Calculators at Work in Daily Living Susan Brendel,2001 Enhance your students' independent living skills and help them build calculator proficiency. With Calculators at Work in Daily Living, your students will get first-hand experience in the ways in which calculator use can improve efficiency and make math-related tasks in the home, around town, and on the job easier and faster. In addition, they will develop important math skills and see the ways in which math is used in daily living.

Gas Age-record ,1933

Being the Change Peter Kalmus,2017-08-01 "A plethora of insights about nature and ourselves, revealed by one man's journey as he comes to terms with human exploitation of our planet." –Dr. James Hansen, climate scientist and former director of NASA's Goddard Institute for Space Studies Life on one-tenth the fossil fuels turns out to be awesome. We all want to be happy. Yet as we consume ever more in a frantic bid for happiness, global warming worsens. Alarmed by drastic changes now occurring in the Earth's climate systems, Peter Kalmus, a climate scientist and suburban father of two, embarked on a journey to change his life and the world. He began by bicycling, growing food, meditating, and making other simple, fulfilling changes. Ultimately, he slashed his climate impact to under a tenth of the US average and became happier in the process. Being the Change explores the connections between our individual daily actions and our collective predicament. It merges science, spirituality, and practical action to develop a satisfying and appropriate response to global warming. Part one exposes our interconnected predicament: overpopulation, global warming, industrial agriculture, growth-addicted economics, a sold-out political system, and a mindset of separation from nature. It also includes a readable but authoritative overview of climate science. Part two offers a response at once obvious and unprecedented: mindfully opting out of this broken system and aligning our daily lives with the biosphere. The core message is deeply optimistic: living without fossil fuels is not only possible, it can be better. "In this timely and provocative book, Peter Kalmus points out that changing the world has to start with changing our own lives. It's a crucial message that needs to be heard." –John Michael Greer, author of After Progress and The Retro Future

Ai '92 - Proceedings Of The 5th Australian Joint Conference On Artificial Intelligence A Adams,L Sterling,1992-10-09 The papers in this volume deal with academic research topics as well as practical applications in AI. Special emphasis is given to computer vision, machine learning, neural networks mixed with theory of logic and reasoning, and practical applications of expert systems in industry and decision support.

Consumer Policy Toolkit OECD,2010-07-09 This book examines how markets have evolved and provides insights for improved consumer policy making. It explores, for the first time, how what we have learned through the study of behavioural economics is changing the way policy makers are addressing problems.
