Locking Up Our Own James Forman, Jr., 2017-04-18 In recent years, America's criminal justice system has become the subject of an increasingly urgent debate. Critics have assailed the rise of mass incarceration, emphasizing its disproportionate impact on people of color. As James Forman, Jr., points out, however, the war on crime that began in the 1970s was supported by many African American leaders in the nation's urban centers. In *Locking Up Our Own*, he seeks to understand why. Forman shows us that the first substantial cohort of black mayors, judges, and police chiefs took office amid a surge in crime and drug addiction. Many prominent black officials, including Washington, D.C. mayor Marion Barry and federal prosecutor Eric Holder, feared that the gains of the civil rights movement were being undermined by lawlessness—and thus embraced tough-on-crime measures, including longer sentences and aggressive police tactics. In the face of skyrocketing murder rates and the proliferation of open-air drug markets, they believed they had no choice. But the policies they adopted would have devastating consequences for residents of poor black neighborhoods. A former D.C. public defender, Forman tells riveting stories of politicians, community activists, police officers, defendants, and crime victims. He writes with compassion about individuals trapped in terrible dilemmas—from the men and women he represented in court to officials struggling to respond to a public safety emergency. *Locking Up Our Own* enriches our understanding of why our society became so punitive and offers important lessons to anyone concerned about the future of race and the criminal justice system in this country.

A Colony in a Nation Chris Hayes, 2017-03-21 New York Times Bestseller New York Times Book Review Editors' Choice An essential and groundbreaking text in the effort to understand how American criminal justice went so badly awry. —Ta-Nehisi Coates, author of *Between the World and Me* In *A Colony in a Nation*, New York Times best-selling author and Emmy Award-winning news anchor Chris Hayes upends the national conversation on policing and democracy. Drawing on wide-ranging historical, social, and political analysis, as well as deeply personal experiences with law enforcement, Hayes contends that our country has fractured in two: the Colony and the Nation. In the Nation, the law is venerated. In the Colony, fear and order undermine civil rights. With great empathy, Hayes seeks to understand this systemic divide, examining its ties to racial inequality, the omnipresent threat of guns, and the dangerous and unfortunate results of choices made by fear.

Arctic Chill Arnaldur Indridason, 2010-08-31 In this new extraordinary thriller from Gold Dagger Award winner Arnaldur Indridason, the Reykjavik police are called on an icy January day to a garden where a body has been found: a young, dark-skinned boy is frozen to the ground in a pool of his own blood. Erlendur and his team embark on their investigation and soon unearth tensions simmering beneath the surface of Iceland's outwardly liberal, multicultural society. Meanwhile, the boy's murder forces Erlendur to

confront the tragedy in his own past. Soon, facts are emerging from the snow-filled darkness that are more chilling even than the Arctic night.

Ultrasound Guidance in Regional Anaesthesia Peter Marhofer,2010-09-09 Ultrasonographic guidance for regional anaesthetic blocks is an innovative technique that allows for the direct visualization of nerves, adjacent structures and the position of the needle, as well as for the precise observation of the spread of local anaesthetic. The advantages of the technique allow for the exact administration of moderate volumes of local anaesthetic, reducing the risk of complications. Written by a physician with 16 years' experience in ultrasound-guided regional anaesthesia, this second edition of the well-received practical handbook provides a concise summary of the basics of ultrasound technology and the most recent techniques in the use of ultrasound to guide peripheral nerve blocks, focusing specifically on ultrasound-guided peripheral nerve block techniques. All chapters have been carefully revised to provide the most recent knowledge in the topic of ultrasound in regional anaesthesia. A strong focus has still been attached on anatomical descriptions and subsequent practical implementations. Paediatric applications are now included in this new edition to aid paediatric anaesthesiologists, as well as the incorporation of neuraxial techniques to complete the entire topic. With illustrated colour images throughout, this book is highly relevant to anaesthesiologists and pain specialists with an interest in regional anaesthesia.

Knowing and Teaching Elementary Mathematics Liping Ma,2010-03-26 Studies of teachers in the U.S. often document insufficient subject matter knowledge in mathematics. Yet, these studies give few examples of the knowledge teachers need to support teaching, particularly the kind of teaching demanded by recent reforms in mathematics education. *Knowing and Teaching Elementary Mathematics* describes the nature and development of the knowledge that elementary teachers need to become accomplished mathematics teachers, and suggests why such knowledge seems more common in China than in the United States, despite the fact that Chinese teachers have less formal education than their U.S. counterparts. The anniversary edition of this bestselling volume includes the original studies that compare U.S and Chinese elementary school teachers' mathematical understanding and offers a powerful framework for grasping the mathematical content necessary to understand and develop the thinking of school children. Highlighting notable changes in the field and the author's work, this new edition includes an updated preface, introduction, and key journal articles that frame and contextualize this seminal work.
