Scenario Planning - Revised and Updated Mats Lindgren, H. Bandhold, 2009-03-31 Recent research in the field of business strategy has shown that strategic flexibility can be achieved through a scenario planning perspective for long-term competition and performance. The authors have drawn upon examples and case studies to develop a new model for scenario planning that is closely integrated with strategy and innovation.

**Climate of Hope** Michael Bloomberg, Carl Pope, 2017-04-18 The 2016 election left many people who are concerned about the environment fearful that progress on climate change would come screeching to a halt. But not Michael Bloomberg and Carl Pope. They approach climate change from different perspectives, yet they arrive at similar conclusions: without agreeing on every point, they share a belief that cities, businesses, and citizens can lead and win the battle against climate change, no matter which way the political winds in Washington may shift. In *Climate of Hope*, Bloomberg and Pope offer an optimistic look at the challenge of climate change, the solutions they believe hold the greatest promise, and the practical steps that are necessary to achieve them. Writing from their own experiences, and sharing their own stories from government, business, and advocacy, Bloomberg and Pope provide a road map for tackling the most complicated challenge the world has ever faced. Along the way, they turn the usual way of thinking about climate change on its head: from top down to bottom up, from partisan to pragmatic, from costs to benefits, from tomorrow to today, and from fear to hope. Bloomberg and Pope explore climate change solutions that will make the world healthier and more prosperous. They aim to begin a new type of conversation on the issue that will spur bolder action by cities, businesses, and citizens - and even, someday, by Washington.

**Present Shock** Douglas Rushkoff, 2014-02-25 People spent the twentieth century obsessed with the future. We created technologies that would help connect us faster, gather news, map the planet, and compile knowledge. We strove for an instantaneous network where time and space could be compressed. Well, the future's arrived. We live in a continuous now enabled by Twitter, email, and a so-called real-time technological shift. Yet this now is an elusive goal that we can never quite reach. And the dissonance between our digital selves and our analog bodies has thrown us into a new state of anxiety: present shock.

*Lies My Teacher Told Me* James W. Loewen, 2008 Criticizes the way history is presented in current textbooks, and suggests a more accurate approach to teaching American history.

Scenario Planning M. Lindgren, H. Bandhold, 2002-12-04 Recent research in the field of business strategy has shown that strategic flexibility can be achieved through a scenario planning perspective for long term competition and performance. The authors have drawn upon examples and cases to develop a new model for scenario planning that is closely integrated with strategy. They argue that the concept of scenario planning is as much an art as a practical management tool.

*Kairos* Gwyneth Jones, 2021-11-11 London. Early 21st Century. A Conservative government is in power in the UK, bringing increased wealth disparity, an ever-more militant police state, and rising civil discontent as the wealthy govern for themselves rather than the people. But BREAKTHRU - a pharmaceutical company turned religious cult - have the answer. They call it Kairos. Kairos allows the user to not just see a different world, but shape the world to their very will. Perfect for a cult of like-minded individuals. Disastrous when it is exposed to the general public. As disparate groups of people try to shape the world into their own image, reality itself is placed under threat. With society so divided, is there any way to pull the world back together? Written in 1988, this remarkably prescient book received great critical acclaim.

**Visual Media and Culture of 'Occupy'** Pamela Odih, 2014-10-17 On 15th October 2011, hundreds of anti-capitalist protestors assembled into a spectacular carnivalesque procession towards Paternoster Square; the heartland of London's banking district. Beginning with Althusser's concept of 'interpellation', this book examines Occupy LSX St Paul's Cathedral in relation to media spectacle. Initially focusing on arrival narratives, it asks the question: were the 15th October 2011 anti-capitalist protestors 'hailed' into becoming the subjects of Occupy LSX St Paul's Cathedral? Based on extensive ethnographic interviews and photographic data, this book demonstrates the complex ways in which Occupy LSX St Paul's Cathedral 'interpolated' (Ashcroft 2001) and subverted media spectacle. Kairos exemplifies the longue durée of the art and ethics of Occupy. The bifarious dimensions of kairos emphasise an ethics of care and devotion alongside the indeterminate possibilities of the aleatory encounter. Formulated within Marxist aleatory materialism, this book explores the momentous reality of Occupy LSX St Paul's Cathedral. Instantiated within an extraordinary conjuncture of conflict between capital and labour, Occupy LSX St Paul's Cathedral manifested formidable expressions of resistance to the disembodied 'space of flows'; 'timeless times'; and the 'real virtualities' of transnational capitalist accumulation. Empirical case studies are used to engage with the extraordinary strategies that Occupy LSX St Paul's Cathedral politically cultivated to address: (i) the future of print news media, The Occupied Times of London; (ii) disjunctures and disruptions within the locality of the 'space of place' amidst the harsh reality of neoliberal austerity measures; (iii) the harnessing of multi-modal information communication technologies as part of an imperative to unite the 'space of place' with an international environmental citizenship; (iv) critically mobilising market analogues and promotional media integral to the neoliberal market reform of public sector healthcare provision and, in so doing, occupying a radical riposte to the entrepreneurial self and marketized morals of neoliberalism's homo economicus consumer citizen. In these and many other examples, this book argues that Occupy LSX St Paul's Cathedral exemplifies the possibilities of kairos as a condition and consequence of the politics, visual media and culture of new social movements.

*Gender, Climate Change and Livelihoods* Joshua Eastin, Kendra Dupuy, 2021-07-26 This book applies a gendered lens to evaluate the dynamic linkages between climate change and livelihoods in developing countries. It examines how climate change affects women and men in distinct ways, and what the implications are for earning income and

accessing the natural, social, economic, and political resources required to survive and thrive. The book's contributing authors analyze the gendered impact of climate change on different types of livelihoods, in distinct contexts, including urban and rural, and in diverse geographic locations, including Asia, Africa and the Caribbean. It focuses on understanding how public policies and power dynamics shape gendered vulnerabilities and impacts, how gender influences coping and adaptation mechanisms, and how civil society organizations incorporate gender into their climate advocacy strategies.

**Smart Cities in Asia** Yu-Min Joo, Teck-Boon Tan, 2020-03-28 At a time when Asia is rapidly growing in global influence, this much-needed and insightful book bridges two major current policy topics in order to offer a unique study of the latest smart city archetypes emerging throughout Asia. Highlighting the smart city aspirations of Asian countries and their role in Asian governments' new development strategies, this book draws out timely narratives and insights from a uniquely Asian context and policymaking space.

**KAIROS TIME** Niccie Kliegl, Angela Crist, Barb Miller, 2021-10-08 KAIROS TIME depicts a heartfelt desire to help each reader heal from their past, embrace a beautiful life, and step into the call God has for them.

**Projects and Complexity** Francesco Varanini, Walter Ginevri, 2012-05-09 Helpful to those tasked with managing complex environments, *Projects and Complexity* introduces a new way of looking at projects and fostering the culture needed to achieve sustainable results. It brings together experts from the academic, military, and business worlds to explore project management in the context of complexity theory and organizations. These experts explore a systemic and organic approach to projects that widens the scope of a project manager's role as well as the tools and capabilities required. The book provides readers with an understanding of the roots of project management in complexity theory and the human sciences. It explores seven principles of complexity theory and applies them to project management; examining project needs and features in terms of success parameters, team and stakeholders' perspectives, the project manager's perspective, and the perspectives of theory and practice. Explores a new humanistic paradigm in thinking about projects and project management Illustrates the culture and philosophy of projects from a range of perspectives Outlines an interdisciplinary approach to Project Management that integrates scientific and humanistic disciplines The contributors examine cutting-edge organizational models from management research and military leadership and map them to project management. They integrate insights from various disciplines to introduce tools that are relatively unknown to project managers and leaders. The book describes a paradigm that is complementary to traditional project management and also provides you with the philosophical, general management, and complexity theory findings needed to lead successful projects in complex environments.

*Capitalism in the Web of Life* Jason W. Moore, 2015-09-15 Finance. Climate. Food. Work. How are the crises of the twenty-first century connected? In *Capitalism in the Web of Life*, Jason W. Moore argues that the sources of today's global turbulence have a common cause: capitalism as a way of organizing nature, including human nature. Drawing on environmentalist, feminist, and Marxist thought, Moore offers a groundbreaking new synthesis: capitalism as a "world-ecology" of wealth, power, and nature. Capitalism's greatest strength—and the source of its problems—is its capacity to create Cheap Natures: labor, food, energy, and raw materials. That capacity is now in question. Rethinking capitalism through the pulsing and renewing dialectic of humanity-in-nature, Moore takes readers on a journey from the rise of capitalism to the modern mosaic of crisis. *Capitalism in the Web of Life* shows how the critique of capitalism-in-nature—rather than capitalism and nature—is key to understanding our predicament, and to pursuing the politics of liberation in the century ahead.

*Theology and Practice of Mission* Bruce Riley Ashford, 2011-09-01 Theology disconnected from mission is not Christian theology at all. The pastors, professors, and missionaries writing *Theology and Practice of Mission* provide a clear biblical-theological framework for understanding the church's mission to the nations. Toward that goal, the book holds three major sections: God's mission, the church's mission, and the church's mission to the nations. Part one explores the canon of Christian Scripture from narrative and systematic angles, explaining how the mission of God—to redeem a people who will be a kingdom of priests to the praise of his glory, bear witness to his gospel, advance his church, and dwell with him forever on a new heaven and earth—is communicated in the Bible's four movements: Creation, Fall, Redemption, and Restoration. Part two sees the mission of God's people in the light of God's mission, emphasizing not only preaching and church planting but also gospel witness in every dimension of human culture—glorifying God in family, church, work, community, through the arts, sciences, education, business, and the public square. The writers encourage us to live missionally, leaving all of our resources at God's disposal for the sake of his kingdom. Finally, part three contends that the North American church must come to terms with its missional calling—just as international missionaries do—and gives a starting point and parameters for conceiving the church's mission to all people groups and cultural contexts. Chapters here include ones on unreached people groups, Muslims, Hindus, Buddhists, and Postmoderns.

**The Contagion Next Time** Sandro Galea, 2022 A better and healthier time to be alive than ever -- An unhealthy country -- An unhealthy world -- Who we are, the foundational forces -- Where we live, work, and play -- Politics, power, and money -- Compassion -- Social, racial, and economic justice -- Health as a public good -- Understanding what matters most -- Working in complexity and doubt -- Humility and informing the public conversation.

**Beginning with the Word (Cultural Exegesis)** Roger Lundin, 2014-04-29 In this addition to the critically acclaimed Cultural Exegesis series, a nationally recognized scholar and award-winning author offers a sophisticated theological engagement with the nature of language and literature. Roger Lundin conducts a sustained theological dialogue with imaginative literature and with modern literary and cultural theory, utilizing works of poetry and fiction throughout to prompt the discussion and focus his reflections. The book is marked by a commitment to bring the history of Christian thought, modern theology in particular, into dialogue with literature and modern culture. It is theologically rigorous, widely interdisciplinary in scope, lucidly written, and ecumenical in tone and approach.

*Between Past and Future* Hannah Arendt, Jerome Kohn, 2006-09-26 From the author of *Eichmann in Jerusalem* and *The Origins of Totalitarianism*, "a book to think with through the political impasses and cultural confusions of our day" (*Harper's Magazine*) Hannah Arendt's insightful observations of the modern world, based on a profound knowledge of the past, constitute an impassioned contribution to political philosophy. In *Between Past and Future* Arendt describes the perplexing crises modern society faces as a result of the loss of meaning of the traditional key words of politics: justice, reason, responsibility, virtue, and glory. Through a series of eight exercises, she shows how we can redistill the vital essence of these concepts and use them to regain a frame of reference for

the future. To participate in these exercises is to associate, in action, with one of the most original and fruitful minds of the twentieth century.

Feral Deena Metzger,2011-01-15 This novel, based on a true story, is one woman's journey out of the strictures of cultural mores and societal values of what is sane, judicious, and appropriate and into the world of the primal intelligences that churn within all of us. A girl is found in a tree, alone, seemingly frightened and unwilling to communicate with anyone. And yet she displays a certain intelligence that beckons to the woman, intrigues her with its innate and often hidden language. The woman finds herself drawn into a world of beauty and fear, intensity and passion, that eventually brings her to a new awareness of what is missing in the left-brain intelligence that so dominates our assumptions of reality. This brilliant work will bring you to the edge of what you know to be true, challenging the very tenets of your existence and opening the door to what is missing in all our lives: the awakened animal consciousness whose wild intelligence renews our passion for life, for nature, and completes our sensibilities so that we can live as equals in the web of all life as human animals, alive to the very core of our being.
