The Gender Pay Gap and Social Partnership in Europe Hazel Conley, Donata Gottardi, Geraldine Healy, Barbara Mikołajczyk, Marco Peruzzi, 2018-12-06 The gender pay gap (GPG) exists in every European country, but it varies considerably, even in EU member states covered by the same legal principles on pay equality. Part of the variation can be explained by different patterns of social partnership. With current policy pressure to de-centralise collective bargaining and increase the percentage of pay linked to productivity, what role can social partnership play in tackling the GPG? Reporting on the findings of the European Commission funded research project Close the Deal, Fill the Gap, this book uses an interdisciplinary analysis involving legal, economic, and sociological expertise, to explore the role of social partnership in GPG in Italy, Poland and the UK. Selected on the basis of their contrasting profiles in terms of legal regulation, industrial relations, systems of collective bargaining, coverage of collective agreements, and differing rates of the GPG, the in-depth study provides important insights into the main issues underlying the problem of reducing the gender pay gap which have led to guidelines in the negotiation of arrangements on GPG-related issues. Based on a unique comparative, interdisciplinary and action-oriented research project, it will be of great interest to all researchers and advanced students with an interest in women's representation in the workforce and the gender pay gap, as well as practitioners and policy makers in organisations such as trade unions and employers' associations.

**The Natural Real Interest Rate and the Output Gap in the Euro Area** Julien Garnier, Bjørn-Roger Wilhelmsen, 2005

**Europe's Coherence Gap in External Crisis and Conflict Management** Bertelsmann Stiftung, 2020-04-07 External interventions to mitigate crises or end conflicts have rarely succeeded. The EU and its member states, in particular, have repeatedly run up against their limits in the civil wars in Afghanistan, the Congo, Libya, Syria, the Sahel region and Yemen. However, the EU – if not the entire international community – have learned one lesson from their faltering peacebuilding efforts: If they are to have any chance of making a meaningful and lasting difference, they must develop and use comprehensive strategies that combine and coordinate the various tools available to diplomacy, development cooperation and security. The 29 reports presented in this book – one for each EU member state as well as one on the EU as a whole – examine how steep the learning curve has been and, accordingly, how successful these bodies have been at forming new linkages among the various actors involved in external crisis and conflict management as well as within and between their institutions and organisations. While the EU clearly still has a long way to go before it can live up to its rhetoric and become a distinct and effective actor on the foreign policy stage, small and incremental steps in reorganising institutional practice may help in narrowing the gap between words and deeds. This volume provides examples of how the EU and its member states have found new organisational structures and procedures – specifically at the headquarters level – to better organise the necessary combination and coordination of the many tools available for crisis and conflict management. These ways are then juxtaposed in a 'big picture' chapter, which also identifies best practices for successful WGA implementation.

*How Informative Are Real Time Output Gap Estimates in Europe?* Mr. Alvar Kangur, Koralai Kirabaeva, Jean-Marc Natal, Simon Voigts, 2019-09-20 We study the properties of the IMF-WEO estimates of real-time output gaps for countries in the euro area as well as the determinants of their revisions over 1994-2017. The analysis shows that staff typically saw economies as operating below their potential. In real time, output gaps tend to have large and negative averages that are largely revised away in later vintages. Most of the mis-measurement in real time can be explained by the difficulty in predicting recessions and by overestimation of the economy's potential capacity. We also find, in line with earlier literature, that real-time output gaps are not useful for predicting inflation. In addition, countries where slack (and potential growth) is overestimated to a larger extent primary fiscal balances tend to be lower and public debt ratios are higher and increase faster than projected. Previous research suggests that national authorities' real-time output gaps suffer from a similar bias. To the extent these estimates play a role in calibrating fiscal policy, over-optimism about long-term growth could contribute to excessive deficits and debt buildup.

**Progress Towards External Adjustment in the Euro Area Periphery and the Baltics** Mr. Joong S Kang, Mr. Jay C Shambaugh, 2014-07-22 The euro area periphery countries and the Baltic countries, which had large current account deficits in the run-up to the crisis, needed adjustment of relative prices to achieve both internal and external balances. Thus far, tangible progress has been made through lower wages and/or higher productivity relative to trading partners ("internal devaluation"), which contributed to narrowing current account deficits and shifting output towards the tradables sector. While some early adjusters cut wages more rapidly followed by productivity improvement, others have only slowly improved productivity largely through labor shedding. This adjustment for most countries has come along with a substantial recession as the unit labor cost improvement has largely come from falling employment and much of the current account improvement from import compression. Going forward, these countries still need to generate growing tradables sector employment and to continue adjustment to prevent imbalances from returning as output gaps close.

*Monetary and Fiscal Policies in the Euro Area* Michael Carlberg, 2006-03-14 This book studies the interactions between monetary and fiscal policies in the euro area. It carefully discusses the process of policy competition and the structure of policy cooperation. As to policy competition, the focus is on competition between the European central bank, the American central bank, the German government, and the French government. As to policy cooperation, the focus is on the same institutions. These are higher-dimensional issues. The policy targets are price stability and full employment. The policy makers follow co-ordinated or gradualist strategies. The policy decisions are taken sequentially or simultaneously. Monetary and fiscal policies have spillover effects. Special features of this book are numerical simulations of policy competition and numerical solutions to policy cooperation. The present book is part of a larger research project on European Monetary Union, see the references at the back of the book. Some parts of this project were presented at the World Congress of the International Economic Association. Other parts were presented at the International Conference on Macroeconomic Analysis, at the International Institute of Public Finance, at the Macro Study Group of the German Economic Association, at the Annual Meeting of the Austrian Economic Association, at the Gottingen Workshop on International Economics, at the Halle Workshop on Monetary Economics, at the Research Seminar on Macroeconomics in Freiburg, and at the Passau Workshop on International Economics.

Education and Training in Europe Giorgio Brunello, Pietro Garibaldi, Etienne Wasmer, 2007-05-17 While Europe is certainly one of the richest and most educated areas of the world, some of the challenges faced by the old continent are staggering: low economic growth, structural difficulties in the labour market, and increasing international competition. Politicians and policymakers may advocate different means of overcoming the potential economic decline of Europe, but most agree that Europe needs to strengthen human capital, its ultimate competitive advantage in the world economy. This book looks at the accumulation of human capital from two perspectives, first through formal education and then professional training. It provides a useful summary of the key characteristics of education and training in Europe and also asks key questions about the fundamental problems with the current educational and training systems. More importantly, the book goes

on to discuss which policies are necessary to make existing education and training systems more efficient, while also making higher skills available to a wider range of people.

**Public Finance and National Accounts in the European Context** Joaquim Miranda Sarmiento, 2019-01-31 This book offers an essential guide to Public Finance and National Accounts in the context of the European Union. Since the creation of the Eurozone, fiscal policy has been at the heart of economic (but also political/media) discussions in the EU. From the Stability and Growth Pact (1997) to the more recent Fiscal Treaty, EU and Eurozone, countries have been subject to various fiscal rules. The importance of these rules, and of the subsequent procedures that every Eurozone country has to adhere to, is unquestionable. The book provides the reader with an in-depth understanding of the complex EU rules concerning fiscal policy, breaking down the corresponding legal texts into simple and accessible language. It has a broad interdisciplinary appeal, and scholars and practitioners whose work involves these areas will find it of particular interest.

**The EU and the Economies of the Eastern European Enlargement** Alberto Quadrio Curzio, Marco Fortis, 2008-07-19 The enlargement of the European Union towards the East from May 2004 has generated an increase of about 100 million inhabitants in the EU population, and has especially brought along major challenges and important opportunities both for the new countries and for the old member states. That is the main focus of this volume, which is divided into three sections. The first analyses the effects of the enlargement on the functioning of Community institutions, on the relations with the other Eastern European countries, and finally on regional and global economic dynamics; the second section analyses in detail the role of the monetary politics of the European Central Bank and the activities of the European Bank for Reconstruction and Development; and the third deals with the importance of the entrepreneurial class in ensuring the success of the transition process of the Eastern European economies.

**The Euro Area and the Financial Crisis** Miroslav Beblavý, David Cobham, L'udovít Ódor, 2011-10-06 The financial crisis of 2007–10 has presented a number of key policy challenges for those concerned with the long-term stability of the euro area. It has shown that price stability as provided by the European Central Bank is not enough to guarantee financial stability, and exposed fault lines in governance and deficiencies in the architecture of the financial supervisory and regulatory framework. This book addresses these and other issues, including why the crisis affected some countries more than others, whether the euro is still attractive for new EU states, and what policy changes and structural reforms, both macro and micro, should be undertaken to ensure its future viability. Written by a team of leading academic and central bank economists, the book also includes chapters on the cross-country incidence of the crisis, the Irish crisis and ECB monetary policy during the crisis, and studies on Spain, the Baltics, Slovakia and Slovenia.

**Narrowing the Achievement Gap in a (Re) Segregated Urban School District** Vivian W. Ikpa, C. Kent McGuire, 2009-11-01 The interplay between sociopolitical forces and economic agendas becomes apparent when one examines the June 28, 2007 United States Supreme Court Decision, *Parents Involved In Community Schools v. Seattle School District*. In a reversal of the 1954 *Brown* Decision, the United States Supreme Court ruled that public schools could not use race as a factor when assigning children to public schools. Given demographic shifts, globalization, economic instability, and ideological shifts, the reversal was expected. However, it is essential that policymakers, educators, and other stakeholders consider the impact of attending segregated schools on the achievement gap that continues to exist between minority groups and European Americans attending resegregated neighborhood schools. This book will focus on the test score gaps between African American and European American students. The achievement gaps between these two groups will be analyzed will be presented and elaborated. Additionally, the authors will analyze how changes in school characteristics such as: racial composition; school composition; school expenditures, and socio economic level of neighborhoods affect achievement gap trends in the Norfolk School District. An examination of the achievement gap trends in an urban school district will serve to better inform public policy and school reform efforts. The specific goals of this book are to describe the achievement gap between minority African-American students and European-American students in the Norfolk school district and to present strategies utilized by urban districts to narrow the gap. One unique feature of this book is that it provides a data-driven research-based analysis of the achievement gap between minority and European-American students.

**The Cambridge Handbook of European Monetary, Economic and Financial Integration** Dariusz Adamski, Fabian Amtenbrink, Jakob de Haan, 2023-10-12 Written by experts in the field, this volume offers an in-depth and forward-looking legal, economic, and political science analysis of the rationale, main features, as well as the shortcomings of European economic, monetary, and financial integration. It is primarily intended for an academic audience and policymakers.

**Money, Banking and Financial Markets in Central and Eastern Europe** R. Matousek, 2010-11-03 This book provides a deep insight into the market changes and policy challenges that transition economies have undergone in the last twenty years. It not only comments on and evaluates the development of financial markets in transition economies, but also highlights the key obstacles to full integration of financial markets into the EU market.

**West European Housing Systems in a Comparative Perspective** H. van der Heijden, Hermanus Heijden, 2013-01-21 *West European Housing Systems in a Comparative Perspective* gives an overview of the results of almost 20 years of international comparative housing research, carried out by the author and his colleagues at OTB Research Institute for the Built Environment. The articles give evidence of the transition from descriptive analysis to theoretical exploration and the growing relevance of methodology during these years. The results provide deeper insight into comparative research methodologies and the viability of existing theories as a framework for analysing differences and similarities in the development of housing systems in West European countries. One of the key issues is the practicability of this framework in future policy making. Especially Kemeny's theory on rental markets appears to offer a valuable framework to evaluate policy strategies. Therefore the book is not only relevant to academics but also to policy-makers.

**Knowledge Flows, Technological Change and Regional Growth in the European Union** Małgorzata Runiewicz-Wardyn, 2013-06-14 The book provides conceptual and empirical insights into the complex relationship between knowledge flows and regional growth in the EU. The author critically scrutinizes and enhances the RIS (Regional Innovation System) approach, discussing innovation as a technological, institutional and evolutionary process. Moreover, she advances the ongoing discourse on the role of space and technological proximity in the process of innovation and technological externalities. The book closes with an investigation of the role of technological change and knowledge spillovers in the dynamic growth and “catching-up” of EU regions.

**The Limits of Legal Reasoning and the European Court of Justice** Gerard Conway, 2012-01-12 The European Court of Justice is widely acknowledged to have played a fundamental role in developing the constitutional law of the EU, having been the first to establish such key doctrines as direct effect, supremacy and parallelism in external relations. Traditionally, EU scholarship has praised the role of the ECJ, with more critical perspectives being given little voice in mainstream EU studies. From the standpoint of legal reasoning, Gerard Conway offers the first sustained

critical assessment of how the ECJ engages in its function and offers a new argument as to how it should engage in legal reasoning. He also explains how different approaches to legal reasoning can fundamentally change the outcome of case law and how the constitutional values of the EU justify a different approach to the dominant method of the ECJ.
