Full Out Monica Aldama,2023-01-17 From the breakout star of Netflix's *Cheer*, this motivational guide "will inspire you to aim high and succeed no matter what 'getting on mat' means in your life" (Gabi Butler, two-time national cheerleading champion and star of *Cheer*). In *Full Out*, "the Bill Belichick of cheerleading" (The Cut) Coach Monica Aldama shares how she built one of the most successful and beloved cheerleading programs in the country. Her uncompromising brand of discipline and consistency goes far beyond the mat—showing how the principles of building a winning team apply to personal goals, the corporate world, parenting, and all aspects of life. There's a lot of talk these days about shortcuts and life hacks, but what really counts is commitment and integrity, helping your friends, and improving with your teammates. Coach Monica shares deeply personal stories of triumph and tragedy—from divorce and remarriage to her husband, her challenges as a young mother working more than full time, and her strenuous weeks on *Dancing with the Stars*. She shares surprising behind-the-scenes moments from the *Cheer* docuseries, and insights gleaned from more than two

decades of pushing students to succeed. A true force and inspiration who has captured hearts around the world, Coach Monica “delivers the kind of down-to-earth advice we need to be fearless, make excellence a habit, and to bet on ourselves” (Whitney Cummings, comedian and author of I’m Fine... And Other Lies).

Military Families and War in the 21st Century Rene Moelker, Manon Andres, Gary Bowen, Philippe Manigart, 2015-05-14 This book focuses on the key issues that affect military families when soldiers are deployed overseas, focusing on the support given to military personnel and families before, during and after missions. Today’s postmodern armies are expected to provide social-psychological support both to their personnel in military operations abroad and to their families at home. Since the end of the Cold War and even more so after 9/11, separations between military personnel and their families have become more frequent as there has been a multitude of missions carried out by multinational task forces all over the world. The book focuses on three central questions affecting military families. First, how do changing missions and tasks of the military affect soldiers and families? Second, what is the

effect of deployments on the ones left behind? Third, what is the national structure of family support systems and its evolution? The book employs a multidisciplinary approach, with contributions from psychology, sociology, history, anthropology and others. In addition, it covers all the services, Army, Navy/Marines, Air Force, spanning a wide range of countries, including UK, USA, Belgium, Turkey, Australia and Japan. At the same time it takes a multitude of perspectives such as the theoretical, empirical, reflective, life events (narrative) approach, national and the global, and uses approaches from different disciplines and perspectives, combining them to produce a volume that enhances our knowledge and understanding of military families. This book will be of much interest to students of military studies, sociology, war and conflict studies and IR/political science in general.

Blackjacks Tony Illman,2017-06-01 This book is based on our lives. It starts very briefly in the United Kingdom and quickly moves to the Eastern Highland of Rhodesia. It moves through our childhood while we're living in the eastern border areas, Umtali, Sabi Tanganda, and Chipinga. As we pass through our teenage years and become adults, it travels with us to Western Australia and then back to Chipinga. We share the lives of others as the Rhodesian Bush War escalates in what was a

quiet and idyllic country town to one of the most dangerous and deadly districts in Rhodesia. Then the books deals with our final move back to Western Australia and our struggle to once again build a life for our children and ourselves. To most people, this may seem to be an unusual life, but to a Rhodesian, it would be considered pretty much the same story as many other families. Although it is our story, there are many stories told by others who have shared our way of life. It is about love, hate, and humor. It is about determination and desperation. It is about life and death and friendship and community spirit. Most of all, I hope it is a monument to those who died or were seriously injured, physically or mentally, black or white. It is also a salute to those incredible farmers, the Rhodesian armed forces, and those who worked in the rural areas during those troubled times. For me personally, writing this book has been a huge emotional journey.

Composing Questions Hadas Kotek, 2019-02-19 An investigation of the syntax and semantics of wh-questions through the lens of intervention effects, offering a new proposal on overt and covert wh-movement. In this book, Hadas Kotek investigates the syntax and semantics of wh-questions, offering a new solution to a central question in the study of interrogatives: given that overt wh-movement is cross-linguistically common, is syntactic movement a prerequisite for the interpretation of wh-phrases? Some linguists argue that all wh-phrases undergo movement to interrogative C, even if covertly; others propose mechanisms of in-situ interpretation that do not require any movement. Kotek moves beyond these positions to argue that wh-in-situ does move covertly, but not necessarily to C. Instead, she contends, wh-in-situ undergoes a short movement step akin to covert scrambling. This makes the LF behavior of English parallel to the overt behavior of German. Kotek presents a series of self-paced reading experiments, alongside judgment data from German, to substantiate the idea of covert

scrambling. She introduces new diagnostics for the underlying structure of questions, using as a principal tool the distribution of intervention effects. This system allows her to offer the first unified account for a range of phenomena of interrogative syntax-semantics as pied-piping, superiority effects, the cross-linguistically varied syntax of questions, and intervention effects. Kotek develops a theory of interrogative syntax-semantics; studies the phenomena of intervention effects in wh-questions, proposing that the nature of intervention is crucially tied to the availability of wh-movement in a question; and shows that covert wh-movement should be modeled as a short scrambling operation rather than an unbounded, successive-cyclic, and potentially long-distance movement operation.
