Creating QR and Tag Codes Phil Dutson,2013

Scan Me - Everybody's Guide to the Magical World of Qr Codes Mick Winter,2011 Everybody's Guide to the Magical World of QR Codes Imagine you could hold your mobile phone up to an image, and magically summon any information you wished.You see a movie poster and wonder if the movie is worth seeing. Zap! You're watching the movie's trailer. You see a restaurant menu and wonder about the food. Zap! You're reading reviews from people who ate there. You're at a subway stop. Zap! You're seeing the actual arrival time of the next train. You see a magazine ad for a product and want to buy it. Zap! You've placed the order. How does this magic happen? With something called a QR Code. If you have a business or non-profit organization, you absolutely want to know how to use QR Codes. This book will tell you how you can use them in your marketing to attract, assist, hang on to and increase your customers. If you want to know how to make them and use them for personal or educational use, you'll learn that, too. They're free. They're fun. They're useful. Why not start now?

Process Design for Natural Scientists Anna-Lena Lamprecht,Tiziana Margaria,2014-09-19 This book presents an agile and model-driven approach to manage scientific workflows. The approach is based on the Extreme Model Driven Design (XMDD) paradigm and aims at simplifying and automating the complex data analysis processes carried out by scientists in their day-to-day work. Besides documenting the impact the workflow modeling might have on the work of natural scientists, this book serves three major purposes: 1. It acts as a primer for practitioners who are interested to learn how to think in terms of services and workflows when facing domain-specific scientific processes. 2. It provides interesting material for readers already familiar with this kind of tools, because it introduces systematically both the technologies used in each case study and the basic concepts behind them. 3.

As the addressed thematic field becomes increasingly relevant for lectures in both computer science and experimental sciences, it also provides helpful material for teachers that plan similar courses.

2021 International Conference on Security and Information Technologies with AI, Internet Computing and Big-data Applications George A. Tsihrintzis,Shiuh-Jeng Wang,Iuon-Chang Lin,2022-11-29 This book aims to attract researchers and practitioners who are working in information technology and computer science. This edited book is about basics and high-level concepts regarding blockchain technology and application, multimedia security, information processing, security of network, cloud and IoT, cryptography and information hiding, cyber-security and evidence investigations, and learning and intelligent computing. It is becoming increasingly important to develop adaptive, intelligent computing-centric, energy-aware, secure, and privacy-aware mechanisms in high-performance computing and IoT applications. The book serves as a useful guide for industry persons and also helps beginners to learn things from basic to advance in the area of better computing paradigm. Our aim is intended to provide a platform for researchers, engineers, academicians as well as industrial professionals from all over the world to present their research results in security-related areas. We believe that this book not only presents novel and interesting ideas but also will stimulate interesting discussions from the participants and inspire new ideas.

Advances in Visual Computing George Bebis,Vassilis Athitsos,Tong Yan,Manfred Lau,Frederick Li,Conglei Shi,Xiaoru Yuan,Christos Mousas,Gerd Bruder,2021-12-02 This two-volume set of LNCS 13017 and 13018 constitutes the refereed proceedings of the 16th International Symposium on Visual Computing, ISVC 2021, which was held in October 2021. The symposium took place virtually instead due to the COVID-19 pandemic. The 48 papers presented in these volumes were carefully reviewed and selected from 135 submissions. The papers are organized into the following topical sections: Part

I: deep learning; computer graphics; segmentation; visualization; applications; 3D vision; virtual reality; motion and tracking; object detection and recognition. Part II: ST: medical image analysis; pattern recognition; video analysis and event recognition; posters.

Internet of Things, Infrastructures and Mobile Applications Michael E. Auer,Thrasyvoulos Tsiatsos,2020-09-10 This book gathers papers on interactive and collaborative mobile learning environments, assessment, evaluation and research methods in mobile learning, mobile learning models, theory and pedagogy, open and distance mobile learning, life-long and informal learning using mobile devices, wearables and the Internet of Things, game-based learning, dynamic learning experiences, mobile systems and services for opening up education, mobile healthcare and training, case studies on mobile learning, and 5G network infrastructure. Today, interactive mobile technologies have become the core of many—if not all—fields of society. Not only do the younger generation of students expect a mobile working and learning environment, but also the new ideas, technologies and solutions introduced on a nearly daily basis also boost this trend. Discussing and assessing key trends in the mobile field were the primary aims of the 13th International Conference on Interactive Mobile Communication Technologies and Learning (IMCL2019), which was held in Thessaloniki, Greece, from 31 October to 01 November 2019. Since being founded in 2006, the conference has been devoted to new approaches in interactive mobile technologies, with a focus on learning. The IMCL conferences have since become a central forum of the exchange of new research results and relevant trends, as well as best practices. The book's intended readership includes policymakers, academics, educators, researchers in pedagogy and learning theory, schoolteachers, further education lecturers, practitioners in the learning industry, etc.

Trustworthy Ubiquitous Computing Ismail Khalil,Teddy Mantoro,2012-09-08 Trustworthy

Ubiquitous Computing covers aspects of trust in ubiquitous computing environments. The aspects of context, privacy, reliability, usability and user experience related to "emerged and exciting new computing paradigm of Ubiquitous Computing", includes pervasive, grid, and peer-to-peer computing including sensor networks to provide secure computing and communication services at anytime and anywhere. Marc Weiser presented his vision of disappearing and ubiquitous computing more than 15 years ago. The big picture of the computer introduced into our environment was a big innovation and the starting point for various areas of research. In order to totally adopt the idea of ubiquitous computing several houses were build, equipped with technology and used as laboratory in order to find and test appliances that are useful and could be made available in our everyday life. Within the last years industry picked up the idea of integrating ubiquitous computing and already available products like remote controls for your house were developed and brought to the market. In spite of many applications and projects in the area of ubiquitous and pervasive computing the success is still far away. One of the main reasons is the lack of acceptance of and confidence in this technology. Although researchers and industry are working in all of these areas a forum to elaborate security, reliability and privacy issues, that resolve in trustworthy interfaces and computing environments for people interacting within these ubiquitous environments is important. The user experience factor of trust thus becomes a crucial issue for the success of a UbiComp application. The goal of this book is to provide a state the art of Trustworthy Ubiquitous Computing to address recent research results and to present and discuss the ideas, theories, technologies, systems, tools, applications and experiences on all theoretical and practical issues.

Build Your Own Robot Marwan Alsabbagh,2024-03-12 A DIY guide to bringing your first robot to life with cheap and basic components. Build Your Own Robot introduces you to the exciting world of

Proceedings of the Fifth International Conference on Arts and Design Education (ICADE 2022) Juju Masunah,Tati Narawati,Yudi Sukmayadi,Zakarias S. Soeteja,Trianti Nugraheni,Rita Milyartini,Agus Budiman,2023-10-29 This is an open access book. The 5th INTERNATIONAL CONFERENCE ON ARTS AND DESIGN EDUCATION (ICADE) "Digital Media Literacy and Mastery of Post-pandemic in Arts and Design Education" BACKGROUND The past year has been one of enormous turbulence and upheaval where nobody has been left untouched by the impact of the global pandemic, even a great change has been forced upon artists and educators in their work creation process as well as learning and teaching practice. What and how artists and educators have thought and gone through to keep their field sustained should be disseminated as a mutual learning to enhance our awareness on arts and design sustainability and role during pandemic. ICADE 5 aims to bring together leading academic artists, arts and design researchers and scholars to exchange and share their notion, experiences, and research results on all aspects of Digital Media Literacy and Mastery in Arts and Design education during pandemic and its urgencies after pandemics. It also provides a premier interdisciplinary platform for arts and design researchers, practitioners, and educators to present and discuss the most recent innovations, trends, and concerns as well as practical challenges encountered and solutions adopted which involves digital media literacy or mastery in the fields of Arts and Design education. The 5th International Conference on Arts and Design Education (ICADE) is a conference hosted by Faculty of Arts and Design Education Universitas Pendidikan Indonesia. This conference will be held on

September 22nd, 2022 through Zoom Webinar. ICADE has covered a broad range of topic on music, dance, drama, visual arts, visual communication design, arts education, film and television, and multidiciplinary arts fields. This conference scopes may pertain how artist, designer, or arts and design educators finally adapt and conquer digital media to support their work creation and studies activities during pandemic; attitude changes toward art and design works creation; best practice of art and design creation and studies during pandemic; sorts of digital media which might be left or continuously used after pandemic; what finally the digital media can't ever cover during pandemic even to this moment (post-pandemic); potential disruptive/constructive point of digital media use; as well as other substance where we spot a relation between a digital media with arts and design creation and studies.

Cultural Diversity Pedagogy and Meta-Case Design Neal Dreamson,2021-01-18 Responding to the growing need for educators to have a deeper understanding of cultural diversity, this book provides a theoretically-rich and empirically-sound analysis of diversity education, to develop a new cultural diversity pedagogy. The author deconstructs and navigates the complex field of diversity education, arguing for a more socially engaged approach, in which educators and researchers develop their perspectives on cultural diversity by examining their own assumptions, values, and beliefs. This is explored through a series of 10 case studies based in primary school settings demonstrating that teaching and learning environments are crucial to the success of cultural diversity.
