*Digital Revolutions* Symon Hill, 2013-04-19 From Occupy to Uncut, from the Arab Spring to the Slutwalk movement, few questions about recent activism raise as much controversy as the role of the internet. This book suggests that the internet is a tool, not a cause, of social change. It has profoundly affected the way people communicate, making it easier to find the truth, to learn from activists on the other side of the world, to co-ordinate campaigns without hierarchy and to expose governments and corporations to public ridicule. But it has also helped those same governments and corporations to spy on activists, to disrupt campaigns and to create illusions of popular support. Focused on the real-life experiences of activists rather than theory or abstract statistics, *Digital Revolutions* asks how the internet has affected activism, how it has allowed movements to go global more quickly and what the future holds for corporations and social movements that are doing battle online. Symon Hill has campaigned on the arms trade, religious liberty, same-sex marriage, disability rights, and economic injustice. He has worked with the Campaign Against Arms Trade and the Fellowship of Reconciliation, and was a founding member of Christianity Uncut. He has trained hundreds of activists in campaigning skills and media engagement. In February 2012 he was dragged by police from the steps of St. Paul's Cathedral during the eviction of Occupy London Stock Exchange. He is associate director of the Ekklesia think tank and associate tutor at the Woodbrooke Quaker Study Centre. He writes for The Guardian, Morningstar, The Friend, and Third Way. His first book was *The No-Nonsense Guide to Religion*.

*Harvest the Wind* Philip Warburg, 2012-04-17 Winds sweeping through the Great Plains once robbed the Farm

Belt of its future, stripping away overworked topsoil and creating the dreaded Dust Bowl of the 1930s. Today, those winds are bringing new hope to the declining rural communities of the central United States. Nowhere is wind's promise more palpable than in Cloud County, Kansas, where the soaring turbines of the Meridian Way Wind Farm are boosting incomes and bringing green jobs to a community that has, for decades, watched its children drift away. In *Harvest the Wind*, Philip Warburg brings readers face-to-face with the people behind the green economy-powered resurgence in Cloud County and communities like it across the United States. This corner of Kansas is the first stop on an odyssey that introduces readers to farmers, factory workers, biologists, and high-tech entrepreneurs—all players in a transformative industry that is taking hold across America and around the globe. In this illuminating book, Warburg reveals both the remarkable growth of a breakthrough technology and the formidable challenges it faces. He visits epicenters of anti-wind opposition as well as communities that have embraced wind farms as neighbors. He guides readers through an Iowa turbine assembly plant that is struggling to compete in a global marketplace dominated by European and Chinese manufacturers. And he looks at the thousands of miles that wind-generated power will need to travel to reach American consumers. *Harvest the Wind* is an earthly antidote to loftier treatises on global warming and green energy. By showing us how practical solutions are being implemented at the local level, Warburg offers an inspirational look at how we can all pursue a saner and more sustainable energy future—while at the same time investing in the nation's infrastructure and jumpstarting its economy.
