Global Infectious Disease Surveillance and Detection Institute of Medicine, Board on Global Health, Forum on Microbial Threats, 2007-11-11 Early detection is essential to the control of emerging, reemerging, and novel infectious diseases, whether naturally occurring or intentionally introduced. Containing the spread of such diseases in a profoundly interconnected world requires active vigilance for signs of an outbreak, rapid recognition of its presence, and diagnosis of its microbial cause, in addition to strategies and resources for an appropriate and efficient response. Although these actions are often viewed in terms of human public health, they also challenge the plant and animal health communities. Surveillance, defined as the continual scrutiny of all aspects of occurrence and spread of a disease that are pertinent to effective control, involves the systematic collection, analysis, interpretation, and dissemination of health data. Disease detection and diagnosis is the act of discovering a novel, emerging, or reemerging disease or disease event and identifying its cause. Diagnosis is the cornerstone of effective disease control and prevention efforts, including surveillance. Disease surveillance and detection relies heavily on the astute individual: the clinician, veterinarian, plant pathologist, farmer, livestock manager, or agricultural extension agent who notices something unusual, atypical, or suspicious and brings this discovery in a timely way to the attention of an appropriate representative of human public health, veterinary medicine, or agriculture. Most developed countries have the ability to detect and diagnose human, animal, and plant diseases. *Global Infectious Disease Surveillance and Detection: Assessing the Challenges-Finding Solutions, Workshop Summary* is part of a 10 book series and summarizes the recommendations and presentations of the workshop.

Essentials of Public Health Preparedness Rebecca Katz, 2013 Katz provides a comprehensive guide for understanding and managing public health emergencies in an increasingly interconnected world. The globalization of the world's food supply and the speed and volume of international travel have increased communities' vulnerability to infectious disease, biological weapons, and new agents anywhere in the world.

Transforming Public Health Surveillance - E-Book Scott McNabb, J Mark Conde, Lisa Ferland, William Macwright, Ziad Memish, Stacy Okutani, Meeyoung Park, Paige Ryland, Affan Shaikh, Vivek Singh, 2016-05-02 Public Health Surveillance (PHS) is of primary importance in this era of emerging health threats like Ebola, MERS-CoV, influenza, natural and man-made disasters, and non-communicable diseases. *Transforming Public Health Surveillance* is a forward-looking, topical, and up-to-date overview of the issues and solutions facing PHS. It describes the realities of the gaps and impediments to efficient and effective PHS, while presenting a vision for its possibilities and promises in the 21st century. The book gives a roadmap to the goal of public health information being available, when it is needed and where it is needed. Led by Professor Scott McNabb, a leader in the field, an international team of the top-notch public health experts from academia,

government, and non-governmental organizations provides the most complete and current update on this core area of public health practice in a decade in 32 chapters. This includes the key roles PHS plays in achieving the global health security agenda and health equity. The authors provide a global perspective for students and professionals in public health. Seven scenarios lay out an aid to understand the context for the lessons of the book, and a comprehensive glossary, questions, bullet points, and learning objectives make this book an excellent tool in the classroom.

Guide for All-Hazard Emergency Operations Planning Kay C. Goss, 1998-05 Meant to aid State & local emergency managers in their efforts to develop & maintain a viable all-hazard emergency operations plan. This guide clarifies the preparedness, response, & short-term recovery planning elements that warrant inclusion in emergency operations plans. It offers the best judgment & recommendations on how to deal with the entire planning process -- from forming a planning team to writing the plan. Specific topics of discussion include: preliminary considerations, the planning process, emergency operations plan format, basic plan content, functional annex content, hazard-unique planning, & linking Federal & State operations.

Digital Formations Robert Latham, Saskia Sassen, 2009-09-19 Computer-centered networks and technologies are reshaping social relations and constituting new social domains on a global scale, from virtually borderless electronic markets and Internet-based large-scale conversations to worldwide open source software development communities, transnational corporate production systems, and the global knowledge-arenas associated with NGO networks. This book explores how such digital formations emerge from the ever-changing intersection of computer-centered technologies and the broad range of social contexts that underlie much of what happens in cyberspace. While viewing technologies fundamentally in social rather than technical terms, *Digital Formations* nonetheless emphasizes the importance of recognizing the specific technical capacities of digital technologies. Importantly, it identifies digital formations as a new area of study in the social sciences and in thinking about globalization. The ten chapters, by leading scholars, examine key social, political, and economic developments associated with these new configurations of organization, space, and interaction. They address the operation of digital formations and their implications for the development of longstanding institutions and for their wider contexts and fields, and they consider the political, economic, and other forces shaping those formations and how the formations, in turn, are shaping such forces. Following a conceptual introduction by the editors are chapters by Hayward Alker, Jonathan Bach and David Stark, Lars-Erik Cederman and Peter A. Kraus, Dieter Ernst, D. Linda Garcia, Doug Guthrie, Robert Latham, Warren Sack, Saskia Sassen, and Steven Weber.

Understanding Global Security Peter Hough, 2004 This work provides an introduction to both the conventional 'hard' security issues which dominated international relations during the Cold War and the 'soft' security issues which have emerged in the post-Cold War era.

Pandemic Influenza Jeffrey R. Ryan, 2008-08-01 The swine flu emergency needn't become a crisis. This critically acclaimed work provides public health officials, doctors, responders, and emergency planners with accurate current information that will help them understand the nature of an outbreak, assess risk, answer public concerns, and develop informed strategies. Devoid of sensationalism and a

Governing Global Health Andrew Cooper, 2016-04-22 Recently global health issues have leapt to the forefront of the international agenda and are now an everyday concern around the world. The war for global health is clearly being lost on many fronts and the massive body count is mounting fast. Re-emerging diseases such as polio and tuberculosis, long thought to be on the verge of elimination, are now coupled with the devastation of newly emerging ones such as SARS and avian influenza. In addition, the shock of bioterrorism has given a tragic poignancy to the importance of studying the failure of the global health governance system. Compiled by renowned specialists, this volume studies the global challenges and responses to these issues, as well as the roles of central institutions such as the World Health Organization, the World Trade Organization and the G8. Health practitioners and clinicians seeking a context for their front-line care provision, as well as scholars and students of global health issues, will find the volume highly valuable.

Global Activism Reader Luc Reydam, 2011-01-13 Suitable for undergraduate students, this title combines essays on actual causes and issues that mobilize activists with theory and concepts of social mobilization. It introduces the various causes, actors, and organization of transnational mobilization to provide a survey of cases and theory.

World Directory of Environmental Organizations Thaddeus C. Trzyna, Julie Didion, 2013-10-18 A reference and sourcebook to the organizations involved in environmental and resource conservation in all parts of the world and to their activities. It describes over 2000 organizations and programmes in over 200 countries, providing access to sources of information, expertise and action. A user's guide identifies who is doing what in over 50 areas, such as air quality, environmental economics, toxic materials and wildlife. There are also regional overviews, detailed analyses of the UN system, over 250 intergovernmental agencies, over 400 international NGOs, and over 1500 national organizations with full country and area listings, plus indices, a glossary and a list of landmark events.

Feminist Strategies in International Governance Gülay Caglar, Elisabeth Prügl, Susanne Zwingel, 2013 The contributors to this volume provide a survey of the existing gender machineries on the international level, explore the way in which feminist movements have approached international organizations and the way IOs have responded, and examine the laws and norms that have been produced and their effects in local contexts globally.

National Strategy for Countering Biological Threats United States. Congress. House. Committee on Foreign Affairs. Subcommittee on Terrorism, Nonproliferation, and Trade, 2010

Global Public Health Vigilance Lorna Weir, Eric Mykhalovskiy, 2010-05-17 Describes and analyzes the transformations in global mechanisms for monitoring infectious disease outbreaks that have occurred since the mid-1990s. This book examines early warning outbreak detection, which operates electronically through the Internet to identify infectious disease outbreaks that may lead to international health emergencies.

Globalisation and COVID-19 Manas Chatterji, Urs Luterbacher, Valérie Fert, Bo Chen, 2023-07-10 Globalisation and COVID-19 examines how the simultaneous immobilisation of billions created a temporary hold on the mobility which constitutes the very irrigation of globalisation.

A Geography of Infection Matthew R. Smallman-Raynor, Andrew D. Cliff, J. Keith Ord, Peter Haggett, 2022-02-10 The last half century has witnessed two landmark events in medical history. The 1970s saw euphoria about the defeat of one of humankind's oldest disease scourges with the global eradication of smallpox. To set against this, the 2020s are experiencing the pandemic ravages of new viral diseases, of which COVID-19 is currently the most potent. But it is only the latest of a succession of threats. A Geography of

Infection explores the distinctive spatial patterns and processes by which such infectious diseases spread from place to place and can grow from local and regional epidemics into global pandemics. This resource focuses initially on the local scale of doctors' practices and small islands where epidemic outbreaks are slight in the numbers infected and in geographical extent. Such local area studies raise two questions. First, how and where do epidemic diseases emerge and second, why do more diseases appear to be emerging now? To approach such questions implies a shift in spatial gear from painting epidemics with a fine-tipped local brush to an expanded palette on which doctors' practices and small islands are replaced by regional and global populations. Simultaneously, time bands are extended backwards to the origins of civilization and forwards into the twenty-first century. It eventually leads to a consideration of global pandemics – both historical (for example, plague, cholera and influenza) and contemporary (HIV/AIDS and COVID-19) and examines the ways the spread of infection can be prevented. All chapters are extensively illustrated with full-colour diagrams and maps – some of which are in colour for the first time. Bringing together the authors' collective 150 years of experience in research, mapping, and writing on spatial aspects of medical history, this is an invaluable resource for anyone interested in the spread, control, and eradication of epidemic and pandemic diseases.

Health Technologies and International Intellectual Property Law Phoebe Li, 2013-12-17 The global transmission of infectious diseases has fuelled the need for a more developed legal framework in international public health to provide prompt and specific guidance during a large-scale emergency. This book develops a means for States to take advantage of the flexibilities of compulsory licensing in the Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS), which promotes access to medicines in a public health emergency. It presents the precautionary approach (PA) and the structure of risk analysis as a means to build a workable reading of TRIPS and to help States embody the flexibilities of intellectual property (IP). The work investigates the complementary roles of the World Health Organization (WHO) and the World Trade Organization (WTO) in order to promote the harmonisation of the precautionary approach in relation to the patenting of crucial pharmaceutical products. By bringing together international trade law and intellectual property law Phoebe Li demonstrates how through the use of risk analysis and the precautionary approach, States can still comply with their legal obligations in international law, while exercising their sovereignty right in issuing a compulsory licence of a drug patent in an uncertain public health emergency. This book will be of great interest to students and academics of medical and healthcare law, intellectual property law, international trade law, and human rights law.

Asymmetries of Conflict John Leech, 2014-04-04 Decisions about defence and security are becoming increasingly open to public influence. This book therefore aims to give both the voter and the decision maker a new vision of how to manage crises and avert hostilities with non-traditional means.
