National Conference on Electrical Sciences (NCES – 2021) M. Padma Lalitha,Pasala Gopi,O. Hema Kesavulu,2022-06-03 The rise of disruptive technologies in various departments of engineering is set to dominate the industries in the upcoming years. Focus is being emerged to provide the latest developments of the cutting edge technologies that have immense applications in various fields of engineering sciences. There is an immense need to bridge the gap between the academia and industries that helps in overall development of the society. The conference aims to bring researchers, academicians, together to participate and showcase the results of their current research findings in the broad fields of Electrical Sciences.

Report of the Surgeon General's Conference on Children's Mental Health United States. Public Health Service. Office of the Surgeon General,2000 Conference held Sept. 18-19, 2000, Washington, DC. The purpose of the conference was to engage a group of citizens in a thoughtful, meaningful dialogue about issues of prevention, identification, recognition, and referral of children with mental health needs to appropriate, evidence-based treatments or services.

The Geography of South Africa Jasper Knight,Christian M. Rogerson,2018-10-03 This edited collection examines contemporary directions in geographical research on South Africa. It encompasses a cross section of selected themes of critical importance not only to the discipline of Geography in South Africa, but also of relevance to other areas of the Global South. All chapters are original contributions, providing a state of the art research baseline on key themes in physical, human and environmental geography, and in understanding the changing geographical landscapes of modern South Africa. These contributions set the scene for an understanding of the relationships between modern South Africa and the wider contemporary world, including issues of sustainable development and growth in the Global South.

ICCSM2014-Proceedings of the International Conference on Cloud Security Management ICCSM-2014 Barbara Endicott-Popovsky,2014-10-07 These Proceedings are the work of researchers contributing to the 2nd International Conference on Cloud Security Management Security (ICCSM 2014), being held this year at the University of Reading, UK on the 23-24 October 2014, . The conference chair is Dr John McCarthy, Vice President, from the Cyber Security, ServiceTech, UK and the Programme Chair is Dr. Barbara Endicott-Popovsky, from the Center for Information Assurance and Cybersecurity, University of Washington, Seattle, USA. As organisations rush to adopt Cloud Computing at a rate faster than originally projected, it is safe to predict that, over the coming years, Cloud Computing will have major impacts, not only on the way we conduct science and research, but also on the quality of our daily human lives. Computation research, education, and business communities have been exploring the potential benefits of Cloud Computing and the changes these imply. Experts have predicted that the move to the cloud will alter significantly the content of IT jobs, with cloud clients needing fewer hands-on skills and more skills that administer and manage information. Bill Gates was recently quoted: How you gather, manage, and use information will determine whether you win or lose. Cloud Computing impacts will be broad and pervasive, applying to public and private institutions alike.

Geo-Design Steffen Nijhuis,Sisi Zlatanova,Eduardo Dias,Frank van der Hoeven,Stefan van der Spek,2016-12-01 Geo-Design. Advances in bridging geo-information technology and design bring together a wide variety of contributions from authors with backgrounds in urban planning, landscape architecture, education and geo-information technology presenting the latest insights and applications of geo-design. Geo-Design is here understood as a hybridization of the concepts “Geo” – representing the modeling, analytical and visualization capacities of GIS, and “Design” – representing spatial planning and design, turning existing situations into preferred ones. Through focusing on interdisciplinary design-related concepts and applications of GIS international experts share their recent findings and provide clues for the further development of geo-design. This is important since there is still much to do. Not only in the development of geo-information technology, but especially in bridging the gap with the design-disciplines. The uptake on using GIS is still remarkably slow among landscape architects, urban designers and planners, and when utilized it is often restricted to the basic tasks of mapmaking and data access. Knowledge development and dissemination of applications of geodesign through research, publications, and education, therefore, remain key factors. This publication draws upon the insights shared at the Geodesign Summit Europe held at Delft University of Technology in 2014. All contributions in the book are double-blind reviewed by experts in the field.

Carceral Geography Dr Dominique Moran,2015-01-28 Carceral geography offers a geographical perspective on incarceration, and this volume accordingly tracks the ideas, practices and engagements that have shaped the development of this new and vibrant subdiscipline, and scopes out future research directions. By conveying a sense of the debates, directions, and threads within the field of carceral geography, it traces the inner workings of this dynamic field, its synergies with criminology and prison sociology, and its likely future trajectories. Synthesizing existing work in carceral geography, and exploring the future directions it might take, the book develops a notion of the ‘carceral’ as spatial, emplaced, mobile, embodied and affective.

Carceral Geography Dominique Moran,2016-04-08 The ‘punitive turn’ has brought about new ways of thinking about geography and the state, and has highlighted spaces of incarceration as a new terrain for exploration by geographers. Carceral geography offers a geographical perspective on incarceration, and this volume accordingly tracks the ideas, practices and engagements that have shaped the development of this new and vibrant subdiscipline, and scopes out future research directions. By conveying a sense of the debates, directions, and threads within the field of carceral geography, it traces the inner workings of this dynamic field, its synergies with criminology and prison sociology, and its likely future trajectories. Fundamentals of Ground Improvement Engineering Jeffrey Evans,Daniel Ruffing,David Elton,2021-09-17 Ground improvement has been one of the most dynamic and rapidly evolving areas of geotechnical engineering and construction over the past 40 years. The need to develop sites with marginal soils has made ground improvement an increasingly important core component of geotechnical engineering curricula. Fundamentals of Ground Improvement Engineering addresses the most effective and latest cutting-edge techniques for ground improvement. Key ground improvement methods are introduced that provide readers with a thorough understanding of the theory, design principles, and construction approaches that underpin each method. Major topics are compaction, permeation grouting, vibratory methods, soil mixing, stabilization and solidification, cutoff walls, dewatering, consolidation, geosynthetics, jet grouting, ground freezing, compaction grouting, and earth retention. The book is ideal for undergraduate and graduate-level university students, as well as practitioners seeking fundamental background in these techniques. The numerous problems, with worked examples, photographs, schematics, charts and graphs make it an excellent reference and teaching tool.

Ground Improvement Techniques and Geosynthetics T Thyagaraj,2018-09-01 The book comprises select proceedings of the 2016 annual conference of the Indian Geotechnical Society (IGC 2016), with technical papers on the theme “Ground Improvement and Geosynthetics”. The papers cover a wide range of topics, including chemical modification using admixtures, microbial-induced carbonate precipitation, geopolymers, fly ash and other industrial wastes, modification using geosynthetic materials such as

natural and synthetic fibers, expanded polystyrene (EPS) geofoam, prefabricated vertical drains, geosynthetic encased-granular columns and mechanical densification through sand columns. This book is a valuable reference for researchers and practicing engineers alike.

Geography of Tourism Peter Mason, 2017-11-30 Provides both an awareness of the spatial nature of tourism by means of a geographical perspective, and offers critical analysis of major contemporary geographical themes and issues that relate to tourism.

Debates in Geography Education Mark Jones, David Lambert, 2017-09-07 Debates in Geography Education encourages early career teachers, experienced teachers and teacher educators to engage with and reflect on key issues, concepts and debates. It aims to enable readers to reach their own informed judgements with deeper theoretical knowledge and understanding. The second edition is fully updated in light of the latest research, policy and practice in the field, as well as key changes to the curriculum and examination specifications. Expert contributors provide a range of perspectives on international, historical and policy contexts in order to deepen our understanding of significant debates in geography education. Key debates include: geography's identity as an academic discipline; what constitutes knowledge in geography; places and regional geography; what it means to think geographically; constructing the curriculum; how we link assessment to making progress in geography; the contribution of fieldwork and outdoor experiences; technology and the use of Geographical Information; school geography and employability; understanding the gap between school and university geography; evidence-based practice and research in geography education. The comprehensive, rigorous coverage of these key issues, together with carefully annotated selected further reading, will help support and shape further research and writing. Debates in Geography Education is a key resource that is essential reading for all teachers and researchers who wish to extend their grasp of the place of geography in education. Mark Jones is Senior Lecturer in Education at the University of the West of England, Bristol, UK David Lambert is Professor of Geography Education at UCL Institute of Education, London, UK

Contemporary Immigration in America [2 volumes] Kathleen R. Arnold, 2015-02-03 State and local immigration issues and policies for all 50 states are thoroughly examined in this unique, up-to-date, and accessibly written encyclopedia. Immigration continues to be a timely and often-controversial subject, particularly regarding legislation at the state level. While many books cover U.S. immigration, both historical and contemporary, few if any reference works examine the role of contemporary immigration in individual states. This two-volume encyclopedia fills that gap. Chapters address legal, social, political, and cultural issues of immigrant groups on a state-by-state basis and explore immigration trends and issues faced by individual ethnic populations. The encyclopedia will enable students to research the impact, contributions, and issues of immigration for each state to make comparisons between states and regions of the United States and to understand state versus national policies. By combining the history of immigration policy with current information, the work shows readers that many of the issues making news today are the same as those the nation dealt with in past decades. Studying state and local dynamics provide a unique perspective on this history.

Peacebuilding, Constitutionalism and the Global South Kajit J Bagu (John Paul), 2019-07-05 This book presents the case that liberal constitutionalism in the global South is a legacy of colonialism and is inappropriate as a means of securing effective peace in regions that have been subject to recurrent conflict. The work demonstrates the failure of liberal constitutionalism in guaranteeing peace in the postcolonial global South. It develops an alternative, more compelling constitutionalism for peacebuilding in conflicted regions. This is based on constitutionalism that recognises plurality as a major feature in the global South. Drawing on events in Nigeria, it develops a constitutional model, based on Cognitive Justice, which could deliver peace by addressing historic, conceptual, legal, institutional and structural issues that have created social inequality and injustice. The study also incorporates insights from the development of plurinational constitutions in South America. The book will be an invaluable resource for researchers, academics and policy-makers with an interest in constitutional legal theory, peacebuilding and postcolonial studies

ASA 2022 Data-Driven Decision Making Enrico di Bella, Luigi Fabbri, Corrado Lagazio, 2023-07-04 This volume collects the contributions presented at the conference "Data-driven Decision Making" organized by the Italian Association for Applied Statistics, held in Genoa from 12 to 14 September 2022. The papers cover a broad range of topics, with a common thread: the use of statistical methods to support decision-making both in public administrations and in private companies.

Evolutionary Economic Geography Dieter Kogler, 2017-10-02 Economic geographers increasingly consider the significance of history in shaping the contemporary socio-economic landscape, and increasingly believe that experiences and competencies, acquired over time by individuals and entities in particular localities, to a large degree determine present configurations as well as future regional trajectories. Attempts to trace, understand, and investigate the pathways from past to present have given rise to the thriving and exciting sub-field of Evolutionary Economic Geography (EEG). EEG highlights the important factors that initiate, inhibit, or consolidate the contextual settings and relationships in which regions and their respective agents, which comprise and shape economic activity and social reproduction, change over time. It has at its core the production and destruction of novelty in space, and the links between innovation and regional economic fortunes. The creation of knowledge, its movement and recombination within different regional ensembles of economic agents and institutions plays a critical role in the evolution of the space-economy. EEG provides a framework to disentangle the complexity of technological change and regional economic development based on a variety of theoretical and methodological approaches. In only a short time, EEG has established itself as a promising and rapidly evolving research framework with its focus on the driving forces of regional development across various scales and its attempt to translate findings into public policy. This book advances the theoretical foundations of EEG, and demonstrates how EEG utilises and operationalises conceptual frameworks, both established and new. Contributions also point to future research avenues and extensions of EEG, attempting to build stronger ties between theory, empirical evidence, and relevance to policy. This book was originally published as a special issue of Regional Studies.

The Partisan Gap Laurel Elder, 2021-07-27 WINNER OF THE 2022 VICTORIA SCHUCK AWARD, GIVEN BY THE AMERICAN POLITICAL SCIENCE ASSOCIATION Why Democratic women far outnumber Republican women in elective offices From Kamala Harris and Elizabeth Warren to Stacey Abrams and Alexandria Ocasio-Cortez, women around the country are running in—and winning—elections at an unprecedented rate. It appears that women are on a steady march toward equal representation across state legislatures and the US Congress, but there is a sharp divide in this representation along party lines. Most of the women in office are Democrats, and the number of elected Republican women has been plunging for decades. In The Partisan Gap, Elder examines why this disparity in women's representation exists, and why it's only going to get worse. Drawing on interviews with female office-holders, candidates, and committee members, she takes a look at what it is like to be a woman in each party. From party culture and ideology, to candidate recruitment and the makeup of regional biases, Elder shows the factors contributing to this harmful partisan gap, and what can be done to address it in the future. The Partisan Gap explores the factors that help, and hinder, women's political representation.

Information Technology in Geo-Engineering António Gomes Correia, Joaquim Tinoco, Paulo Cortez, Luís Lamas, 2019-09-24 These proceedings address the latest developments in information communication and technologies for geo-engineering. The 3rd International Conference on Information Technology in Geo-Engineering (ICITG 2019), held in Guimarães, Portugal, follows the previous successful installments of this conference series in Durham (2014) and Shanghai (2010). The respective chapters cover the following: Use of information and communications technologies Big data and databases Data mining and data science Imaging technologies Building information modelling

applied to geo-structures Artificial intelligence Smart geomaterials and intelligent construction Sensors and monitoring Asset management Case studies on design, construction and maintenance Given its broad range of coverage, the book will benefit students, educators, researchers and professional practitioners alike, encouraging these readers to help take the geo-engineering community into the digital age

Model Rules of Professional Conduct American Bar Association. House of Delegates,Center for Professional Responsibility (American Bar Association),2007 The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.
