

Geo Warfare

Francis Anthony Galgano,Eugene Joseph Palka

The Geography of Warfare Pat O'Sullivan,2014-10-03 Originally published in 1983, this broad-ranging book provides penetrating insights on the role of geography in both historic and modern-day warfare. Tactically at a local level, strategically at the campaign level and geopolitically at the global level geographical knowledge is crucial. This book analyses geographical solutions to technical questions of logistics and transportation, the impact of climatology on planning for military action and the understanding of spatial geography for urban and guerrilla wars.

Military Geography for Professionals and the Public John M. Collins,1998 An examination of geography's critical effects on battles throughout the ages

Sanctions as War ,2021-12-20 Sanctions as War is the first critical analysis of economic sanctions from a global perspective. Featuring case studies from 11 sanctioned countries and theoretical essays, it will be of immediate interest to those interested in understanding how sanctions became the common sense of American foreign policy.

Military Geoscience: A Multifaceted Approach to the Study of Warfare Aldino Bondesan,Judy Ehlen,2022-02-23 This volume presents a selection of papers from the 13th International Conference on Military Geosciences (ICMG), held 24-28 June 2019 in Padua, Italy. It covers a wide range of subjects within the confines of military geoscience written by scientists with a variety of different backgrounds from many countries throughout the world. Many of the papers focus on subjects related to Italy and World War I, but additional subject areas include international perspectives in the military geosciences, international security, geospatial intelligence and remote sensing, subterranean and underground warfare, analyses of historical battlefields and fortifications, and military archaeology. The book will be of interest to academics (e.g., military historians, military archaeologists, military geographers and geologists), applied geoscientists (e.g., engineering geologists and geologists working in other areas of applied geology), professional geoscientists, and those with a general interest in military geoscience and history.

The Geography of War in the Post Cold War World Patrick Michael O'Sullivan,2001

Financial Cold War James A. Fok,2021-12-20 A groundbreaking exploration of US-China relations as seen through the lens of international finance Rising tensions between China and the United States have kept the financial markets on edge as a showdown between the world's two largest economies seems inevitable. But what most people fail to recognise is the major impact that the financial markets themselves have had on the creation and acceleration of the conflict. In Financial Cold War: A View of Sino-US Relations from the Financial Markets, market structure and geopolitical finance expert James Fok explores the nuances of China-US relations from the perspective of the financial markets. The book helps readers understand how imbalances in the structure of global financial markets have singularly contributed to frictions between the two countries. In this book, readers will find: A comprehensive examination of the development of financial markets in both China and the US, as well as the current US dollar-based global financial system Insightful observations of the roles of technology, innovation, regulation, taxation, and politics in the markets, and on their resulting effect on US-Sino relations Thorough explorations of the role of Hong Kong as an intermediary for capital flows between China and the rest of the world Suggestions for how, balancing the many varying interests, policymakers might be able to devise effective strategies for de-escalating current Sino-US tensions Financial Cold War is a can't-miss resource for anyone personally or professionally interested in the intersection of economics and international relations, financial markets, and the infrastructure underlying the international financial system.

Modern Military Geography Francis Anthony Galgano,Eugene Joseph Palka,2011 First Published in 2011. Routledge is an imprint of Taylor & Francis, an informa company.

The Changing Nature of Geostrategy 1900-2000 - The Evolution of a New Paradigm Air University Press,Tal Tov,2019-07-11 Military history is rife with examples of operational successes and failures stemming from the geographical environment. However, are twenty-first-century military operations also contingent on the geographical-physical dimension? Major technological advances during the last hundred years have led to a change in the concept of the physical line of operations. These developments led to the gradual contraction of this line, bringing about its near extinction or virtualization. Dr. Paul Springer observes in the book's foreword that the notion that lines of communication might be made irrelevant to modern warfare revolutionized the concept of geostrategy and led to many modern American military practices, including the ability to base attack forces within the continental United States but still threaten enemy forces worldwide. He adds that Dr. Tov's work promises an interesting examination of whether the principles of geostrategy, which have governed human conflict for millennia, might have receded in importance or even ceased to matter at all.

ECCWS2016-Proceedings fo the 15th European Conference on Cyber Warfare and Security " Robert Koch,Gabi Rodosek,2016-06-15 These proceedings represent the work of researchers participating in the 15th European Conference on Cyber Warfare and Security (ECCWS 2016) which is being hosted this year by the Universitat der Bundeswehr, Munich, Germany on the 7-8 July 2016. ECCWS is a recognised event on the International research conferences calendar and provides a valuable plat-form for individuals to present their research findings, display their work in progress and discuss conceptual and empirical advances in the area of Cyberwar and Cyber Security. It provides an important opportunity for researchers and managers to come together with peers to share their experiences of using the varied and ex-panding range of Cyberwar and Cyber Security research available to them. With an initial submission of 110 abstracts, after the double blind, peer review process there are 37 Academic research papers and 11 PhD research papers, 1 Master's research paper, 2 Work In Progress papers and 2 non-academic papers published in these Conference Proceedings. These papers come from many different coun-tries including Austria, Belgium, Canada, Czech Republic, Finland, France, Germany, Greece, Hungary, Ireland, Kenya, Luxembourg, Netherlands, Norway, Portugal, Romania, Russia, Slovenia, South Africa, Sweden, Turkey, UK and USA. This is not only highlighting the international character of the conference, but is also promising very interesting discussions based on the broad treasure trove of experience of our community and partici-pants.

World Politics of Peace and War Johan Galtung,2015 Examines the role of geography and civilization in past, present, and future world politics. The book offers a view into the future, a prognosis, and proposals for strategy away from war, toward peace. This book is intended for students and specialists in international relations as an overview seen from the world, not one particular region.

Small States and the New Security Environment Anne-Marie Brady,Baldur Thorhallsson,2020-11-23 This book examines the security, defence and foreign policy choices and challenges of small states in NATO and its small partner states in the new security environment. The main aim of the book is to analyse how these states are dealing with current and emerging security challenges and how they might better prepare for these challenges. A special focus is on 'new' security threats and solutions, such as drones and hybrid warfare. Simultaneously, the book focusses on how small states are responding to emerging 'old threats', such as Russian aggression in its neighbouring states and increased activity in the North Atlantic. The book makes an attempt to answer questions like: How are the small states of NATO and its small partner states adjusting to the new geo-political and geo-economic environment? Do

small states in NATO manage the tension between alliance commitments differently from small states that are not members of NATO? What are the core strategic interests of the NATO and non-NATO partner small states? The book is about the external dimension of inherent size-related difficulties in states and how small states compensate for their inbuilt structural weaknesses compared with their larger neighbouring states. One third of the member states of NATO are small and most NATO partner states are small states too. Small states frequently have a disproportionate effect on global politics and they are more often affected by global shifts of power, yet they have less resources available to address security challenges. The aim of the book is to enhance the understanding of the role of small states in the changing global international security environment. The book presents the theory of shelter (which is derived from the diverse and extensive literature on small states) and uses it to examine how small states respond to new and old security threats. Shelter theory addresses three interrelated issues of common concerns to small states: the reduction of risk before a possible crisis event, assistance in absorbing shocks in times of crises, and help in recovering after such an event. In short, shelter theory claims that small states need external shelter in order to survive and prosper. They are dependent on the economic, political, and societal shelter provided by larger states, as well as regional and international organizations.

War by Other Means Robert D. Blackwill,Jennifer M. Harris,2016-04-11 Nations carry out geopolitical combat through economic means. Yet America often reaches for the gun over the purse to advance its interests abroad. Robert Blackwill and Jennifer Harris show that if U.S. policies are left uncorrected, the price in blood and treasure will only grow. Geoeconomic warfare requires a new vision of U.S. statecraft.

The Brink of 2036: Why There Must Be a War in the Asia-Pacific Dr. Strobe Driver,2024-01-05 War and conflict never occur ‘in a vacuum,’ as there are always signallers and events that indicate and then dictate the onset of an upheaval. This has been true of relatively minor conflicts such as the Japan – Russo War of (1904 – 1905), the Vietnam War (1963 – 1975), the Afghanistan War (2001 – ongoing) and the major ‘total wars’ of World War One (1914 – 1918); and World War Two (1939 – 1945). There is a new and emerging war that is about to happen and its epicentre will be in the Asia-Pacific, and more specifically, the historic, contemporary and emerging issues associated with China – Taiwan tensions are a continuum; and show no sign of abatement or downward-moderation. The signals are there and they consist of but are not limited to, the historic baggage of China’s ‘ownership’ of Taiwan; of this factor being rejected by consecutive governments of Taiwan; China’s increasing sclerotic (irredentist) demands and policies toward Taiwan; the steadfastness of Taiwan’s attempts at recognition as an independent cum sovereign entity; other Asia-Pacific and international actors attempting to intervene in the region; and the uncertainties associated with who will help defend Taiwan. All are signals. Within them there is and remains a continuous rise in tensions of which – and is held within the title of this book – remains the ‘tipping point’ of 2036. There are many reasons for this date to be used as a pivot point and they are explored in detail in the lead up to this date, and whilst the outcome is due to current machinations not subsiding (and will only continue to deteriorate), the contention is and remains not whether a war will occur, but when. The magnitude of the war that will take place demands the inherent complexities be considered, understood and explored in detail. This book is a significant step in that direction.

Oceans Rise Empires Fall Gerard Toal,2024 In the last few years, it has become abundantly clear that the effects of accelerating climate change will be catastrophic, from rising seas to more violent storms to desertification. Yet why do nation-states find it so difficult to implement transnational policies that can reduce carbon output and slow global warming? In *Oceans Rise, Empires Fall*, Gerard Toal explains why geopolitical competition is the primary obstacle. In a world of interstate rivalry, nations tend to always prioritize acquiring the fossil fuels necessary for growth in the short term over working toward a zero-carbon future.

Violent Cartographies Michael J. Shapiro,1997 An innovative critique of the way historians and political scientists study war. How can we resist a nation-state vision of the globe? What is needed to unmap the familiar world? In *Violent Cartographies*, Michael J. Shapiro considers these questions, exploring the significance of war in contemporary society and its connections to the geographical imaginary. Employing an ethnographic perspective, Shapiro uses whiplash reversals and bizarre juxtapositions to jolt readers out of conventional thinking about international relations and security studies. Considering the ideas of thinkers ranging from von Clausewitz to Virilio, from Derrida to DeLillo, Shapiro distances readers from familiar political and strategic accounts of war and its causes. Shapiro uses literary and film analyses to elucidate his themes. For example, he considers such cultural artifacts as U.S. Marine recruiting television commercials, American war movies, and General Schwarzkopf's autobiography, elaborating how a certain image of American masculinity is played out in the military imaginary and in the media. Other topics are Melville's *The Confidence Man*, Bunuel's film *That Obscure Object of Desire*, and a comparison of the U.S. invasion of Grenada to an Aztec flower war. Throughout, Shapiro draws attention to the violence of the colonial encounters through which many modern nation-states were formed, and ultimately suggests possible directions for an ethics of minimal violence in the encounter with others. The overall effect is of a complex, cumulative, and layered analysis of the historical and moral conditions of the current use of violence in the conduct of international relations. A fascinating andchallenging work, *Violent Cartographies* will interest anyone concerned with the connections between war and culture.
