Ritual, Media, and Conflict Ronald L. Grimes, Ute Husken, Udo Simon, Eric Venbrux, 2011-03-23 Rituals can provoke or escalate conflict, but they can also mediate it and although conflict is a normal aspect of human life, mass media technologies are changing the dynamics of conflict and shaping strategies for deploying rituals. This collection of essays emerged from a two-year project based on collaboration between the Faculty of Religious Studies at Radboud University Nijmegen in the Netherlands and the Ritual Dynamics Collaborative Research Center at the University of Heidelberg in Germany. An interdisciplinary team of twenty-four scholars locates, describes, and explores cases in which media-driven rituals or ritually saturated media instigate, disseminate, or escalate conflict. Each multi-authored chapter is built around global and local examples of ritualized, mediatized conflict. The book's central question is: When ritual and media interact (either by the mediatizing of ritual or by the ritualizing of media), how do the patterns of conflict change?

Negotiating Rites Ute Hüsken, Frank Neubert, 2012 Ritual has been long viewed as an indisputable part of tradition with the aim of creating harmony and enabling a tradition's survival. The authors in this collection argue, however, that this view can be seriously challenged and that ritual's embeddedness in negotiation processes is one of its central features.

*Routledge Handbook of Highland Asia* Jelle J.P. Wouters, Michael T. Heneise, 2022-08-09 The Routledge Handbook of Highland Asia is the first comprehensive and critical overview of the ethnographic and anthropological work in Highland Asia over the past half a century. Opening up a grand new space for critical engagement, the handbook presents Highland Asia as a world-region that cuts across the traditional divides inherited from colonial and Cold War area divisions - the Indian Subcontinent/South Asia, Southeast Asia, China/East Asia, and Central Asia. Thirty-two chapters assess the history of research, identify ethnographic trends, and evaluate a range of analytical themes that developed in particular settings of Highland Asia. They cover varied landscapes and communities, from Kyrgyzstan to India, from Bhutan to Vietnam and bring local voices and narratives relating trade and tribute, ritual and resistance, pilgrimage and prophecy, modernity and marginalization, capital and cosmos to the fore. The handbook shows that for millennia, Highland Asians have connected far-flung regions through

movements of peoples, goods and ideas, and at all times have been the enactors, repositories, and mediators of world-historical processes. Taken together, the contributors and chapters subvert dominant lowland narratives by privileging primarily highland vantages that reveal Highland Asia as an ecumene and prism that refracts and generates global history, social theory, and human imagination. In the currently unfolding Asian Century, this compels us to reorient and re-envision Highland Asia, in ethnography, in theory, and in the connections between this world-region, made of hills, highlands and mountains, and a planetary context. The handbook reveals both regional commonalities and diversities, generalities and specificities, and a broad orientation to key themes in the region. An indispensable reference work, this handbook fills a significant gap in the literature and will be of interest to academics, researchers and students interested in Highland Asia, Zomia Studies, Anthropology, Comparative Politics, Conceptual History and Sociology, Southeast Asian Studies, Central Asian Studies and South Asian Studies as well as Asian Studies in general.

**Food Politics** Queenbala Marak, 2014-04-11 Food and eating has always been endowed with meanings. It is one of the most visible and important symbols of identity and difference, uniting the members of a community and segregating them from other communities. This inclusion and exclusion can be observed not only in what they eat or what they are known to eat, but also how they eat, how they prepare and serve their food, and what happens after food is taken. The study of food politics and questions of identity and difference can, therefore, be a means of understanding the underlying social relations in any culture and its quiescent philosophy. This ethnographic work discusses the politics inherent in food among the Garos of Assam (India) and Bangladesh. In these two areas, they live as a minority, and with and in the peripheries of a dominant non-Garo culture. Thus, this book examines the ways in which Garos conceptualize themselves and the 'other' world through the microcosm of food – the most important need of all. It discusses, among other topics, how the concepts of Garo food versus non-Garo food find fruition in social reality and collective memory, as an identity marker.

*The Sino-Tibetan Languages* Graham Thurgood, Randy J. LaPolla, 2016-12-08 There are more native speakers of Sino-Tibetan languages than of any other language family in the world. Our records of these languages are among the oldest for any human language, and the amount of active research on them has multiplied in the last few decades. Now in its second edition and fully updated to include new research, *The Sino-Tibetan Languages* includes overview articles on individual languages, with an emphasis on the less commonly described languages, as well as

descriptions and comments on the subgroups in which they occur. There are overviews of the whole family on genetic classification and language contact, syntax and morphology, and also on word order typology. There are also more detailed overview articles on the phonology, morphosyntax, and writing system of just the Sinitic side of the family. Supplementing these overviews are articles on Shanghainese, Cantonese and Mandarin dialects. Tibeto-Burman is reviewed by genetic or geographical sub-group, with overview articles on some of the major groups and areas, and there are also detailed descriptions of 41 individual Tibeto-Burman languages, written by world experts in the field. Designed for students and researchers of Asian languages, The Sino-Tibetan Languages is a detailed overview of the field. This book is invaluable to language students, experts requiring concise, but thorough, information on related languages, and researchers working in historical, typological and comparative linguistics.
