Ghost Hunters Canon 03 S H Marpel,C C Brower,J R Kruze,2020-11-29 It was a dark and stormy night, and everyone was sitting around the glowing fireplace, safe and warm against the raging weather outside. Someone said, 'John, tell us a story.' So John began... The story Ghost Hunters started a series with two spirit-guides recruiting the human John Earl Stark, a mystery writer and part-time cattle farmer. Since that humble beginning, an expanding team of spirit-guides and

even goddesses have joined the Library in its mission to help ghosts and other beings in trouble - to solve their own mysteries. And then John writes up their stories all as fiction - because no one would believe these tales otherwise. But the stage was set from that first book - that all beings should be treated with respect, and the way to solve a mystery is to get the story told. This third canon completes the first three years of this series, with an additional 16 stories that enlighten, entertain, and inspire readers over and over. Because they are written simply, and not as throwaway fiction, but stories that you get something new from on each reading. Mysteries that seem to be re-writing themselves in between readings - because they change the reader with the ideas in them. And after his first three years of writing, it's pretty straight forward if you stick to reading them in sequence. So - that is what's recommended. (But you can dive into the many peripheral series of stories collected by subject. These add a wealth of details and adventures to the various characters...) With these canons, reading is simpler. The second canon picked up where the first left off. And this third canon picks up from the second. This now becomes your next assignment. It's on you if you read out of order. (But it's tempting...) Never before published into single volumes, these stories will leave you wondering why no one has treated ghosts like this before. But then, if you were in their shoes, wouldn't you appreciate such treatment? Yes, even if you're a goddess. Those, too. This anthology contains: Ghost Hunters Anthology 09 by

**Ghost Hunters** William W. Lace, 2009-08 Do ghosts exist? Groups of ghost hunters are bringing modern technology to bear in seeking answers to this age-old question. This book tells how ghost hunters go about their investigations--using devices such as those that monitor or measure changes in light, sound, and temperature--and to what extent they have succeeded. It also examines the divide between those who see ghost hunting as science and those who see it as something less.

*Historic Ghosts and Ghost Hunters* H. Addington Bruce, 2014-08-23 From the preface: The following pages represent in the main a discussion of certain celebrated mysteries, as viewed in the light of the discoveries set forth in the writer's earlier work *The Riddle of Personality*. That dealt, it may briefly be recalled, with the achievements of those scientists whose special endeavor it is to illumine the nature of human personality. On the one hand, it reviewed the work of the psychopathologists, or investigators of abnormal mental life; and, on the other hand, the labors of the psychical researchers, those

enthusiastic and patient explorers of the seemingly supernormal in human experience. Emphasis was laid on the fact that the two lines of inquiry are more closely interrelated than is commonly supposed, and that the discoveries made in each aid in the solution of problems apparently belonging exclusively in the other. To this phase of the subject the writer now returns. The problems under examination[Pg x] are, all of them, problems in psychical research: yet, as will be found, the majority in no small measure depend for elucidation on facts brought to light by the psychopathologists. Of course, it is not claimed that the last word has here been said with respect to any one of these human enigmas. But it is believed that, thanks to the knowledge gained by the investigations of the past quarter of a century, approximately correct solutions have been reached; and that, in any event, it is by no means imperative to regard the phenomena in question as inexplicable, or as explicable only on a spiritistic basis. Before attempting to solve the problems, it manifestly was necessary to state them. In doing this the writer has sought to present them in a readable and attractive form, but without any distortion or omission of material facts.
