**What’s Mine Is Yours: How Collaborative Consumption is Changing the Way We Live** Rachel Botsman,Roo Rogers,2011-02-10 In the 20th century humanity consumed products faster than ever, but this way of living is no longer sustainable. This new and important book shows how technological advances are driving forms of ‘collaborative consumption’ which will change forever the ways in which we interact both with businesses and with each other.

**The Zero Marginal Cost Society** Jeremy Rifkin,2014-04-01 In *The Zero Marginal Cost Society*, New York Times bestselling author Jeremy Rifkin describes how the emerging Internet of Things is speeding us to an era of nearly free goods and services, precipitating the meteoric rise of a global Collaborative Commons and the eclipse of capitalism. Rifkin uncovers a paradox at the heart of capitalism that has propelled it to greatness but is now taking it to its death—the inherent entrepreneurial dynamism of competitive markets that drives productivity up and marginal costs down, enabling businesses to reduce the price of their goods and services in order to win over consumers and market share. (Marginal cost is the cost of producing additional units of a good or service, if fixed costs are not counted.) While economists have always welcomed a reduction in marginal cost, they never anticipated the possibility of a technological revolution that might bring marginal costs to near zero, making goods and services priceless, nearly free, and abundant, and no longer subject to market forces. Now, a formidable new technology infrastructure—the Internet of things (IoT)—is emerging with the potential of pushing large segments of economic life to near zero marginal cost in the years ahead. Rifkin describes how the Communication Internet is converging with a nascent Energy Internet and Logistics Internet to create a new technology platform that connects everything and everyone. Billions of sensors are being attached to natural resources, production lines, the electricity grid, logistics networks, recycling flows, and implanted in homes, offices, stores, vehicles, and even human beings, feeding Big Data into an IoT global neural network. Prosumers can connect to the network and use Big Data, analytics, and algorithms to accelerate efficiency, dramatically increase productivity, and lower the marginal cost of producing and sharing a wide range of products and services to near zero, just like they now do with information goods. The plummeting of marginal costs is spawning a hybrid economy—part capitalist market and part Collaborative Commons—with far reaching implications for society, according to Rifkin. Hundreds of millions of people are already transferring parts of their economic lives to the global Collaborative Commons. Prosumers are plugging into the fledgling IoT and making and sharing their own information, entertainment, green energy, and 3D-printed products at near zero marginal cost. They are also sharing cars, homes, clothes and other items via social media sites, rentals, redistribution clubs, and cooperatives at low or near zero marginal cost. Students are enrolling in free massive open online courses (MOOCs) that operate at near zero marginal cost. Social entrepreneurs are even bypassing the banking establishment and using crowdfunding to finance startup businesses as well as creating alternative currencies in the fledgling sharing economy. In this new world, social capital is as important as financial capital, access trumps ownership, sustainability supersedes consumerism, cooperation ousts competition, and exchange value in the capitalist marketplace is increasingly replaced by sharable value on the Collaborative Commons. Rifkin concludes that capitalism will remain with us, albeit in an increasingly streamlined role, primarily as an aggregator of network services and solutions, allowing it to flourish as a powerful niche player in the coming era. We are, however, says Rifkin, entering a world beyond markets where we are learning how to live together in an increasingly interdependent global Collaborative Commons.

**Land Pollution** Bold Kids,2021-10-21 Land pollution comes from natural or man-made causes. When land pollution occurs, it can have serious implications for the food chain, plants, and animals. If land pollution includes gas or chemicals like hydrochloric acid or chlorination byproducts, it can also affect the ozone layer, which can cause global warming if too much goes into the atmosphere. This is one reason why parents should make sure to get their kids informed about the causes of Land Pollution and what they can do to prevent it in their own homes.

**Jubilee and The Legend of The Donkey's Cross** Holli Worthington,2020-01-02 Many donkeys are born with a dark marking down their back and across their shoulders that makes the shape of a cross. Legend has it that the donkey that carried Jesus on Palm Sunday was the first donkey to receive this marking when Jesus died on the cross. This is a story of how that might have happened to a little donkey named Jubilee. Jubilee is changed forever when Jesus chooses her to carry him to Jerusalem on Palm Sunday and as she follows him around the last week of his life here on earth. Most important in this story is the true story of Jesus and the good news of Resurrection Sunday!
