**Microsimulation as a Tool for the Evaluation of Public Policies** Amedeo Spadaro,2007 Los desarrollos en el ámbito de la investigación sobre la evaluación de políticas públicas están experimentando actualmente un gran avance. En este contexto, las técnicas de microsimulación -basadas en la representación del comportamiento de los individuos frente a cambios reales o hipotéticos en su entorno económico e institucional- han adquirido particular relevancia por su capacidad para evaluar a priori diferentes escenarios y facilitar la toma de decisiones. Las técnicas de simulación se realizan con modelos de absoluta precisión y exactitud que permiten estudiar y predecir el impacto y los efectos de una política sobre una muestra de individuos, familias o empresas representativa de la población total. Este libro presenta la microsimulación como técnica de evaluación de las políticas públicas, al mismo tiempo que propone una revisión razonada de los recientes avances. Una conclusión común es que, gracias a un modelo de microsimulación, es posible identificar la mejor política de redistribución posible (en el sentido de maximizar una determinada función de bienestar social). De manera general, mediante el uso de esta técnica es posible hacer complementarios los enfoques macro de equilibrio económico general y micro de simulación de los comportamientos individuales. La presente publicación ofrece una herramienta de referencia a investigadores, académicos, políticos y analistas.

**Computational Methods for Multi-Omics Data Analysis in Cancer Precision Medicine** Ehsan Nazemalhosseini-Mojarad ,Claudia Cava,2023-08-02 Cancer is a complex and heterogeneous disease often caused by different alterations. The development of human cancer is due to the accumulation of genetic and epigenetic modifications that could affect the structure and function of the genome. High-throughput methods (e.g., microarray and next-generation sequencing) can investigate a tumor at multiple levels: i) DNA with genome-wide association studies (GWAS), ii) epigenetic modifications such as DNA methylation, histone changes and microRNAs (miRNAs) iii) mRNA. The availability of public datasets from different multi-omics data has been growing rapidly and could facilitate better knowledge of the biological processes of cancer. Computational approaches are essential for the analysis of big data and the identification of potential biomarkers for early and differential diagnosis, and prognosis.

*Colorblind Tools* Marzia Milazzo,2022-10-15 A study of anti-Blackness and white supremacy across four continents demonstrates that colorblindness is neither new nor a subtype of racist ideology, but a constitutive technology of racism In Colorblind Tools, Marzia Milazzo offers a transnational account of anti-Blackness and white supremacy that pushes against the dominant emphasis on historical change pervading current racial theory. This emphasis on change, she contends, misses critical lessons from the past. Bringing together a capacious archive of texts on race produced in Brazil, Cuba, Mexico, Panama, the United States, and South Africa from multiple disciplines and genres, Milazzo uncovers transnational continuities in structural racism and white supremacist discourse from the inception of colonial modernity to the present. In the process, she traces the global workings of what she calls colorblind tools: technologies and strategies that at once camouflage and reproduce white domination. Whether examining Rijno van der Riet's defense of slavery in the Cape Colony, discourses of racial mixture in Latin American eugenics and their reverberations in contemporary scholarship, the pitfalls of white "antiracism," or Chicana indigenist aesthetics, Milazzo illustrates how white people collectively disavow racism to maintain power across national boundaries, and how anti-Black and colonial logics can be reproduced even in some decolonial literatures. Milazzo's groundbreaking study proves that colorblindness is not new, nor is it a subtype of racist ideology or a hallmark of our era. It is a constitutive technology of racism—a tool the master cannot do without.

**Discourse, Tools and Reasoning** Lauren B. Resnick,Roger Säljö,Clotilde Pontecorvo,Barbara Burge,2013-06-29 Not long ago, projections of how office technologies would revolutionize the production of documents in a high-tech future carried many promises. The paperless office and the seamless and problem-free sharing of texts and other work materials among co-workers were just around the corner, we were told. To anyone who has been involved in putting together a volume of the present kind, such forecasts will be met with considerable skepticism, if not outright distrust. The diskette, the email, the fax, the net, and all the other forms of communication that are now around are powerful assets, but they do not in any way reduce the flow of paper or the complexity of coordinating activities involved in producing an artifact such as a book. Instead, the reverse seems to be true. Obviously, the use of such tools requires considerable skill at the center of coordination, to borrow an expression from a chapter in this volume. As editors, we have been fortunate to have Ms. Lotta Strand, Linköping University, at the center of the distributed activity that producing this volume has required over the last few years. With her considerable skill and patience, Ms. Strand and her work provide a powerful illustration of the main thrust of most of the chapters in this volume: Practice is a coordination of thinking and action, and many things had to be kept in mind during the production of this volume.

**AMST'05 Advanced Manufacturing Systems and Technology** Elso Kuljanic,2007-03-23 Manufacturing a product is not difficult, the difficulty consists in manufacturing a product of high quality, at a low cost and rapidly. Drastic technological advances are changing global markets very rapidly. In such conditions the ability to compete successfully must be based on innovative ideas and new products which has to be of high quality yet low in price. One way to achieve these objecti ves would be through massive investments in research of computer based technology and by applying the approaches presented in this book. The First International Conference on Advanced Manufacturing Systems and Technology AMST87 was held in Opatija (Croatia) in October 1987. **My Absolute Darling** Gabriel Tallent,2018-06-26 INSTANT NEW YORK TIMES BESTSELLER LA TIMES BOOK PRIZE FINALIST NBCC JOHN LEONARD PRIZE FINALIST ONE OF THE NEW YORK TIMES'S MOST NOTABLE BOOKS OF 2017 ONE OF THE WASHINGTON POST’S MOST NOTABLE BOOKS OF 2017 ONE OF NPR’S ‘GREAT READS’ OF 2017 A USA TODAY BEST BOOK OF THE YEAR AN AMAZON.COM BEST BOOK OF THE YEAR A BUSINESS INSIDER BEST BOOK OF THE YEAR Impossible to put down. —NPR A novel that readers will gulp down, gasping.” —The Washington Post The word 'masterpiece' has been cheapened by too many blurbs, but My Absolute Darling absolutely is one. —Stephen King A brilliant and immersive, all-consuming read about one fourteen-year-old girl's heart-stopping fight for her own soul. Turtle Alveston is a survivor. At fourteen, she roams the woods along the northern California coast. The creeks, tide pools, and rocky islands are her haunts and her hiding grounds, and she is known to wander for miles. But while her physical world is expansive, her personal one is small and treacherous: Turtle has grown up isolated since the death of her mother, in the thrall of her tortured and charismatic father, Martin. Her social existence is confined to the middle school (where she fend off the interest of anyone, student or teacher, who might penetrate her shell) and to her life with her father. Then Turtle meets Jacob, a high-school boy who tells jokes, lives in a big clean house, and looks at Turtle as if she is the sunrise. And for the first time, the larger world begins to come into focus: her life with Martin is neither safe nor sustainable. Motivated by her first experience with real friendship and a teenage crush, Turtle starts to imagine escape, using the very survival skills her father devoted himself to teaching her. What follows is a harrowing story of bravery and redemption. With Turtle's escalating acts of physical and emotional courage, the reader watches, heart in throat, as this teenage girl struggles to become her own hero—and in the process, becomes ours as well. Shot through with striking language in a fierce natural setting, My Absolute Darling is an urgently told, profoundly moving read that marks the debut of an extraordinary new writer.

**Smart and Sustainable Planning for Cities and Regions** Adriano Bisello,Daniele Vettorato,David Ludlow,Claudia Baranzelli,2021 This open access book offers a selection of research papers and case studies presented at the 3rd international conference Smart and Sustainable Planning for Cities and Regions, held in December 2019 in Bolzano, Italy, and explores the concept of smart and sustainable planning, including top contributions from academics, policy makers, consultants and other professionals. Innovation processes such as co-design and co-creation help establish collaborations that engage with stakeholders in a trustworthy and transparent environment while answering the need for new value propositions. The importance of an integrated, holistic approach is widely recognized to break down silos in local government, in particular, when aimed at achieving a better integration of climate-energy planning. Despite the ongoing urbanization and polarization processes, new synergies between urban and rural areas emerge, linking development opportunities to intrinsic cultural, natural and man-made landscape values. The increasing availability of big, real-time urban data and advanced ICT facilitates frequent assessment and continuous monitoring of performances, while allowing fine-tuning as needed. This is valid not only for individual projects but also on a wider scale. In addition, and circling back to the first point, (big) urban data and ICT can be of enormous help in facilitating engagement and co-creation by raising awareness and by providing insight into the local consequences of specific plans. However, this potential is not yet fully exploited in standard processes and procedures, which can therefore lack the agility and flexibility to keep up with the pulse of the city and dynamics of society. The book provides a multi-disciplinary outlook based on experience to orient the reader in the giant galaxy of smart and sustainable planning, support the transposition of research into practice, scale up visionary approaches and design groundbreaking planning policies and tools.--
