviors—food diplomacy, victual imperialism, and victual warfare—the book shows that, during this tumultuous period, hunger prevention efforts offered strategies to claim power, maintain communities, and keep rival societies at bay. Herrmann shows how Native Americans, free blacks, and enslaved peoples were useful mouths—not mere supplicants for food, without rights or power—who used hunger for cooperation and violence, and took steps to circumvent starvation. Her wide-ranging research on black Loyalists, Iroquois, Cherokee, Creek, and Western Confederacy Indians demonstrates that hunger creation and prevention were tools of diplomacy and warfare available to all people involved in the American Revolution. Placing hunger at the center of these struggles foregrounds the contingency and plurality of power in the British Atlantic during the Revolutionary Era. Thanks to generous funding from Cardiff University, the ebook editions of this book are available as Open Access volumes from Cornell Open (cornellpress.cornell.edu/cornell-open) and other repositories.

Sleep-Wake Neurobiology and Pharmacology Hans-Peter Landolt, Derk-Jan Dijk, 2019-09-03 This volume connects current ideas and concepts about sleep functions and circadian rhythms with the search for novel target-selective sleep-wake therapeutics. To do so, it provides a timely, state-of-the-art overview of sleep-wake mechanisms in health and disease, ongoing developments in drug discovery, and their prospects for the clinical treatment of sleep-disordered patients. It particularly focuses on the concept that sleep and wakefulness mutually affect each other, and the future therapeutic interventions with either sleep- or wake-promoting agents that are expected to not only improve the quality of sleep but also the waking behavior, cognition, mood and other sleep-associated physiological functions. Gad Eprint 10 Introduction

In the digital age, access to information has become easier than ever before. The ability to download Gad Eprint 10 has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Gad Eprint 10 has opened up a world of possibilities. Downloading Gad Eprint 10 provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Gad Eprint 10 has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Gad Eprint 10. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as

an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Gad Eprint 10. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Gad Eprint 10, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Gad Eprint 10 has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.
