The Art of Crayon Lorraine Bell,2016-07-01 Create astonishing artwork with crayons! Crayons aren't just for kids anymore!Sculptors use them whole, bundling thousands of crayons to create environmental and installation-size sculptures. Carvers pierce and reshape crayons with scalpels, turning them into mini totems, helixes, and portrait busts. Landscape and still-life artists layer crayon shades in works on paper that rival paintings in their subtlety and depth. What will you do?! The Art of Crayon will guide you through a gallery of works by contemporary artists who use crayons as a diverse and dynamic medium. Each chapter includes a specific style of crayon artwork, complete with engaging projects from author Lorraine Bell to help you learn different techniques. From sculpture, to carving, to melted wax and drawing, you'll soon become a master crayon artist!

One - For Crayons and Wide Tipped Markers Angie Grace,2018-04-25 One day, as I was restacking my ever growing mountain of sketchbooks and papers packed full of tiny motifs, I realized that there will never be enough hours in the day to refine each one into polished line work and carefully balanced patterns. The rough sketches accumulate too fast - in notebooks, on the backs of envelopes, everywhere! I found myself growing increasingly unsettled until a conversation with my mother made everything crystal clear. She suggested that I make a series of books from all of these special little snippets and unpolished gems and share them as a behind the scenes peek into my private daily drawing through the years. I invite you to color along with me as I sort through sketchbook mountain and place these moments, fragments and doodles into mini galleries for us to enjoy. And while you color this set of motifs, I'll be busily tidying up my giant stash of small drawings - and creating new ones too, of course. Will I ever get caught up with all of this? Probably not, but it's going to be fun trying!

The Day the Crayons Quit Drew Daywalt,2013-06-27 The hilarious, colorful #1 New York Times bestselling phenomenon that every kid wants! Gift a copy to someone you love today. Poor Duncan just wants to color. But when he opens his box of crayons, he finds only letters, all saying the same thing: His crayons have had enough! They quit! Blue crayon needs a break from coloring all those bodies of water. Black crayon wants to be used for more than just outlining. And Orange and Yellow are no longer speaking—each believes he is the true color of the sun. What can Duncan possibly do to appease all of the crayons and get them back to doing what they do best? With giggle-inducing text from Drew Daywalt and bold and bright illustrations from Oliver Jeffers, *The Day the Crayons Quit* is the perfect gift for new parents, baby showers, back-to-school, or any time of year! Perfect for fans of *Don't Let the Pigeon Drive the Bus* by Mo Willems and *The True Story of the Three Little Pigs* by Jon Scieszka and Lane Smith. Praise for *The Day the Crayons Quit*: Amazon's 2013 Best Picture Book of the Year A Barnes & Noble Best Book of 2013 Goodreads' 2013 Best Picture Book of the Year Winner of the E.B. White Read-Aloud Award * "Hilarious . . . Move over, Click, Clack, Moo; we've got a new contender for the most successful picture-book strike." -BCCB, starred review "Jeffers . . . elevates crayon drawing to remarkable heights." -Booklist "Fresh and funny." -The Wall Street Journal This book will have children asking to have it read again and again." -Library Media Connection * "This colorful title should make for an uproarious storytime." -School Library Journal, starred review * "These memorable personalities will leave readers glancing apprehensively at their own crayon boxes." -Publishers Weekly, starred review "Utterly original." -San Francisco Chronicle

Picturing Evolution and Extinction Fae Brauer,2015-10-05 With the increasing loss of biological diversity in this Sixth Age of Mass Extinction, it is timely to show that devolutionary paranoia is not new, but rather stretches back to the time of Charles Darwin. It is also an opportune moment to show how human-driven extinction, as designated by the term, Anthropocene, has long been acknowledged. The halcyon days of European industrial progress, colonial expansion and scientific revolution trumpeted from the Great Exhibition of 1851 until the Dresden International Hygiene Exhibition of 1930 were constantly marred by fears of rampant degeneration, depopulation, national decline, environmental devastation and racial extinction. This is demonstrated by the discourses of catastrophism charted in this book that percolated across Europe in response to the theories of Darwin and Jean Baptiste Lamarck, as well as Marcellin Berthelot, Camille Flammarion, Ernst Haeckel, Louis Landouzy, Félix Le Dantec, Cesare Lombroso, Thomas Huxley, Bénédict-Augustin Morel, Louis Pasteur, Élisée Reclus, Rudolf Steiner and Wilhelm Wundt, among others. This book presents pioneering explorations of the interrelationship between these discourses and modern visual cultures and the ways in which the "picturing of evolution and extinction" by artists as diverse as Roger Broders, Albert Besnard, Fernand Cormon, Hélène Dufau, Émile Gallé, František Kupka, Pablo Picasso, Carles Mani y Roig, Sophie Taeuber and Vasilii Vatagin betrayed anxieties subliminally festering over degeneration alongside latent hopes of regeneration. Following Darwin's concept of evolution as Janus-faced, the dialectical interplay of evolution and extinction and degeneration and regeneration is explored in modern visual cultures in Australia, America, Britain, France, Germany, Russia, Spain and Switzerland at significant spatio-temporal junctures between 1860 and 1930. By unravelling the "picturing" of the dread of alcoholism, cholera, dysentery, tuberculosis, typhoid and rabies, alongside phobias of animalism, criminality, hysteria, impotency and ecological disaster, each chapter makes an original contribution to this new field of scholarship. By locating these discourses and visual cultures within the "golden age of Neo-Lamarckism", they also reveal how regeneration was pictured as the Janus-face of degeneration able to facilitate evolution through the inheritance of beneficial characteristics in propitious environments. In striking such an uplifting note amidst the dissonant cacophony of catastrophism, this book reveals why the art and science of Transformism proved so appealing in France as elsewhere, and why visual cultures of regeneration became as dominant in the twentieth century as the picturing of degeneration had been in the nineteenth century. It also illuminates the paradoxical inversion that occurred in the twentieth century when devolution became equivalent to evolution for many Modernists. Hence, whilst this book opens with the picturing of indigenous people in Australia and North America as "doomed races" by the first publication of Darwin's *On The Origin of Species*, it closes with the quest by 1930 for a regenerative suntan as

dark as the skin of those indigenous people.
