Medical Research Council annual report and accounts 2010/11

Medical Research Council, 2012-04-16 The Medical Research Council is a publicly-funded organisation dedicated to improving human health. It supports research across the entire spectrum of medical sciences, in universities and hospitals, in its own units and institutes in the UK and in Africa. The MRC works closely with key stakeholders and research funders - UK health departments, other departments and agencies, the six sister research councils, industry, and the academic and charity sectors - giving a high priority to research that is likely to make a real difference to clinical practice and the health of the population. This annual report describes progress in 2008-09, highlights key awards and partnerships, and outlines plans for the future.

Executive Finance and Strategy Ralph Tiffin, 2014-09-03 Many strategies are explained as actions that will achieve the desired goals or visions of the company, but in order to predict the success of your strategy it is vital to gain an understanding of how it will impact on the financial statement. Executive Finance and Strategy works on the premise that financial models can clearly demonstrate where a particular strategy might lead, enabling you to evaluate past accounts and statements in order to respond to recent company history. It also explains how company law and ethics underpin financial statements and clarifies your responsibilities as a senior manager or director. By using finance as a record keeper and predictor of success, it

helps you quantify your strategy to gain support from colleagues and take the right actions to ensure sustainable growth. Online supporting resources for this book include tables and formulas to support financial models within the book.

Rare Earth Elements Volker Zepf,2013-02-14 This thesis deals with Rare Earth Elements (REE), especially with neodymium used in permanent magnets, from a very scientific basis by providing basic research data. Despite the fact that REE are newsworthy and very important elements for a considerable bandwidth of todays' technologies, accompanied by the monopolistic supply-situation and Chinese politics, there are inexplicable data discrepancies about REE which have been recognized frequently but usually have not been addressed accordingly. So this analysis started with the hypothesis that the

four application areas, namely computer hard disk drives (HDD), mobile phones, wind turbines and e-mobility (automotive traction), account for about 80% of the global annual neodymium-demand. The research methodology was a laboratory analysis of the composition of used magnets for HDDs and mobile phones and a literature and official report analysis of wind turbine and automotive neodymium use. The result was amazing and the hypothesis had to be withdrawn as these four areas only account for about 20% of neodymium use. This result raises some questions concerning actual use and thus potential recycling options.

Leading Digital George Westerman, Didier Bonnet, Andrew McAfee, 2014 Leading Digital makes the provocative argument that the next imminent phase of digital technology adoption - driven by the convergence of mobility, analytics, social media, cloud computing, and embedded devices - will make everything that's happened so far look like a prelude. The authors, a trio of highly regarded thought leaders on corporate digital transformation, say changes in the digital realm so far have focused on high tech and media companies - but there's still a whopping 94% of the business economy that needs to change. This book will show them how. George Westerman of MIT, Didier Bonnet of Capgemini Consulting, and Andrew McAfee, also at MIT, say there is opportunity for these businesses to learn from those that have already mastered the digital landscape. Based on a study of more than 400 large, mainstream firms in every industry around the globe, the authors

usefully break down how these organizations have used their own digital transformation to gain strategic, competitive advantage. Readers will learn how these digital leaders have transformed their businesses through smart and rigorous digital investments, and through smart and effective leadership of the change. Leading Digital offers practical, real-life tested frameworks that can be instantly applied. Case studies include Nike, Caesars, Burberry, Asian Paints, Pages Jaunes, Codelco, and more--

The Selfless Constitution Stu Woolman, 2021-07-28 Do you possess 'freedom'- the will to do as you choose-as an individual, as a participant in social affairs or as a citizen in the political realm? Well, no. Not really. At least not as most of us understand a term loaded down with metaphysical baggage. Don't worry. You've got something better: a neurological system capable of carrying out the most complex analytical and computational tasks; membership in innumerable communities that provide you with huge stores of knowledge and wisdom; and a politico-constitutional order that ought to provide the material and the immaterial conditions that will enable you to pursue a life worth valuing. Drop the simplistic folk-psychology of unfettered freedom, whilst holding on to intentionality, and you might be inclined to adopt a set of social practices and political arrangements that enhance the chances that you and your compatriots will flourish. As many recent studies of consciousness reveal our neurological systems are complex feedback mechanisms designed to create myriad for trial and error and (if you

survive) the production of new stores of knowledge. Individuals-comprised of numerous radically heterogeneous, naturally and socially determined selves-are always experimenting, attempting to divine through reflection and action, what 'works' best: even when 'best' means fully embracing who we already are. Choice architects, those persons charged with constructing the environments within which we operate daily, should (if responsible) regularly run experiments that attempt to eliminate biases, and ultimately, deliver norms that nudge us away from negative defaults toward more optimal ends. A constitutional democracy, made up of millions of radically heterogeneous, densely populated individuals, constantly strives to determine what works best for most of its many constituents. Because South Africa's Constitution states (at an extremely high level of generality) only some of the norms that govern our lives, it remains for citizens, representatives and judges to create doctrines and institutions that serve its capaciously framed ends best. After canvassing the relevant literature in neuroscience, empirical philosophy, behavioural psychology, social capital theory, development economics, and emergent experimental governance, this work suggests that manifold experiments in living that fall within the accepted parameters of our shared constitutional norms are likely, over time, to produce more optimal ways of being that can be replicated by other members of our polity. Our reflexive stance toward best practices-a linchpin of this book's take on experimental governance-when inextricably linked to a commitment to

flourishing and to the expansion of individual capabilities, should cause us to alter the content of the fundamental norms that shape our lives and bind us to one another. A political order founded upon experimental constitutionalism and flourishing promises an egalitarian pluralist reformation of South African society. The book spins out its novel thesis against the concrete backdrop of political arrangements and judicial doctrines that have emerged during the first 20 years of our truly vibrant constitutional democracy. Its trenchant analysis of political institutions and constitutional case law shows us how far we have come, and how far we still have to go.

Rising to the Challenge National Research Council, Policy and Global Affairs, Board on Science, Technology, and Economic Policy, Committee on Comparative National Innovation Policies: Best Practice for the 21st Century, 2012-08-06 America's position as the source of much of the world's global innovation has been the foundation of its economic vitality and military power in the post-war. No longer is U.S. pre-eminence assured as a place to turn laboratory discoveries into new commercial products, companies, industries, and high-paying jobs. As the pillars of the U.S. innovation system erode through wavering financial and policy support, the rest of the world is racing to improve its capacity to generate new technologies and products, attract and grow existing industries, and build positions in the high technology industries of tomorrow. Rising to the Challenge: U.S.

Innovation Policy for Global Economy emphasizes the importance of sustaining global leadership in the commercialization of innovation which is vital to America's security, its role as a world power, and the welfare of its people. The second decade of the 21st century is witnessing the rise of a global competition that is based on innovative advantage. To this end, both advanced as well as emerging nations are developing and pursuing policies and programs that are in many cases less constrained by ideological limitations on the role of government and the concept of free market economics. The rapid transformation of the global innovation landscape presents tremendous challenges as well as important opportunities for the United States. This report argues that far more vigorous attention be paid to capturing the outputs of innovation - the commercial products, the industries, and particularly high-quality jobs to restore full employment. America's economic and national security future depends on our succeeding in this endeavor.

Driver Distraction and Inattention John D. Lee, 2017-07-12 It is estimated that, in the United States, around 20 percent of all Police-reported road crashes involve driver distraction as a contributing factor. This figure increases if other forms of inattention are considered. Evidence (reviewed in this volume) suggests that the situation is similar in other countries and that driver distraction and inattention are even more dangerous as contributing factors in crashes than drug and alcohol intoxication. Having a solid evidence-base from which to develop injury countermeasures is a

cornerstone of road-safety management. This book adds to the accumulating evidence-base on driver distraction and inattention. With 24 chapters by 52 authors from more than 10 countries, it provides important new perspectives on the definition and meaning of driver distraction and inattention, the mechanisms that characterize them, the measurement of their effects, strategies for mitigating their effects, and recommendations for further research. The goal of this book is to inspire further research and countermeasure development to prevent and mitigate the potentially adverse effects of driver distraction and driver inattention, and, in doing so, to save lives.

Religion and Human Rights Hans-Georg Ziebertz, Gordan Črpić, 2015-01-13 This book examines the relationship between human rights and religiosity. It discusses whether the impact of religiosity on human rights is liberational or suppressive, and sheds light on the direction in which the relationship between religion and human rights is expected to develop. The questions explored in this volume are: Which are the rights that are currently debated or under pressure? What is the position on human rights that churches and religious communities represent? Are there tensions between churches, religious communities and the state? Which rights are especially relevant for young people and which relate to adolescents life-world experiences? Covering 17 countries, the book describes two separate, yet connected studies. The first study presents research by experts from individual countries describing

the state of human rights and neuralgic points anticipated in individual societies. The other study presents specific findings on the relationship between these two social phenomena from empirical research in a population of high school students. Studying this particular population allows insights into social trends, value systems and attitudes on human rights, as well as an indication of the likely directions of development, and potential room for intervention.

Hemodialysis C. Ronco, M.H. Rosner, 2011-05-24 This book contains notable contributions from the well-known Vicenza course on hemodialysis and miniaturized wearable devices for renal replacement therapy. The main themes covered in this publication include cardio-renal syndromes as well as new technologies in hemodialysis, new dialysis membranes and techniques, the importance of vitamin D receptors in renal and extra-renal physiology, and the control of risk factors such as blood pressure and lipid disorders. Special interest is placed on new models of organization including large dialysis networks and health care economics. Moreover, acute kidney injury and its impact on the subsequent development of chronic kidney disease are discussed together with the use of modern biomarkers. Microfluidics, nanotechnology and miniaturized dialysis devices suitable for wearable ambulatory treatments are also covered in depth. The publication at hand is a

useful tool for consultation by the clinician as well as for those involved in the care of patients with end-stage kidney disease.

Greener Products Al Iannuzzi, 2017-08-03 Written by a renowned sustainability expert, *Greener Products: The Making and Marketing of Sustainable Brands*, Second Edition makes the case for why the people and the planet need products to be made in a different, more sustainable way. The growth of the global middle class, with an additional 3 billion people expected to enter the consumer market by 2030, is putting an unprecedented demand on resources and straining the global supply of raw materials, fossil fuels, food and water. This book provides insights on how to raise the bar on product development and investigates the best practices for making and marketing sustainable brands. Over 40 case studies are analyzed in this book and summarized for the reader to easily see what it is that makes leading companies successful. Analysis on marketing campaigns and greener product development range from leading companies like Apple, Nike, Samsung Electronics, BASF, GE, Johnson & Johnson, Unilever, and Method. New updated content in this second edition includes: New developments like the United Nations Sustainable Development Goals with concepts of biomimicry, circular economy, emerging issues management, and eco-innovation. Novel tools and examples for bringing sustainable products to market. New chapter dedicated to natural capital. Analysis of current green marketing methods and market trends. Best practices for making and marketing sustainable brands. For more

The Art of M&A Strategy: A Guide to Building Your Company's Future through Mergers, Acquisitions, and Divestitures Kenneth Smith, Alexandra Reed Lajoux, 2012-01-05 Seize the competitive advantage with today's most powerful strategic tool—M&A “Given the influence of technology, globalization, and regulatory change, M&A will continue to shape our industries. For most companies, therefore, the consideration of M&A in strategy is now fundamental.” —from the Introduction to Part I The Art of M&A Strategy is exactly what you need to build mergers, acquisitions, and divestitures into your overall business strategy—to make M&A a competitive advantage and avoid landing on the long list of M&A failures. Experts in the field of M&A, Smith and Lajoux demystify this otherwise complex subject by taking you through the types of M&A strategy and the key steps to successful M&A strategy development and implementation. The Art of M&A Strategy is conveniently organized into three sections: Part I presents a range of possible corporate strategy situations and provides the role and rationale for M&A in each, such as building and managing a portfolio, participating in industry consolidation, spurring corporate growth, and using acquisitions to create “real options.” Part II outlines how to determine the role of M&A in your

strategy—taking into consideration industry context, competitive imperatives, and strategy options—and explains how to find and screen partners, decide whether to buy or sell, and engage the board of directors in M&A decisions. Part III covers M&A as a sustained corporate program, particularly in the context of international growth, outlining the most strategic aspects of post-merger integration, describing how to use advisors throughout the process, and examining core competencies required for successful M&A programs. The authors illuminate the purpose and process of applying M&A with real-world success stories involving Cisco, GE, Google, and many other companies that have leveraged M&A for strategic success. Use *The Art of M&A Strategy* to create a powerful strategy position for success in today's changing business environment and to seize and hold competitive advantage.

China's WTO Accession Reassessed Wang Luolin, 2015-02-20 China's accession to the World Trade Organisation in 2001 was a highly significant event both for China and for the wider world. This book argues that, although at the time some people doubted the likely benefits, China's WTO accession has been highly successful. It discusses how China has abided by its commitment to WTO terms and how WTO membership has contributed to China's reform and opening

up; explores how vastly increased co-operative exchange with many countries around the world has been mutually beneficial in a range of fields including trade, science and culture; and shows how China's WTO membership has been a great stimulus both for China's economy and the world economy. The book considers the subject from a number of perspectives, and draws out lessons for future reform and development for China, and for China's relations with the rest of the world, emphasising the need to maintain a win-win approach.

The Russian State and Russian Energy Companies, 1992–2018 Ingerid M. Opdahl, 2020-06-09 The Russian State and Russian Energy Companies analyses the development of relations between the state and five major energy companies, and how this shaped Russia's foreign policy in the post-Soviet region. The book argues that the development of Russia's political economy mattered for foreign policy over the quarter of a century from 1992 to 2018. Energy companies' roles in institutional development enabled them to influence foreign policy formation, and they became available as tools to implement foreign policy. The extent to which it happened for each company varied with their accessibility to the Russian state. Institutional development increased state capacity, in a way that strengthened Russia's political regime. The book shows how the combined power of several companies in the gas, oil, electricity, and nuclear energy industry was a key feature of Russian foreign policy, both in bilateral relationships and in support of Russia's regional position. In this way, Russia's energy resources were converted to regional

influence. The book contributes to our understanding of Russia's political economy and its influence on foreign policy, and of the formation of policy towards post-Soviet states.
