An ABE's Logbook Stephen Phillips,2021-06-21 The book An ABE's Logbook by author Stephen D. Phillips is a true story of accounts taken from his childhood and the written entries from his personal journals he kept while he served in the United States Navy from 1985 to 2005. The story begins in his childhood as he attended junior high school at Rosemont Middle School in Fort Worth, Texas, attending there from the sixth to eighth grades. These years and their events shaped and molded his life. The encouragement of family, with their love and support, guided him to follow in the footsteps of one of his older brothers and become a sailor. An ABE's Logbook tells some of those stories, filling the reader with all the raw emotions of a young man leaving home and becoming a man, a sailor, and experiencing that part of his life. An ABE's Logbook reveals to the reader the story of a sailor and his life aboard ship and all he faces, fears, and accomplishes, both dangers and beauty of the Naval ship and of the sea.

Assessment of insurance needs and opportunities in the Caribbean fisheries sector Food and Agriculture Organization of the United Nations,2018-11-15 Climate change related natural disasters pose serious threats and risks to livelihoods of fishermen and women as well as to food security in the Caribbean. To respond to these threats and risks, the FAO, the Department of State of the United States of America and the World Bank introduced an initiative on climate risk insurance for the Caribbean Fisheries sector as part of a global initiative on Blue Growth. In support of this initiative a survey was conducted to identify fisheries assets that could be insured, value these assets, identify climate smart fisheries investments and practices and carry out an insurance needs and demand survey. This Circular presents survey findings from Antigua and Barbuda, Barbados, Grenada, St Lucia, St Kitts and Nevis and St Vincent and the Grenadines. Some of the key findings are that: 97 percent of the fishing vessels and fishing assets were not insured, while in each of the CARICOM countries there is at least one local

insurer offering marine insurance; 83 percent of the fishers would purchase insurance coverage for their vessels if it would be more affordable; only 17 percent of the fishers had a health insurance and 20 percent had an life insurance policy. Moreover, more than one-third of the fishers would be interested to invest in safe harbor, anchorage, haul out and vessel storage facilities, including installation of bumper rails on piers and the use of fenders on boats and piers, if this would reduce insurance premiums. Based on the findings of the insurance demand survey, an organizational arrangement for a Caribbean Fisheries Risk Insurance Facility (CFRIF) was developed, presented at various regional fora and shared with interested stakeholders.
