Fossil-Fuel Faulkner Jay Watson, 2023-02-03 Fossil-Fuel Faulkner is the first book-length study of a single writer in the emerging field of the energy humanities. As we try to imagine our way beyond a deeply problematic fossil energy regime that depletes and degrades the planet and sharpens the gap between Global North and Global South and move toward a more just and sustainable energy future, there is much to learn from how previous generations imagined the modern transition into a hydrocarbon-fueled world from the solar- and muscle-powered order that preceded it, and from how they imagined the consequences of that transition, including the new cultural forms it elicited and the new social problems it created. Jay Watson turns to the life and writings of William Faulkner, creator of one of the richest imaginative landscapes in American literary history, for new insights into the deep-reaching connections linking the extraction, production, and use of energy resources in his native US South to its histories of slavery and Jim Crow, its ecologies of disruption and despoilation, the logic of its cultural practices, and the nuances of literary form. Surveying the author's personal and imaginative engagements with

coal and oil, with modern automobility and the road narrative, and with the profligate energies of the sun and the human animal, Fossil-Fuel Faulkner explores nearly all of Faulkner's novels and over a dozen of his short stories, and reveals the author to be one of petromodernity's keenest chroniclers and critics.

*John Carter: Soldier, Business Tycoon, Politician* Harry Hurst, 2017-12-18 I do solemnly swear to support and defend the United States against all enemies both foreign and domestic . . . The book is the story of one man, John Carter, who took the above oath when he was seventeen and lived by it his entire life. It shows his rise from private to four-star general in the United States Army. It shows his ability to adapt to changing times and to form a multimillion-dollar corporation to continue to enforce the oath. The book shows John as a man devoted to his country, family, and friends and how he made them rich beyond all imagination. It also shows John as a caring individual ready to accept the challenges and become a political leader for the community he loved.

*For the Love of Flying* Danielle Metcalfe-Chenail, 2009 This is the first book to tell the story of one of Canada's most innovative aviation companies, Laurentian Air Services, and thus fills an important gap in Canadian aviation history. Drawing on extensive research and interviews with Laurentian's presidents, pilots and ground crew, author Danielle Metcalfe-Chenail explores the company's 60-year history from its founding in 1936 in Ottawa with small biplanes through to the 1990s when it was operating scheduled flights with twin-engine Beech 99s and Beech King Air 200s. During those 60

years, Laurentian was at the forefront of air tourism in the Ottawa region and the Laurentian Mountains of Quebec as well as fly-in hunting and fishing in Canada's north. It also pioneered the use of the Grumman G-21 Goose and de Havilland Beaver commercially and provided vital air support to survey and development work for such massive undertakings as the Churchill Falls and James Bay hydroelectric projects. This book brings Laurentian's history to life through first-hand stories and an exciting collection of colour and black and white photographs, the majority of which have not previously been published. This is a long-overdue book that appeals to armchair bush flyers and aviation historians alike.

**Low-Cost Carriers in Emerging Countries** John Bowen,2019-02-13

Low-Cost Airline Carriers in Emerging Countries traces the development of low-cost carriers (LCCs) in Asia, Latin America, the Middle East and Africa, examining airlines that have become significant players in their home markets but little known at a global scale. The book maps the geography of the LCC phenomenon, explaining the starkly varying success of budget airlines, and assessing their current social, economic and environmental impacts. The book concludes with insights into the future potential of the LCC phenomenon along with its global ramifications. Beginning with Southwest Airlines in the 1970s, low-cost carriers (LCCs) have democratized air travel around the world, fostering huge increases in airline traffic and transforming the airline industry. At the same time however, the ascent of these budget airlines has exacerbated aviation-related problems such as aircraft noise, airport congestion, greenhouse gas emissions and more. LCCs have been extensively studied in the US and Europe but not in emerging regions of the globe. Yet the

impact of such airlines is greatest in low- and middle-income economies where only a small fraction of the population has ever flown, and where competition from alternative modes (road, rail) is weak. Examines the evolution of low cost carriers around the world, how established airlines react to their entry and the wide-ranging societal implications for individual countries and the world Places emerging countries' LCCs into a global context, comparing them to their US and European counterparts Offers original quantitative analysis of LCC networks at several spatial scales (global, regional, national, airport vs. airport) using global schedule data from OAG Includes professionally produced maps of representative airlines networks

**The Mexican Expedition 1916-1917** Julie Irene Prieto, 2016-09-05  
On 9 March 1916, the forces of Doroteo Arango, better known as Francisco Pancho Villa, attacked the small border town of Columbus, New Mexico. In response to the raid, President Woodrow Wilson authorized Brig. Gen. John J. Black Jack Pershing to organize an expedition into Chihuahua, Mexico, in order to kill or capture Villa and those responsible for the assault. By 15 March, 4,800 Regular Army soldiers had assembled in Columbus and Camp Furlong, the Army garrison just outside of the town's center. These men fanned out into the Mexican countryside on horseback in small, highly mobile cavalry detachments-sometimes led by local guides or by the Army's Apache scouts-that could cover large swaths of sparsely populated and rough terrain. Cavalrymen employed skills and strategies developed in the preceding decades on frontier campaigns in the West and in

warfare against irregular, guerrilla forces in the Philippines. The Mexican Expedition, popularly called the Punitive Expedition, was to be one of the last operations to employ these methods of warfare and one of the first to rely extensively on trucks. It also provided a testing ground for another new technology-the airplane. During the eleven months that Pershing's expedition was in Chihuahua, U.S. troops failed to kill, capture, or even spot Pancho Villa, but the impact of the expedition reached far beyond the deserts of northern Mexico. The approximately 10,000 regulars that served in the Punitive Expedition gained experience in large, multiunit field operations at a time when small-unit actions were the norm. The Mexican Expedition, 1916-1917, by Julie Irene Prieto, examines the operation, led by General John Pershing, to search for, capture, and destroy Francisco Pancho Villa and his revolutionary army in northern Mexico in the year prior to the United States' entry into World War I. This campaign marked one of the final times cavalry was used on a large scale, and it was one of the first to use trucks and airplanes in the field. While Pershing's troops failed to capture Villa, both Regular Army troops and National Guardsmen stationed on the border gained valuable experience in these new technologies.

*The Inventor and the Tycoon* Edward Ball, 2013-11-05 A Chicago Tribune Noteworthy Book of the Year Nearly 140 years ago, in frontier California, photographer Eadweard Muybridge captured time with his camera and played it back on a flickering screen, inventing the breakthrough technology of moving pictures. Yet the visionary inventor Muybridge was also a murderer who killed coolly and meticulously, and his trial became a national sensation. Despite Muybridge's crime, the artist's patron, railroad tycoon Leland Stanford, founder of Stanford University, hired the photographer to answer the question of whether the four hooves of a running horse ever left the ground all at once—and together these two unlikely men launched the age of visual media. Written with style and passion by National Book Award-winner Edward Ball, this riveting true-crime tale of the partnership between the murderer who invented the movies and the robber baron who built the railroads puts on display the virtues and vices of the great American West.

what to expect

during rehearsals  
you will be  
performing a musical  
a type of play that  
tells a story through  
music choreography  
and dialogue because  
there are so many  
parts of a musical  
most shows have  
more than one  
author the composer  
writes the music and  
usually works
