F-4 Phantom Pilot's Flight Operating Manual Periscope Film Com,2006-08-15 One of the great aircraft of the Cold War era, the McDonnell Douglas F-4 Phantom II was the most heavily produced supersonic, all-weather fighter bomber. Capable of a top speed of Mach 2.23, it set sixteen world records including an absolute speed record of 1,606 mph and an altitude record of 98,557 feet. The F-4 flew Vietnam, in the Arab-Israeli conflict, and the Gulf War and amassed a record of 393 aerial victories. F-4s also flew as part of the USAF Thunderbirds and the U.S. Navy Blue Angels flight demonstration teams. Originally printed by McDonnell and the U.S. Navy in the 1960s, this flight operating handbook taught pilots everything they needed to know before entering the cockpit. Classified restricted, the manual was recently declassified and is here reprinted in book form. This affordable facsimile has been reformatted. Care has been taken however to preserve the integrity of the text.

Targeting Investments in Children Phillip B. Levine,David J. Zimmerman,2010-10-15 A substantial number of American children experience poverty: about 17 percent of those under the age of eighteen meet the government's definition, and the proportion is even greater within minority groups. Childhood poverty can have lifelong effects, resulting in poor educational, labor market, and physical and mental health outcomes for adults. These problems have long been recognized, and there are numerous programs designed to alleviate or even eliminate poverty; as these programs compete for scarce resources, it is important to develop a clear view of their impact as tools for poverty alleviation. Targeting Investments in Children tackles the problem of evaluating these programs by examining them using a common metric: their impact on earnings in adulthood. The volume's contributors explore a variety of issues, such as the effect of interventions targeted at children of different ages, and study a range of programs, including child care, after-school care, and drug prevention. The results will be invaluable to educational leaders and researchers as well as policy makers.

Gear Up, Mishaps Down Robert F Dunn, 2024-02-15 Less than five years after naval aviation led

the forces that defeated Imperial Japan that very organization was in serious trouble. The force had been drastically reduced and, despite the Korean War, growing sentiment supported by no less than the chairman of the Joint Chiefs argued that the new Air Force could do anything naval aviation might be required to do. Meanwhile, the naval aviation mishap rate soared. The very survival of naval aviation was at stake. It took fifty years to turn this around. Today, in spite of hot wars, cold wars, contingencies, and peacetime operations in support of friends and allies, the Navy and Marine Corps accident rate is at least as good as that of the Air Force, and it approaches that of commercial aviation. Gear Up, Mishaps Down explains that this accomplishment was achieved through dedicated and professional leadership, a focus on lessons learned from mishaps and near-mishaps, a willingness to learn from other enterprises, and by better leadership, training, maintenance, supply and more.

Grumman F11F Tiger Pilot's Flight Operating Instructions United States Navy, USN, 2008-09-01 As the Blue Angels' aircraft in the late 1950s, Grumman's F11F-1 Tiger came to symbolize the speed and might of U.S. Navy airpower. The Tiger was originally conceived as an upgrade of the F9F Cougar. It eventually morphed into a new design, that incorporated the area rule to enable cruising speeds up to 1.1 Mach. The prototype flew in 1954, and carrier trials commenced in 1956. Eventually seven squadrons flew F11Fs. Hampered by maintenance issues affiliated with the J65 engine, and the fact that the Vought Crusader was clearly superior, the Tiger had a short service life. It was withdrawn from carrier duty after four years, in 1961. Only 199 were built. The remaining Tigers flew in a training capacity, and the Blue Angels continued to fly them for over a decade, 1957-1969. Originally printed by the U.S. Navy, this handbook provides a fascinating glimpse inside the cockpit of the Tiger. Originally classified 'restricted', the manual was declassified

and is here reprinted in book form.

F-14 Tomcat Pilot's Flight Operating Manual Vol. 2 U. S. Navy, 2009-10-19 PLEASE NOTE: THIS IS VOLUME 2 OF 2. YOU MUST PURCHASE BOTH BOOKS TO HAVE A COMPLETE SET. Developed as both an air superiority fighter and a long-range naval interceptor, Grumman's F-14 Tomcat was the U.S. Navy's primary fighter from 1974 until 2006. Over 700 were built. The F-14 flew its first combat missions shortly after its initial deployment in late 1974, flying in support of the American withdrawal from Saigon. In 1981 it drew first blood, as two F-14s from VF-41 downed two Libyan Su-22s. The plane compiled a notable combat record for the United States in both Gulf Wars and NATO actions in Bosnia. Planes sold to the Shah of Iran prior to his ouster remain the last F-14s in active service, as the U.S. Navy retired it in October 2006. This F-14 pilot's flight operating handbook was originally produced by the U.S. Navy. It has been slightly reformatted but is reproduced here in its entirety. It provides a fascinating view inside the cockpit of one of history's great planes.
