Games and Play in the Creative, Smart and Ecological City Dale Leorke, Marcus Owens, 2020-12-30 This book explores what games and play can tell us about contemporary processes of urbanization and examines how the dynamics of gaming can help us understand the interurban competition that underpins the entrepreneurialism of the smart and creative city. Games and Play in the Creative, Smart and Ecological City is a collection of chapters written by an interdisciplinary group of scholars from game studies, media studies, play studies, architecture, landscape architecture and urban planning. It situates the historical evolution of play and games in the urban landscape and outlines the scope of the various ways games and play contribute to the city's economy, cultural life and environmental concerns. In connecting games and play more concretely to urban discourses and design strategies, this book urges scholars to consider their growing contribution to three overarching sets of discourses that dominate urban planning and policy today: the creative and cultural economies of cities; the smart and playable city; and ecological cities. This interdisciplinary work will be of great interest to students and scholars of game studies, play studies, landscape architecture (and allied design fields), urban geography, and art history. Discovering the everyday landscape Camilla Casonato, Marco Vedoà, Gloria Cossa, 2022-10-14 Heritage and landscape education is crucial to training young people in active and responsible citizenship, protection of the public assets, appreciation of the cultural diversity and intergenerational dialogue. Therefore, it cannot be limited to sporadic experiences and on outstanding heritage and contexts but must be transdisciplinary, inclusive and practicable everywhere. This book relates the research and action project “Scuola Attiva Risorse” (ScAR), winner of the Polisocial Award that recognizes research for social purposes at the Politecnico di Milano. The text describes an experimental and innovative action delivered within the fragile context of the urban peripheries. This participatory process involved schools, universities, cultural institutions, administrations and private actors in interpreting and enhancing the “hidden” cultural heritage in Milan’s fringe neighbourhoods.
