Generations ,2003

Fractured Generations Allan C. Carlson,2018-01-18 Fifty years ago, the phrase family policy was rarely heard in America. Individual states maintained laws governing marriage, divorce, education, inheritance, and child protection, which regulated the formation, childrearing practices, and dissolution of families. However, these scattered policy issues were not seen as closely related. Until the 1960s, the nuclear family was an institution that was part of the natural life-course expected of most adults. Family meant marriage, children, the establishment of a home, care of the elderly, but perhaps most of all, bonding of the generations. As early as the 1840s, certain elements of states' policies hinted at a weakening family structure, but not until the 1960s was the family openly attacked. Feminists objected to a male-oriented home economy, demographers encouraged negative population growth, the sexual revolution was on the rise, and religiously grounded morality in public life was challenged in the federal courts. Married couples with children had to shoulder a larger tax burden, further discouraging people from building and maintaining families. Perhaps because family was so central to the founders' lives they found no need to mention it in the Constitution. But today, generational bonds have fractured, while family policy is a paramount public concern. As Allan Carlson makes clear no nation can progress, or even survive, without a durable family system. Contemporary family policy represents an attempt to counter the negative forces of the last four decades so as to restore the natural family to its necessary place in American life. *Fractured Generations'* chapters follow the life-course of the human family--marriage; the birth of

children; infant and toddler care; schooling; building a home; crafting a durable family economy; and elder care. This is a passionate and well-reasoned appeal for a return to the institution that is the last best hope for America's future: the family.

Families Caring for an Aging America National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Care Services, Committee on Family Caregiving for Older Adults, 2016-11-08 Family caregiving affects millions of Americans every day, in all walks of life. At least 17.7 million individuals in the United States are caregivers of an older adult with a health or functional limitation. The nation's family caregivers provide the lion's share of long-term care for our older adult population. They are also central to older adults' access to and receipt of health care and community-based social services. Yet the need to recognize and support caregivers is among the least appreciated challenges facing the aging U.S. population. Families Caring for an Aging America examines the prevalence and nature of family caregiving of older adults and the available evidence on the effectiveness of programs, supports, and other interventions designed to support family caregivers. This report also assesses and recommends policies to address the needs of family caregivers and to minimize the barriers that they encounter in trying to meet the needs of older adults.

ITNG 2021 18th International Conference on Information Technology-New Generations Shahram Latifi, 2021-06-04 This volume represents the 18th International Conference on Information Technology - New Generations (ITNG), 2021. ITNG is an annual event focusing on state of the art technologies pertaining to digital information and communications. The applications of advanced information technology to such domains as

astronomy, biology, education, geosciences, security, and health care are the among topics of relevance to ITNG. Visionary ideas, theoretical and experimental results, as well as prototypes, designs, and tools that help the information readily flow to the user are of special interest. Machine Learning, Robotics, High Performance Computing, and Innovative Methods of Computing are examples of related topics. The conference features keynote speakers, a best student award, poster award, service award, a technical open panel, and workshops/exhibits from industry, government and academia. This publication is unique as it captures modern trends in IT with a balance of theoretical and experimental work. Most other work focus either on theoretical or experimental, but not both. Accordingly, we do not know of any competitive literature.

Patient Safety and Quality Ronda Hughes, 2008 Nurses play a vital role in improving the safety and quality of patient care -- not only in the hospital or ambulatory treatment facility, but also of community-based care and the care performed by family members. Nurses need know what proven techniques and interventions they can use to enhance patient outcomes. To address this need, the Agency for Healthcare Research and Quality (AHRQ), with additional funding from the Robert Wood Johnson Foundation, has prepared this comprehensive, 1,400-page, handbook for nurses on patient safety and quality -- Patient Safety and Quality: An Evidence-Based Handbook for Nurses. (AHRQ Publication No. 08-0043). - online AHRQ blurb, <http://www.ahrq.gov/qual/nursesdbk/>

Intelligent Human Systems Integration 2019 Waldemar Karwowski, Tareq Ahram, 2019-01-05 This book presents cutting-edge research on innovative human systems integration and human-machine interaction, with an emphasis on artificial intelligence

and automation, as well as computational modeling and simulation. It covers a wide range of applications in the area of design, construction and operation of products, systems and services, including lifecycle development and human-technology interaction. The book describes advanced methodologies and tools for evaluating and improving interface usability, new models, and case studies and best practices in virtual, augmented and mixed reality systems, with a special focus on dynamic environments. It also discusses various factors concerning the human user, hardware, and artificial intelligence software. Based on the proceedings of the 2nd International Conference on Intelligent Human Systems Integration (IHSI 2019), held on February 7–10, 2019, in San Diego, California, USA, the book also examines the forces that are currently shaping the nature of computing and cognitive systems, such as the need to reduce hardware costs; the importance of infusing intelligence and automation; the trend toward hardware miniaturization and power reduction; the need for a better assimilation of computation in the environment; and social concerns regarding access to computers and systems for people with special needs. It offers a timely survey and a practice-oriented reference guide for policy- and decision-makers, human factors engineers, systems developers and users alike.

The Age of Dignity Ai-jen Poo, Ariane Conrad, 2009-03-17 One of Time's 100 most influential people "shines a new light on the need for a holistic approach to caregiving in America . . . Timely and hopeful" (Maria Shriver). In *The Age of Dignity*, thought leader and activist Ai-jen Poo offers a wake-up call about the statistical reality that will affect us all: Fourteen percent of our population is now over sixty-five; by 2030 that ratio will be

one in five. In fact, our fastest-growing demographic is the eighty-five-plus age group—over five million people now, a number that is expected to more than double in the next twenty years. This change presents us with a new challenge: how we care for and support quality of life for the unprecedented numbers of older Americans who will need it. Despite these daunting numbers, Poo has written a profoundly hopeful book, giving us a glimpse into the stories and often hidden experiences of the people—family caregivers, older people, and home care workers—whose lives will be directly shaped and reshaped in this moment of demographic change. The Age of Dignity outlines a road map for how we can become a more caring nation, providing solutions for fixing our fraying safety net while also increasing opportunities for women, immigrants, and the unemployed in our workforce. As Poo has said, “Care is the strategy and the solution toward a better future for all of us.” “Every American should read this slender book. With luck, it will be the future for all of us.” —Gloria Steinem “Positive and inclusive.” —The New York Times “A big-hearted book [that] seeks to transform our dismal view of aging and caregiving.” —Ms. magazine

Retooling for an Aging America Institute of Medicine, Board on Health Care Services, Committee on the Future Health Care Workforce for Older Americans, 2008-09-27
As the first of the nation's 78 million baby boomers begin reaching age 65 in 2011, they will face a health care workforce that is too small and woefully unprepared to meet their specific health needs. Retooling for an Aging America calls for bold initiatives starting immediately to train all health care providers in the basics of geriatric care and to prepare family members and other informal caregivers, who currently receive little or no training

in how to tend to their aging loved ones. The book also recommends that Medicare, Medicaid, and other health plans pay higher rates to boost recruitment and retention of geriatric specialists and care aides. Educators and health professional groups can use *Retooling for an Aging America* to institute or increase formal education and training in geriatrics. Consumer groups can use the book to advocate for improving the care for older adults. Health care professional and occupational groups can use it to improve the quality of health care jobs.

The Future of the Public's Health in the 21st Century Institute of Medicine, Board on Health Promotion and Disease Prevention, Committee on Assuring the Health of the Public in the 21st Century, 2003-02-01 The anthrax incidents following the 9/11 terrorist attacks put the spotlight on the nation's public health agencies, placing it under an unprecedented scrutiny that added new dimensions to the complex issues considered in this report. *The Future of the Public's Health in the 21st Century* reaffirms the vision of Healthy People 2010, and outlines a systems approach to assuring the nation's health in practice, research, and policy. This approach focuses on joining the unique resources and perspectives of diverse sectors and entities and challenges these groups to work in a concerted, strategic way to promote and protect the public's health. Focusing on diverse partnerships as the framework for public health, the book discusses: The need for a shift from an individual to a population-based approach in practice, research, policy, and community engagement. The status of the governmental public health infrastructure and what needs to be improved, including its interface with the health care delivery system. The roles nongovernment actors, such as academia, business, local communities and the

media can play in creating a healthy nation. Providing an accessible analysis, this book will be important to public health policy-makers and practitioners, business and community leaders, health advocates, educators and journalists.

Cyber Security and Resiliency Policy Framework A. Vaseashta,P. Susmann,E. Braman,2014-09-19 Cyberspace is a ubiquitous realm interconnecting every aspect of modern society, enabled by broadband networks and wireless signals around us, existing within local area networks in our schools, hospitals and businesses, and within the massive grids that power most countries. Securing cyberspace to ensure the continuation of growing economies and to protect a nation's way of life is a major concern for

governments around the globe. This book contains papers presented at the NATO Advanced Research Workshop (ARW) entitled Best Practices and Innovative Approaches to Develop Cyber Security and Resiliency Policy Framework, held in Ohrid, the Former Yugoslav Republic of Macedonia (FYROM), in June 2013. The workshop aimed to develop a governing policy framework for nation states to enhance the cyber security of critical infrastructure. The 12 papers included herein cover a wide range of topics from web security and end-user training, to effective implementation of national cyber security policies and defensive countermeasures. The book will be of interest to cyber security professionals, practitioners, policy-makers, and to all those for whom cyber security is a critical and an important aspect of their work.

Child Care in Context Michael E. Lamb, Kathleen J. Sternberg, Carl-Philip Hwang, Anders G. Broberg, 2014-01-02 Child care is an integral part of the web of influences and experiences that shape children's development. Utilizing an interdisciplinary approach that covers both historic and economic contexts, this unique book characterizes child care in 18 countries on five continents. Specific historical roots and the current social contexts of child care are delineated in industrialized as well as in developing countries. To increase the depth of crosscultural analysis and integration, commentators from countries and disciplines other than the authors comment on the issues raised in each chapter.

Blockchain Technologies for Sustainable Development in Smart Cities

Swarnalatha, P., Prabu, S., 2022-02-18 Blockchain technology has great potential to radically change our socio-economic systems by guaranteeing secure transactions

between untrusted entities, reducing costs, and simplifying many processes. However, employing blockchain techniques in sustainable applications development for smart cities still has some technical challenges and limitations. Blockchain Technologies for Sustainable Development in Smart Cities investigates blockchain-enabled technology for smart city developments and big data applications. This book provides relevant theoretical frameworks and the latest empirical research findings in the area. Covering topics such as digital finance, smart city technology, and data processing architecture, this book is an essential reference for electricians, policymakers, local governments, city committees, computer scientists, IT professionals, professors and students of higher education, researchers, and academicians.

Healthcare Policy and Reform Information Resources Management Association, 2019 Industry professionals, government officials, and the general public often agree that the modern healthcare system is in need of an overhaul. With many organizations concerned with the long-term care of patients, new strategies, practices, and organizational tools must be developed to optimize the current healthcare system. Healthcare Policy and Reform: Concepts, Methodologies, Tools, and Applications is a comprehensive source of academic material on the importance of policy and policy reform initiatives in modern healthcare systems. Highlighting a range of topics such as public health, effective care delivery, and health information systems, this multi-volume book is designed for medical practitioners, medical administrators, professionals, academicians, and researchers interested in all aspects of healthcare policy and reform.

Nanosensors for Futuristic Smart and Intelligent Healthcare Systems Suresh

Kaushik,Vijay Soni,Efstathia Skotti,2022-08-18 The book, Nanosensors for Futuristic Smart and Intelligent Healthcare Systems, presents a treatise on nanosensors technology including wearables, implantable devices and wireless tools. The recent pandemic (COVID-19) has changed the behaviour of people towards diagnosis of infectious diseases and monitoring remote patient health status in real-time. The main focus of this book is the basic concepts of nanomaterials and sensing paradigms for medical devices based on nanosensor technology. The book will be valuable to researchers, engineers and scientists interested in the field of healthcare for monitoring health status in real-time.

GERIATRIC FORENSIC PSYCHIATRY Dr Jacob Holzer,Dr Robert Kohn,Dr James Ellison,Dr Patricia Recupero,2017-11-30 Geriatric Forensic Psychiatry: Principles and Practice is one of the first texts to provide a comprehensive review of important topics in the intersection of geriatric psychiatry, medicine, clinical neuroscience, forensic psychiatry, and law.
