Geogames and Geoplay Ola Ahlqvist, Christoph Schlieder, 2017-11-10 This book brings together contributions from researchers, GIS professionals and game designers to provide a first overview of this highly interdisciplinary field. Its scope ranges from fundamentals about games and play, geographic information technologies, game design and culture, to current examples and forward looking analysis. Of interest to anyone interested in creating and using Geogames, this volume serves as a channel for sharing early experiences, discussing technological challenges and solutions, and outlines a future research agenda. Games and play are part of human life, and in many game activities, place, space and geography plays a central role in determining the rules and interactions that are characteristic of each game. Recent developments and widespread access to mobile information, communication, and geospatial technologies have spurred a flurry of developments, including many variations of gaming activities that are situated in, or otherwise connected to the real world.

Cultural Heritage Education in the Everyday Landscape Camilla Casonato, Bertrando Bonfantini, 2022-12-01 This book summarizes work being undertaken within the School Activates Resources—stitching the lost heritage of the suburbs (ScAR) project, which addressed cultural heritage in a broad sense, as a system of values identified by the populations and in constant evolution. This tangible and intangible heritage fuels the promotion of intergenerational and intercultural dialogue and represents an opportunity for resilient social and territorial development. The book ponders the experience gained and the points of view of the different disciplines involved, examines issues such as children and youth participation in civil life or education in cultural heritage and landscape, and presents real-world experiences of heritage education in everyday landscape in difficult contexts and/or concerning poorly recognized and valued cultural heritage.

The Virtual and the Real in Planning and Urban Design Claudia Yamu, Alenka Poplin, Oswald Devisch, Gert De Roo, 2017-10-12 The Virtual and the Real in Planning and Urban Design: Perspectives, Practices and Applications explores the merging relationship between physical and virtual spaces in planning and urban design. Technological advances such as smart sensors, interactive screens, locative media and evolving computation software have impacted the ways in which people experience, explore, interact with and create these complex spaces. This book draws together a broad range of interdisciplinary researchers in areas such as architecture, urban design, spatial planning, geoinformation science, computer science and psychology to introduce the theories, models, opportunities and uncertainties involved in the interplay between virtual and physical spaces. Using a wide range of international contributors, from the UK, USA, Germany, France, Switzerland, Netherlands and Japan, it provides a framework for assessing how new technology alters our perception of physical space.

The Routledge Companion to Games in Architecture and Urban Planning Marta Brković Dodig, Linda N. Groat, 2019-11-25 The Routledge Companion to Games in Architecture and Urban Planning aims to identify and showcase the rich diversity of games, including: simulation games, game-like approaches, game scenarios, and gamification processes for teaching/learning, design and research in architecture and urban planning. This collection creates an opportunity for exchange and reflection on games in architecture and urban planning. Theoretical discussions, descriptive accounts, and case studies presenting empirical evidence are featured; combined with reflections, constructive critical analysis, discussions of connections, and various influences on this field. Twenty-eight international contributors have come together from eleven countries and five continents to present their studies on games in architecture and urban planning, pose new questions, and advocate for innovative perspectives.

American Life and Video Games from Pong to Minecraft Kathryn Hulick, 2016-07-15 Video games have taken America by storm. Readers will learn about the rise of gaming culture from the first games like Pong to the sensation of Minecraft. This book also examines some of the controversies and innovative technologies that have made gaming one of America's favorite pastimes.

Places of the Heart Colin Ellard, 2015-08-17 Library of Science Book Club selection Discover magazine "What to Read" selection "A really great book." –IRA FLATOW, Science Friday "One of the finest science writers I've ever read." –Los Angeles Times "Ellard has a knack for distilling obscure scientific theories into practical wisdom." –New York Times Book Review "[Ellard] mak[es] even the most mundane entomological experiment or exegesis of psychological geekspeak feel fresh and fascinating." –NPR "Colin Ellard is one of the world's foremost thinkers on the neuroscience of urban design. Here he offers an entirely new way to understand our cities—and ourselves." –CHARLES MONTGOMERY, author of Happy City: Transforming Our Lives Through Urban Design Our surroundings can powerfully affect our thoughts, emotions, and physical responses, whether we're awed by the Grand Canyon or Hagia Sophia, panicked in a crowded room, soothed by a walk in the park, or tempted in casinos and shopping malls. In Places of the Heart, Colin Ellard explores how our homes, workplaces, cities, and nature—places we escape to and can't escape from—have influenced us throughout history, and how our brains and bodies respond to different types of real and virtual space. As he describes the insight he and other scientists have gained from new technologies, he assesses the influence these technologies will have on our evolving environment and asks what kind of world we are, and should be, creating. Colin Ellard is the author of You Are Here: Why We Can Find Our Way to the Moon, but Get Lost in the Mall. A cognitive neuroscientist at the University of Waterloo and director of its Urban Realities Laboratory, he lives in Kitchener, Ontario.

Entertainment Computing – ICEC 2006 Matthias Rauterberg, Marco Combetto, 2006-10-01 This book constitutes the refereed proceedings of the 5th International Conference on Entertainment Computing, ICEC 2006. The 17 revised full papers, 17 revised short papers and 28 poster papers presented together with one keynote paper were carefully reviewed and selected. CyberGIS for Geospatial Discovery and Innovation Shaowen Wang, Michael F. Goodchild, 2018-06-26 This book elucidates how cyberGIS (that is, new-generation geographic information science and systems (GIS) based on advanced computing and cyberinfrastructure) transforms computation- and data-intensive geospatial discovery and innovation. It comprehensively addresses opportunities and challenges, roadmaps for research and development, and major progress, trends, and impacts of cyberGIS in the era of big data. The book serves as an authoritative source of information to fill the void of introducing this exciting and growing field. By providing a set of

representative applications and science drivers of cyberGIS, this book demonstrates how cyberGIS has been advanced to enable cutting-edge scientific research and innovative geospatial application development. Such cyberGIS advances are contextualized as diverse but interrelated science and technology frontiers. The book also emphasizes several important social dimensions of cyberGIS such as for empowering deliberative civic engagement and enabling collaborative problem solving through structured participation. In sum, this book will be a great resource to students, academics, and geospatial professionals for leaning cutting-edge cyberGIS, geospatial data science, high-performance computing, and related applications and sciences.

Games and Play in the Creative, Smart and Ecological City Dale Leorke,Marcus Owens,2020-12-30 This book explores what games and play can tell us about contemporary processes of urbanization and examines how the dynamics of gaming can help us understand the interurban competition that underpins the entrepreneurialism of the smart and creative city. Games and Play in the Creative, Smart and Ecological City is a collection of chapters written by an interdisciplinary group of scholars from game studies, media studies, play studies, architecture, landscape architecture and urban planning. It situates the historical evolution of play and games in the urban landscape and outlines the scope of the various ways games and play contribute to the city's economy, cultural life and environmental concerns. In connecting games and play more concretely to urban discourses and design strategies, this book urges scholars to consider their growing contribution to three overarching sets of discourses that dominate urban planning and policy today: the creative and cultural economies of cities; the smart and playable city; and ecological cities. This interdisciplinary work will be of great interest to students and scholars of game studies, play studies, landscape architecture (and allied design fields), urban geography, and art history.
