*Germany's Comeback in the World Market* Ludwig Erhard,2013-11-05 A great deal has been talked about the economic recovery of Western Germany since the Second World War. It is know htat this recovery was accompanied by the return of the Federal Republic to the markets of the world. Not so much is know abotu the details - about the work effected through the optimism of the Minister for Economics, Professor Ludwig Erhard. In this book, the minister himself speaks. A detailed description is given of the stages by which first the Bizone, and then the Federal Republic, has effected the remarkable comeback which has created keen interest and concern. The book goes into the full detail which might be expected from on who is in charge of the entire machinery. The description of the way in which Government policy was employed to stimulate a free market economy is of great technical interest. Equally important is the detailed description of the way in which every nook and cranny is exploited to give the Federal Republic a foothold in foreign markets. No opportunity is neglected, from the fostering of the most ambitious long-term capital development schemes to the publication of day-to-day reports on trade openings. This book was first published in 1954.

World's Fairs Erik Mattie,1998 As showcases of design, architecture, technology, industry and politics, world's fairs have served as overviews of society's accomplishments as well as barometers of the optimism for the future. While many of the products and ideas promoted at past fairs never materialized, many became commonplace: television, for example, was first shown at the 1939 New York fair. Similarly, while many buildings and landscapes built for fairs have become world-wide icons - the Eiffel Tower, the Crystal Palace, the Barcelona Pavilion, the Seattle Space Needle, the Buckminster Fuller Dome in Montreal - hundreds of splendid structures have been forgotten.

**Colonialism and Modern Architecture in Germany** Itohan Osayimwese,2017-08-11 Over the course of the nineteenth century, drastic social and political changes, technological innovations, and exposure to non-Western cultures affected Germany’s built environment in profound ways. The economic challenges of Germany’s colonial project forced architects designing for the colonies to abandon a centuries-long, highly ornamental architectural style in favor of structural technologies and building materials that catered to the local contexts of its remote colonies, such as prefabricated systems. As German architects gathered information about the regions under their influence in Africa, Asia, and the Pacific—during expeditions, at international exhibitions, and from colonial entrepreneurs and officials—they published their findings in books and articles and organized lectures and exhibits that stimulated progressive architectural thinking and shaped the emerging modern language of architecture within Germany itself. Offering in-depth interpretations across the fields of architectural history and postcolonial studies, Itohan Osayimwese considers the effects of colonialism, travel, and globalization on the development of modern architecture in Germany from the 1850s until the 1930s. Since architectural developments in nineteenth-century Germany are typically understood as crucial to the evolution of architecture worldwide in the twentieth century, this book globalizes the history of modern architecture at its founding moment.
