Psychiatry in Practice Andrea Fiorillo, Umberto Volpe, Dinesh Bhugra, 2016-03-03 Psychiatry in Practice: Education, Experience, and Expertise provides detailed advice and useful tips for early career psychiatrists, and all others who wish to enhance their practical psychiatry skills. Each chapter is written by prominent early career psychiatrists from around the world, offering relevant and timely advice to those who are newly qualified, as well as a global perspective on the practical issues faced today. Covering a variety of topics from 'Psychiatric Emergencies' to 'Ethics and clinical practice in psychiatry', chapters include vignettes of scenarios that may be encountered, making this book pertinent and easily applicable to many early career situations. Skills related to personal management and managing resources are often not taught during training but are key to establishing a career in psychiatry - this book will help the new clinician to develop professionally. The emphasis on practicality ensures psychiatrists are prepared for the needs of the modern health service and society at large, and ensures patients across the world experience the best treatment available.

Neurobiology of Depression Joao Luciano de Quevedo, Andre Ferrer Carvalho, Carlos A. Zarate, 2019-01-03

Neurobiology of Depression: Road to Novel Therapeutics synthesizes the basic neurobiology of major depressive disorder with discussions on the most recent advances in research, including the interacting pathways implicated in the pathophysiology of MDD, omics technologies, genetic approaches, and the development of novel optogenetic approaches that are changing research perspectives and revolutionizing research into depression. These basic foundational understandings on the neurobiology underlying the disorder, along with a comprehensive summary of the most recent advances in research are combined in this book to aid advanced students and researchers in their understanding of MDD. Depression is one of the most common mental-health disorders caused by a variety of genetic, biological, environmental and psychological factors. Major depressive disorder (MDD) is typically treated with first-line antidepressant agents that primarily target monoamine neurotransmission. However, only approximately one-third of patients with MDD achieve remission following a trial with such an antidepressant. Furthermore, MDD is a heterogeneous phenotype, and new frameworks, such as the NIMH Research Domain Criteria (RDoC) may provide a more accurate, biologically based comprehension of the symptomatic heterogeneity of this devastating illness. Aids readers in understanding major depressive disorder in the context of NIMH Research Domain Criteria (RDoC) recommendations Covers a range of existing and potential pharmacologic and non-pharmacologic treatment options, from lifestyle adjustments, to antidepressants and novel therapeutics Synthesizes discussions on the cellular and molecular mechanisms underlying symptoms

with the clinical aspects of depression

An Introduction to Service Design Lara Penin,2018-05-17 A comprehensive introduction to designing services according to the needs of the customer or participants, this book addresses a new and emerging field of design and the disciplines that feed and result from it. Despite its intrinsic multidisciplinary, service design is a new specialization of design in its own right. Responding to the challenges of and providing holistic, creative and innovative solutions to increasingly complex contemporary societies, service design now represents an integrative and advanced culture of design. All over the world new design studios are defining their practice as service design while long established design and innovation consultancies are increasingly embracing service design as a key capacity within their offering. Divided into two parts to allow for specific reader requirements, Service Design starts by focusing on main service design concepts and critical aspects. Part II offers a methodological overview and practical tools for the service design learner, and highlights fundamental capacities the service design student must master. Combined with a number of interviews and case studies from leading service designers, this is a comprehensive, informative exploration of this exciting new area of design.

Technology and the Historian Adam Crymble, 2021-04-13

Charting the evolution of practicing digital history Historians have seen their field transformed by the digital age. Research agendas, teaching and learning, scholarly communication, the nature of the archive—all have undergone a sea change that in and of itself constitutes a fascinating digital history. Yet technology's role in the field's development remains a glaring blind spot among digital scholars. Adam Crymble mines private and web archives, social media, and oral histories to show how technology and historians have come together. Using case studies, Crymble merges histories and philosophies of the field, separating issues relevant to historians from activities in the broader digital humanities movement. Key themes include the origin myths of digital historical research; a history of mass digitization of sources; how technology influenced changes in the curriculum; a portrait of the self-learning system that trains historians and the problems with that system; how blogs became a part of outreach and academic writing; and a roadmap for the continuing study of history in the digital era.

The Internationalization of China's Equity Markets Juan J. Cortina, Mr. Maria Soledad Martinez Peria, Mr. Sergio L. Schmukler, Jasmine Xiao, 2023-02-10 China's equity markets internationalization process started in the early 2000s but accelerated after 2012, when Chinese firms' shares listed in Shanghai and Shenzhen gradually became available to international investors. This paper studies the effects of the post-2012 internationalization events by comparing the evolution of equity financing and investment activities for: (i) domestic listed firms relative to firms that already had access to international investors and (ii) domestic listed firms that were directly connected to international markets relative to those that were not. The paper finds large increases in financial and investment activities for domestic listed and for connected firms, with significant aggregate effects. The evidence also suggests the

rise in firms' equity issuances was primarily and initially financed by domestic investors. International investors' portfolio holdings in Chinese equity markets and ownership in firms increased markedly only once Chinese firms' locally issued shares became part of the MSCI Emerging Markets Index.

Chinese and Global Financial Integration through Stock Connect Flora Huang, 2023-10-19 This significant and timely book explores a novel market mechanism, Stock Connect, which gives mutual market access to Chinese and international investors, and provides original analyses and fresh insights. This mechanism could become the new normal in future global financial integration. By examining this cross-border scheme from a regulatory perspective via a three-tiered analytical framework (investors, issuers and regulators), this book unearths the profound implications of Stock Connect to local and global financial markets and the legal impediments to its implementation. It covers a broad range of topics in this cross-boundary investment channel, including an overview of four existing connectivity arrangements (Shanghai-Hong Kong, Shenzhen-Hong Kong, Shanghai-London and China-Switzerland), the uniqueness of these connectivity arrangements, investor protection, regulations of connect issuers, regulatory cooperation and enforcement, the impacts on local and global financial markets, the implications for the world market connectivity as well as the challenges and future of Stock Connect. This pioneering study will appeal to a broad range of readers who are interested in the on-going reshaping of international financial systems and China's emerging influence in the international financial order.
