The Hospitality and Tourism Industry in China Jinlin Zhao, 2018-06-27 Here is an insightful look into the great changes in the hospitality and tourism industry in China in recent years. The steady growth of the GDP in China, the increasing middle-income population, lifestyle changes of the Chinese people, and fast infrastructure development (speed trains, airports, highways, and seaports, linking many mega cities, mid-level cities, and townships) have all had a significant effect on the Chinese hospitality industry, which is booming in China. With much more money in their pockets, the Chinese are spending more than 60% of their disposable income on food and travel. International food and hotel chains have responded by increasing their presence in China, and in turn, new domestic restaurant and hotel chains have sprung up to compete for the business. With chapters by scholars from various universities in China and the United States, these issues and more are covered in this new volume. Readers will gain a true understanding of the current development of Chinese hospitality and tourism industry.

**Team Spirit** Brendan Hall, 2012-06-21 Team Spirit is a gripping account of a race on the edge, and a young skipper's determined journey to victory. The Clipper Round the World Yacht Race is the ultimate long distance challenge - a 35,000-mile circumnavigation of the globe, contested by amateur crews in identical racing yachts - and the winners are those who keep their focus the longest. The 2010 winner was 28-year-old Brendan Hall and his crew in Spirit of Australia. Although Brendan was the youngest and least experienced skipper in the race, the win was no accident - it was the culmination of years of training, skilled navigation and a leadership style way beyond his years.

Cinema as a Worldbuilding Machine in the Digital Era Alain Boillat, 2022-08-09 This essay examines the primacy of worldbuilding in the age of CGI, transmedia practices and high concept fiction by studying the principles that govern the creation of a multiverse in a wide range of film and TV productions. Emphasis is placed on Hollywood sci-fi movies and their on-screen representation of imaginary machines that mirror the film medium, following in the tradition of Philip K. Dick's writings and the cyberpunk culture. A typology of worlds is established, as well as a number of analytical tools for assessing the impact of the coexistence of two or more worlds on the narrative structure, the style (uses of color, editing practices), the generic affiliation (or hybridity), the seriality and the discourse produced by a given film (particularly in fictions linked to post-9/11 fantasies). Among the various titles examined, the reader is offered a detailed analysis of the Resident Evil film series, Total Recall and its remake, Dark City, the Matrix trilogy, Avatar, Source Code and other time-loop films, TRON and its sequel, Christopher Nolan's Tenet, and several TV shows – most notably HBO's Westworld, but also Sliders, Lost, Fringe and Counterpart.

*The Global Game of Oil Pipelines* Gulshan Dietl, 2021-11-29 Oil has long been and will continue to be at the centre of the global economy. This book explores the oil trade, energy (geo)politics, and new trends in

regionalising or globalising the oil industry in the new era of international relations and economic competition. Energy pipelines carrying oil and gas from the well-head to the market, generally run through two or more states; and often from one continent to the other. This book maps the oil flowing through international and intercontinental pipelines and unravels the political, commercial and technological considerations behind the mapping of oil routes and forging of trade ties between nation-states. Through case studies from the major oil-exporting regions like Saudi Arabia, Iraq, Iran, the USA, Canada and Russia, it analyses the changing trends in their policies around oil trade, bilateral relations, energy, and security. It also considers the environmental protests around the continued dependency on oil, the teapot refineries under the Islamic State, investments, oil lobbies and insurrections to understand the broad picture of shifting regional and geopolitical realities and the scramble for vital resources. This comprehensive book will be of interest to students of the geopolitics of energy, international relations, security and strategic studies, energy studies as well as the media and with policymakers.

*Strategic Risk Leadership* Torben Juul Andersen, Peter C. Young, 2021-09-26 This casebook extends *Strategic Risk Leadership: Engaging a World of Risk, Uncertainty and the Unknown*, bringing theory and practice grounded in the first book to life with an array of applicable, real-world examples. The book enables critical thinking about the current state of risk management and ERM, demonstrating contemporary shortcomings and challenges from real-life cases drawn from a global selection of well-known organizations. It confronts modern risk management practices and discusses what leaders should do to deal with unpredictable environments. Providing a basis for developing more effective risk management approaches, the book identifies shortcomings of contemporary approaches to risk management and specifies how to deal with the major risks we face today, illuminated by a variety of comprehensive global examples. It also provides valuable insights on these approaches for managers and leaders in general—including risk executives and chief risk officers—as well as advanced risk management students. End-of-chapter cases illustrate both good and bad risk management approaches as useful inspiration for reflective risk leaders. This book will be a hugely valuable resource for those studying or teaching risk management.
