<u>Handbook of the Ainu Language</u> Anna Bugaeva,2022-10-24 The volume is aimed at preserving invaluable knowledge about Ainu, a language-isolate previously spoken in Hokkaido, Sakhalin, and Kurils, which is now on the verge of extinction. Ainu was not a written language, but it possesses a huge documented stock of oral literature, yet is significantly under-described in terms of grammar. It is the only non-Japonic language of Japan and is typologically different not only from Japanese but also from other Northeast Asian languages. Revolving around but not confined to its head-marking and polysynthetic character, Ainu manifests many typologically interesting phenomena, related in particular to the combinability of various voice markers and noun incorporation. Other interesting features of Ainu include vowel co-occurrence restrictions, a mixed system of expressing grammatical relations, which includes the elements of a rare tripartite alignment, nominal classification distinguishing common and locative nouns, elaborate possessive classes, verbal number, a rich four-term evidential system, and undergrammaticalized aspect, which are all explained in the volume. This handbook, the result of unprecedented cooperation of the leading experts of Ainu, will definitely help to increase the clarity of our understanding of Ainu and in a long-term perspective may provide answers to problems of human prehistory as well as open the field of Ainu studies to the world and attract many new students. <u>Translanguaging in Translation</u> Eriko Sato,2022-03-28 This book brings applied linguistics and translation studies together through an analysis of literary texts in Chinese, Hindi, Japanese and Korean and their translations. It examines the traces of translanguaging in translated texts with special focus on the strategic use of scripts, morphemes, words, names, onomatopoeias, metaphors, puns and other contextualized linguistic elements. As a result, the author draws attention to the long-term, often invisible contributions of translanguaging performed by translators to the development of languages and society. The analysis sheds light on the problems caused by monolingualizing forces in translation, teaching and communicative contexts in modern societies, as well as bringing a new dimension to the burgeoning field of translanguaging studies.

<u>Handbook of Japanese Lexicon and Word Formation</u> Taro Kageyama,Hideki Kishimoto,2016-01-29 This volume presents a comprehensive survey of the lexicon and word formation processes in contemporary Japanese, with particular emphasis on their typologically characteristic features and their interactions with syntax and semantics. Through contacts with a variety of languages over more than two thousand years of history, Japanese has developed a complex vocabulary system that is composed of four lexical strata: (i) native Japanese, (ii) mimetic, (iii) Sino-Japanese, and (iv) foreign (especially English). This hybrid composition of the lexicon, coupled with the agglutinative character of the language by which morphology is closely associated with syntax, gives rise to theoretically intriguing interactions with word formation processes that are not easily found with inflectional, isolate, or polysynthetic types of languages.
