Gas Pedal to Back-Pedal Keith Mexsom,2021-03 Gas Pedal to Back-Pedal - The Second Century of Auckland Transport - This is an historical narrative describing real persons and factual events that have resulted in the Auckland of today. There are many possible readers who might be interested in aspects of: Transport - the books contain a lot of history about trams, suburban rail, buses, ferries, and of course motor vehicles, and the legislation that has governed their operation. Politics - the books contain a good deal of information about the political and funding conflicts that have existed between central government and local government; between local government entities and each other; between public and private interests. This book illustrates how these conflicts often unduly influenced the decisions that were made and resulted in today's road congestion. City Planning - the books contain information about the successes and failures of central government and city planners and include descriptions of the many disconnects between transport and land use. Suburban Rail - the City Rail Link is to be completed soon - the books provide a complete narrative of why it took so long to fund and start a project first proposed as an essential undertaking more than a century ago. The number of studies and reports that were undertaken and ignored in that time is astounding. Reference Value - this book and its predecessor, Waka Paddle to Gas Pedal, are extensively and accurately referenced and indexed. The content is a comprehensive account - too comprehensive in parts - hence their length. The range of topics covered provides interest for all readers determined to learn how the workings of central and local governments have influenced an Aucklanders' present environment and circumstances - whether it be the congested roads, the toxic atmosphere, or even the housing shortage. The content of this book is supported by my 12 years of study and research. This Part Two of a planned trilogy builds on the founding and development of Auckland's transport systems from 1940 to the present - describing how the motor vehicle evolved from a novelty and a nuisance of the 1920s to an indispensable utility that virtually replaced the city's public transport services with chronic road congestion. This is a story of countless, costly transport studies and reports and why most of the advice generated was not acted upon. It is a tale of how the parochialism and fragmented vision of city leaders played into the hands of begrudging, purse-string-holding Governments of the day; of Governments all too willing to favour the laissez-faire principles of those tyre-and-tarmac entrepreneurs collectively known as the 'Road Gang' - those descendants of Auckland's 'limited circle' and other 'gentlemen of fortune' who shaped the city's early growth and who continue to dominate its future by way of land speculation and financial control. It has been a long, overcrowded road since the concept and ambition of an Auckland underground railway was first proposed by Royal Engineers in 1860. With the belated start of the 'City Rail Link', a happy ending is anticipated.

Waka Paddle to Gas Pedal 2nd Edition Keith Mexsom,2019-06-10 Waka Paddle to Gas Pedal - The First Century of Auckland Transport - describes the evolution of Auckland's transport systems in terms of the aspirations and activities of various businessmen, planners, engineers, and politicians and the ensuing success and failure of their enterprises between 1840 and 1940.

Waka Paddle to Gas Pedal Keith Mexsom,2020-01-15 Waka Paddle to Gas Pedal - The First Century of Auckland Transport - describes the evolution of Auckland's transport systems in terms of the aspirations and activities of various businessmen, planners, engineers, and politicians and the ensuing success and failure of their enterprises between 1840 and 1940. The story tells of how national and local parochialism and the propensity for many Aucklanders to reap a harvest of capital gains by speculating in land have been responsible for the delay and failure of many transport initiatives. During the development of their various transport systems, there has been no lack of ambition expressed by Aucklanders struggling with the challenges of travelling and trading across their isthmus and beyond. Unfortunately for the present-day commuter and trader, and for reasons as diverse as the thousands of vehicles that now choke the City's roads, precious few ambitions were realised. This is the story of those that succeeded, but mostly of those that failed, and how. The story provides some explanation to those thousands of motorists who now crawl, seemingly forever, along Auckland's roads; those with plenty of time to wonder, 'How did I get here?'

Accelerated Faith Charles Manuel,2013-11-19 The accelerator pedal is the instrument that controls the speed of the car. The more you press down on the pedal, the faster you will go. The faster you go, the sooner you will reach your destination. We compress time every time we get into our car and press the accelerator pedal. Think of the accelerator pedal in your car as faith, and you are accelerating faith so you can experience manifested, unseen expectations now. Accelerated faith moves the vehicle of purpose to the place of destiny at the speed of God. Do you feel like your faith life is in neutral? Are you ready to hit the gas and experience faith like never before? Author Charles Manuel provides the biblical tools for you to jump in the fast lane of faith, rather than watching others fly by. By explaining what faith is, how you can obtain faith, how faith works, and what enemies to faith to watch out for, readers will be encouraged in their spiritual journeys and inspired to develop a closer walk with the Lord. Flip the switch and kick your faith into overdrive with Accelerated Faith.

Autonomous Agricultural Vehicles Ali Roshanianfard,Sina Faizollahzadeh Ardabili,2023-07-19 This comprehensive guide to agricultural robots is the ideal companion for any student or professional engineer looking to understand and develop autonomous vehicles to use on the modern farm. With world hunger one of the modern era's most pressing issues, autonomous agricultural vehicles are a key tool in tackling this problem. Smart farming can increase total factory productivity through designing autonomous vehicles based on specific needs, in addition to implementing smart systems into day-to-day operations. This book provides step-by-step guidance, from the theory behind autonomous vehicles, through to the design process and manufacture. Detailing all components of an autonomous agricultural vehicle, from sensors, controlling algorithms, communication and controlling units, the book covers topics such as artificial intelligence and machine learning. It also includes case studies, and a detailed guide to international policymaking in recent years. Suitable for students and professionals alike, this book will be a key companion to those interested in agricultural engineering, autonomous vehicles, robotics, and mechatronics, in mechanical, automotive, and electrical engineering.

The goal is to bring together scholars working on the latest techniques, standards, and emerging deployment on this central field of living at the age of wireless communications, smart vehicles, and human-machine-assisted safer and comfortable driving. Topics covered in this book include: improved vehicle safety; safe driver assistance systems; smart vehicles; wireless LAN-based vehicular location information processing; EEG emotion recognition systems; and new methods for predicting driving actions using driving signals. In-Vehicle Corpus and Signal Processing for Driver Behavior is appropriate for researchers, engineers, and professionals working in signal processing technologies, next generation vehicle design, and networks for mobile platforms.

When Chores Were Done Jerry Apps,2006 The Midwest in the 1930s, 1940s, and 1950s was a special place-a place where parents and children worked side by side to eke out a living from the land, and neighbors stuck by each other through good times and bad. In this affectionate, insightful collection of stories, Jerry Apps takes us to that world. He relives the toughness of farm life-plowing the soil with horses, milking cows by hand, putting in long days with heavy, dangerous machinery. He shows us the lighter side too, as he peddles his father's massive rutabaga harvest and gets to know the neighbor boys-and their personal dictionary of cuss words. We meet Frank, Pinky, and Harry, three farmers whose love of music could transform an entire community; Morty, the odd loner whom only a few wild animals could understand; and Fanny, the extraordinary collie whose role on the farm was as important as that of any human being. Withing each story we see just how warm, loving, and supremely educational growing up on a farm could be, for it is here that a young child learns not only how to take the head off a chicken and drive a tractor like a grown-up, but to deal with illness, disability, and death. Resonating with poignancy and humor, When Chores Were Done contains stories you'll want to read over and over again. Jerry Apps is a master storyteller who writes through the eyes of a child and with the wisdom of a man. Through the tales are personal, their lessons are universal.

Dragging and Driving Tom MacPherson,2019-06-28 Do you know these special words used by the dragging and driving experts? DASH-POT: device on some stock cars that keeps the throttle from closing fast and stalling engine when foot is liften suddenly off gas pedal. JOHNSON ROD: there is no such rod. When you can't figure out what is wrong with your engine, you blame it on the Johnson rod. SQUIRREL: the type who guns his motor and burns his tires. VELOCITY STACKS: air funnels on carburetors which eliminate cleaners.
