The 1848 Revolutions in German-Speaking Europe H.J. Hahn,2014-06-06 In 1848 the continent of Europe was rocked by revolutions: only Great Britain and Russia remained relatively immune to the upheaval. Most spectacularly, the Revolutions swept across the German-speaking lands of central Europe, with the newly-released forces of nationalism and mass popular protest smashing the reactionary Metternich regimes which had held sway since the defeat of Napoleon. The Metternich system was dead: nationalism and national self-determination asserted themselves as the dominant dynamic forces of continental Europe in the later nineteenth century. This impressive history examines the political and social implications of the 1848 Revolutions for the future destiny and shape of Europe as a whole, and explores the wider forces at play in the German lands of nineteenth-century Europe.

Talent Development in European Higher Education Dr. Marca V.C. Wolfensberger,2015-02-10 This book examines the much-debated question of how to unleash the potential of young people with promising intellectual abilities and motivation. It looks at the increasingly important topic of excellence in education, and the shift in focus towards the provision of programs to support talented students in higher education. It provides a systematic overview of programs for talented students at northern European higher education institutions (HEIs). Starting in the Netherlands, where nearly all HEIs have developed honors programs over the past two decades, the book explores three clusters of countries: the Benelux, the Nordic and the German-speaking countries. For each of these countries, it discusses the local culture towards excellence, the structure of the education system, and the presence of honors programs. In total, the book reviews the special talent provisions for nearly four million students at 303 higher education institutions in eleven countries. In addition, it offers an analysis of the reasons to develop such programs, a look into the future of honors education and a practical list of suggestions for further research. The Sirius Program assigned Marca Wolfensberger to carry out this research.

Medical Humanity and Inhumanity in the German-Speaking World Mererid Puw Davies,Sonu Shamdasani,2020-04-15 Medical Humanity and Inhumanity in the German-Speaking World is the first volume dedicated to exploring the interface of medicine, the human and the humane in the German-speaking lands. The volume tracks the designation and making through medicine of the human and inhuman, and the humane and inhumane, from the Middle Ages to the present day. Eight individual chapters undertake explorations into ways in which theories and practices of medicine in the German-speaking world have come to define the human, and highlight how such theories and practices have consolidated, or undermined, notions of humane behaviour. Cultural analysis is central to this investigation, foregrounding the reflection, refraction and indeed creation of these theories and practices in literature, life-writing and other discourses and media. Contributors bring to bear perspectives from literary studies, film studies, critical theory, cultural studies, history, and the history of medicine and psychiatry. Thus, this collection is historical in the most expansive sense, for it debates not only what historical accounts bring to our understanding of this topic. It encompasses too investigation of life-writing, documentary, and theory and literary works to bring to light elusive, paradoxical, underexplored – yet vital – issues in history and culture.

Roma Voices in the German-Speaking World Lorely French, 2015-05-21 The Roma are Europe's largest minority, and yet they remain one of the most misunderstood and underrepresented. Scholarship on the Roma in German-speaking countries has focused mostly on the portrayal of "Zigeuner/Gypsies" in literature by non-Roma and on persecution during the Nazi period. Rarely have scholars examined the actual voices of Roma to glean their perspectives on their social interactions and customs. Without such studies the Roma appear passive in the face of their long and troubled history. With a basis in theories of intersectionality, subalternity, and cultural hybridity, Roma Voices in the German-Speaking World rectifies this image of passivity by analyzing autobiographies, folktales, and novels by Roma, thereby promoting a better understanding of the multifaceted and multifarious cultures alive today in Germany, Austria, and Switzerland. In documenting their voices, Roma writers unveil the large extent to which their personal lives, their social interactions with other Roma and non-Roma, and the images they project of their values and traditions are highly influenced by gender and ethnicity. Anthropological and historical studies have frequently portrayed Romani groups as displaying a patriarchal social structure with highly demarcated roles for men and women. In contrast, the significant parts that both men and women play in disseminating autobiographical, fictional, and historical narratives challenge this ubiquitous notion of largely patriarchal Romani cultures. The insights that both sexes provide on the relationship between gender and ethnicity in the context of cultural taboos, norms, and expectations unveil the complexities and diversities inherent in any minority group and its relationship to the dominant society.

The German-Speaking World Patrick Stevenson, Kristine Horner, Nils Langer, Gertrud Reershemius, 2003-09-02 This accessible textbook offers students the opportunity to explore for themselves a wide range of sociolinguistic issues relating to the German language and its role in societies around the world. It is written for undergraduate students who have a sound practical knowledge of German but who have little or no knowledge of linguistics or sociolinguistics. It combines text with practical exercises and discussion questions to stimulate readers to think for themselves and to tackle specific problems. In Part One Patrick Stevenson invites readers to investigate and reflect on issues about the status and function of the German language in relation to its speakers and to speakers of other languages with which it comes into contact. In Part Two the focus shifts to the forms and functions of individual features of the language. This involves, for example, identifying features of regional speech forms, analysing similarities and differences between written and spoken German, or looking at the 'social meaning' underlying different forms of address. Part Three

explores the relationship between the German language and the nature of 'Germanness'. It concentrates on people's attitudes towards the language, the ways in which it is changing, and their views on what it represents for them.

The German-speaking community of Victoria between 1850 and 1930 Volkhard Wehner ,2018-07 At the time of Australian Federation in 1901, German immigrants constituted two per cent of the population of Victoria. This book examines how they settled, formed a communal infrastructure, and how they related to their Anglo-Celtic hosts. It is shown that their attempts to form a cohesive community failed, by investigating the role played by the Lutheran Church, German associations, community leaders, and the rift between rural and urban communities. The changing relationship between the British Empire, the German Reich and emerging Australian nationalism receives close attention. The book tests and then proves a hypothesis that rural communities were more resilient and better equipped to survive, while urban communities were not.
