Sociotechnical Communication in Engineering Jon Leydens, 2015-10-14 This collection explores why engineering communication constitutes sociotechnical communication. Sociotechnical communication acknowledges that engineering communication occurs not in a vacuum but shapes and is shaped by multiple social forces. Through diverse research cases, the authors show how sociotechnical communication disrupts common myths in engineering communication: the myth that communication can be purely technical and neutral, and that data speak for themselves. The book highlights these myths, considering first how styles, types, and means of sociotechnical communication played pivotal—and differing—roles in the evolution of wind power technology in Denmark and Germany. The role of myth in engineering blogs is also examined, wherein the effect of engineers maintaining objective or neutral personae, accentuating technical facts over their social relevance, and eschewing controversy, is to decrease public interest in engineering issues. We see the myths emerge again via product development engineers, whose narrow technical roles constrain their identities and may contribute to constraining their design innovation capacities, in contrast to more holistic, flexible spaces that foster innovation. The myths are also apparent in constructing bridges across Millennial-Baby Boomer generational divides, to facilitate engineering collaboration and knowledge transfer among engineers. Finally, the myths are situated in light of related myths and broader research trends in engineering communication. This book was originally published as a special issue of Engineering Studies.

Dialect Emergence in Waumandee English David N. Ehrat, 2008 This book examines how a new dialect emerges. It is based on empirical research carried out in Waumandee, Wisconsin, a small community set in a linguistically uncharted territory in North America. Waumandee English is influenced by the native languages of settlers who arrived from different parts of Switzerland, Germany, Norway, Poland, Austria and Ireland. Traditional dialectology augmented by sociolinguistic and psychological parameters enables the reader to follow the path of current dialect emergence in Waumandee English.

China's Generation Y Michael Stanat, 2006 Based on interviews and surveys conducted in Shanghai by the author, this is the first English book to look into all aspects of China's young generation - their life styles, relationships with family and society, views, dreams and development. Growing up during the information age, China's Generation Y (born between 1981 and 1995) is unlike any of its predecessors, sporting branded items and increasingly sharing some of the same ideas as western youth. Living in a rapidly developing country, this generation of teenagers in China will most likely be the political and business leaders of the world's next superpower by the year 2025. China's Generation Y explores these perspectives by delving into the nooks and crannies of Chinese teenagers' stories. The book is not only for those who seek to acquaint themselves with this crucial generation from the perspective of a western peer, but also for business leaders who wish to cater to the up-and-coming Chinese consumers. Informative and stimulating, this book will open up a new horizon for many in the west who will ultimately meet the need and challenge of this emerging Chinese generation.

University English for Academic Purposes in China Xiaofei Rao, 2018-07-07 This book uses an in-depth, phenomenological interview approach to explain the generational characteristics of today's Chinese university youths and the critical dispositions they believe indispensable in acquiring English as an academic language in and outside school settings. By presenting the authentic voices of the recruited participants, the book clarifies how English for academic purposes (EAP), as an emerging global phenomenon and a research-informed practice, enables and empowers them for conscious self-transformation and critical awareness development through language study. The book also explores issues arising in the fields of general English language teaching as well as traditional and critical EAP, and discusses university English language learners' learning needs and rights. The book further promotes a dynamic and transformative University EAP pedagogy of particularity, practicality, and possibility moving from the oppression of language education to its liberation, and the increasing critical consciousness among the present and future university youths in a time of great social changes.
