Consumer Behaviour Isabelle Szmigin,Maria Piacentini,2014-11-06 Presenting a brand new approach to teaching consumer behaviour, Szmigin and Piacentini move beyond traditional psychological learning to acknowledge more holistic perspectives of consumer behaviour and incorporate new areas of research, such as Consumer Culture Theory, which are enhancing our understanding of this fascinating subject. The latest behavioural, psychological and sociological approaches are presented alongside emerging techniques, such as neuromarketing, with their application to marketing explicitly drawn out. Theory is firmly set in context for students through extensive use of international examples and extended cases on topics such as repertoire shopping in China, lifestyles of Indian consumers, and learning about brands through Havaianas in Brazil. Each chapter includes Consumer Insights covering topics such as social media marketing in the Netherlands, repositioning Lucozade in the UK, and finding the right celebrity endorser. These features bring together the themes discussed and encourage students to engage with the material on a more practical level. Central to the book is the recognition of how businesses and government are likely to use knowledge of these theories and techniques in marketing strategies and business decision making. Each chapter includes a Practitioner Insight from a professional working in marketing, advertising, government or charity, including Dubit, Thinkbox and Age UK to provide real world views on the topics being discussed and the possible future direction of these areas. The authors acknowledge consumer behaviour as a research discipline. To reflect this, Research Insights features throughout each chapter include links to seminal papers to present students with the opportunity to take their learning further. The accompanying Online Resource Centre provides superior ready-to-use support for both students and lecturers: For students: * Author blog, responding to changes within the subject and supporting the currency of the textbook; * Web links illustrating consumer behaviour in practice including examples from print, video and web; * Multiple choice questions with instant feedback; * Links to seminal articles as highlighted in the Research Insights feature; * Web exercises to encourage students to test their knowledge and apply their learning; * Flashcard glossary to test understanding of key terms. For lecturers: * Comprehensive customizable PowerPoint slides; * Learning activities (including, more detailed workshop-based activities, shorter lecture-based in-class exercises and suggestions for assessment approaches) * An instructor's manual (containing guidance on how to use the case studies and Practitioner Insights in class, indicative answers, and some additional questions).

The Attention Deficit Swati Bhatt,2019-09-05 Digital technology has enabled connectivity on an unimagined scale. Human beings are social animals and economic activity promotes this socialization. Market transactions are based on optimism about the future, faith that the world is good and trust that growth is organic or coming from within the system. Individuals therefore invest in the future by having children, by extending credit and accepting risk, and by building connections with others in the sincere expectation of this connectivity being reciprocated. This book explores the unintended consequences of ubiquitous connectivity. The first effect is captured by the sharing model. Technology offers multiple avenues for sharing experiences and personal information, so active engagement with this increased content uses mental effort. Connection inevitably leads to comparisons with other groups and individuals, so despite the benefits of affirmation and group inclusion, these links corrode social networks, leading to depression and mental apathy. The second effect—the result of the commercialization of sharing—is encapsulated in the attention deficit model. Loss

of self-worth, driven by the first effect, encourages further connectivity and sharing as buyers seek more comfort and reassurance via social media, paying with time and personal information. The product is digital content and the payment is with time and data. Correspondingly, social media fulfills this demand with exuberance, both via user-generated content and commercially curated content. We are overwhelmed with even more information, paying with increasingly scarce time and attention. Finally, the third and most consequential effect is diminished risk taking. Attention scarcity, as a consequence of the content tsunami, throttles cognitive effort, impairing judgment and decision-making. So the safe bet may be to do nothing . . . take no risks and no gambles. Weaving together the latest research on economics, psychology, and neuroscience, this book fills a void for readers wanting a smart, clear analysis of communications markets and the commercialization of Internet-inspired connectivity.
