The Sirens of Mars Sarah Stewart Johnson,2020
Mars was once similar to Earth, but today there are no rivers, no lakes, no oceans. Yet multiple spacecraft are circling Mars, sweeping over Terra Sabaea, Syrtis Major, the dunes of Elysium, and Mare Sirenum-- on the brink, perhaps, of a staggering find. Johnson tells the story of how she and other researchers have scoured Mars for signs of life. She interlaces her journey as a female scientist with tales of other seekers, to offer an unlikely natural history of a place where no human has ever set foot, while providing a vivid portrait of our quest to defy our isolation in the cosmos. -- adapted from jacket

Quarterlife Satya Doyle Byock,2023-07-04 An innovative psychotherapist tackles the overlooked stage of Quarterlife—the years between adolescence and midlife—and provides a “fascinating” guide “on how to navigate and thrive—rather than just survive—these odd years” (PureWow). “Quarterlife is an insightful, revealing look at the messy and uncharted paths to wholeness, and a powerful tool for anyone navigating early adulthood.”—Tembi Locke, New York Times bestselling author of *From Scratch I’m stuck. What’s wrong with me? Is this all there is?* Satya Doyle Byock hears these refrains regularly in her psychotherapy practice where she works with “Quarterlifers,” individuals between the ages of (roughly) sixteen to thirty-

six. She understands their frustration. Some clients have done everything “right”: graduate, get a job, meet a partner. Yet they are unfulfilled and unclear on what to do next. Byock calls these Quarterlifers “Stability Types.” Others are uninterested in this prescribed path, but feel unmoored. She refers to them as “Meaning Types.” While society is quick to label the emotions and behavior of this age group as generational traits, Byock sees things differently. She believes these struggles are part of the developmental journey of Quarterlife, a distinct stage that every person goes through and which has been virtually ignored by popular culture and psychology. In Quarterlife, Byock utilizes personal storytelling, mythology, Jungian psychology, pop culture, literature, and client case studies to provide guideposts for this period of life. Readers will be able to find themselves on the spectrum between Stability and Meaning Types, and engage with Byock’s four pillars of Quarterlife development: • Separate: Gain independence from the relationships and expectations that no longer serve you • Listen: Pay close attention to your own wants and needs • Build: Create, cultivate, and construct tools and practices for the life you want • Integrate: Take what you’ve learned and manifest something new Quarterlife is a defining work that offers a compassionate roadmap toward finding understanding, happiness, and wholeness in adulthood.

Finding Zoe Brandi Rarus, Gail Harris, 2014-10-07
At just a few months old, Zoe was gradually losing

her hearing. Her adoptive parents loved her—yet agonized—feeling they couldn't handle raising a Deaf child. Would Zoe go back into the welfare system and spend her childhood hoping to find parents willing to adopt her? Or, would she be the long-sought answer to a mother's prayers? Brandi Rarus was just 6 when spinal meningitis took away her hearing. Because she spoke well and easily adjusted to lip reading, she was mainstreamed in school and socialized primarily in the hearing community. Brandi was a popular, happy teen, but being fully part of every conversation was an ongoing struggle. She felt caught between two worlds—the Deaf and the hearing. In college, Brandi embraced Deaf Culture along with the joys of complete and effortless communication with her peers. Brandi went on to become Miss Deaf America in 1988 and served as a spokesperson for her community. It was during her tenure as Miss Deaf America that Brandi met Tim, a leader of the Gallaudet Uprising in support of selecting the university's first Deaf president. The two went on to marry and had three hearing boys—the first non-deaf children born in Tim's family in 125 years. Brandi was incredibly grateful to have her three wonderful sons, but couldn't shake the feeling something was missing. She didn't know that Zoe, a six-month-old Deaf baby girl caught in the foster care system, was desperately in need of a family unafraid of her different needs. Brandi found the answer to her prayers when fate brought her new adopted daughter into her life. Set against the backdrop of Deaf America, Finding Zoe is an uplifting story of hope, adoption, and everyday

miracles.

The Uninhabitable Earth David Wallace-Wells, 2019-02-19 #1 NEW YORK TIMES BESTSELLER • “The Uninhabitable Earth hits you like a comet, with an overflow of insanely lyrical prose about our pending Armageddon.”—Andrew Solomon, author of *The Noonday Demon* NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New Yorker • The New York Times Book Review • Time • NPR • The Economist • The Paris Review • Toronto Star • GQ • The Times Literary Supplement • The New York Public Library • Kirkus Reviews It is worse, much worse, than you think. If your anxiety about global warming is dominated by fears of sea-level rise, you are barely scratching the surface of what terrors are possible—food shortages, refugee emergencies, climate wars and economic devastation. An “epoch-defining book” (The Guardian) and “this generation’s *Silent Spring*” (The Washington Post), *The Uninhabitable Earth* is both a travelogue of the near future and a meditation on how that future will look to those living through it—the ways that warming promises to transform global politics, the meaning of technology and nature in the modern world, the sustainability of capitalism

and the trajectory of human progress. The Uninhabitable Earth is also an impassioned call to action. For just as the world was brought to the brink of catastrophe within the span of a lifetime, the responsibility to avoid it now belongs to a single generation—today's. **LOONGLISTED FOR THE PEN/E.O. WILSON LITERARY SCIENCE WRITING AWARD** "The Uninhabitable Earth is the most terrifying book I have ever read. Its subject is climate change, and its method is scientific, but its mode is Old Testament. The book is a meticulously documented, white-knuckled tour through the cascading catastrophes that will soon engulf our warming planet."—Farhad Manjoo, *The New York Times* "Riveting. . . . Some readers will find Mr. Wallace-Wells's outline of possible futures alarmist. He is indeed alarmed. You should be, too."—*The Economist* "Potent and evocative. . . . Wallace-Wells has resolved to offer something other than the standard narrative of climate change. . . . He avoids the 'eerily banal language of climatology' in favor of lush, rolling prose."—Jennifer Szalai, *The New York Times* "The book has potential to be this generation's *Silent Spring*."—*The Washington Post* "The Uninhabitable Earth, which has become a best seller, taps into the underlying emotion of the day: fear. . . . I encourage people to read this book."—Alan Weisman, *The New York Review of Books*

Factfulness Hans Rosling, Anna Rosling Rönnlund, Ola Rosling, 2018-04-03 **INSTANT NEW YORK TIMES BESTSELLER** "One of the most important books I've ever read—an indispensable guide to thinking clearly about the world." — Bill Gates "Hans

Rosling tells the story of 'the secret silent miracle of human progress' as only he can. But Factfulness does much more than that. It also explains why progress is so often secret and silent and teaches readers how to see it clearly."

—Melinda Gates

Factfulness by Hans Rosling, an outstanding international public health expert, is a hopeful book about the potential for human progress when we work off facts rather than our inherent biases.

—Former U.S. President Barack Obama

Factfulness: The stress-reducing habit of only carrying opinions for which you have strong supporting facts. When asked simple questions about global trends—what percentage of the world's population live in poverty; why the world's population is increasing; how many girls finish school—we systematically get the answers wrong. So wrong that a chimpanzee choosing answers at random will consistently outguess teachers, journalists, Nobel laureates, and investment bankers. In Factfulness, Professor of International Health and global TED phenomenon Hans Rosling, together with his two long-time collaborators, Anna and Ola, offers a radical new explanation of why this happens. They reveal the ten instincts that distort our perspective—from our tendency to divide the world into two camps (usually some version of us and them) to the way we consume media (where fear rules) to how we perceive progress (believing that most things are getting worse). Our problem is that we don't know what we don't know, and even our guesses are informed by unconscious and predictable biases. It turns out that the world, for all its imperfections, is in a

much better state than we might think. That doesn't mean there aren't real concerns. But when we worry about everything all the time instead of embracing a worldview based on facts, we can lose our ability to focus on the things that threaten us most. Inspiring and revelatory, filled with lively anecdotes and moving stories, *Factfulness* is an urgent and essential book that will change the way you see the world and empower you to respond to the crises and opportunities of the future. --- "This book is my last battle in my life-long mission to fight devastating ignorance...Previously I armed myself with huge data sets, eye-opening software, an energetic learning style and a Swedish bayonet for sword-swallowing. It wasn't enough. But I hope this book will be." Hans Rosling, February 2017.

International Handbook of Media Literacy Education Belinha S. De Abreu, Paul Mihailidis, Alice Y.L. Lee, Jad Melki, Julian McDougall, 2017-04-21 At the forefront in its field, this Handbook examines the theoretical, conceptual, pedagogical and methodological development of media literacy education and research around the world. Building on traditional media literacy frameworks in critical analysis, evaluation, and assessment, it incorporates new literacies emerging around connective technologies, mobile platforms, and social networks. A global perspective rather than a Western-centric point of view is explicitly highlighted, with contributors from all continents, to show the empirical research being done at the intersection of media, education, and

engagement in daily life. Structured around five themes—Educational Interventions; Safeguarding/Data and Online Privacy; Engagement in Civic Life; Media, Creativity and Production; Digital Media Literacy—the volume as a whole emphasizes the competencies needed to engage in meaningful participation in digital culture.

Cool Tech DK, 2011-07-18 Connected is a thrilling journey through the physical side of the virtual world. Everyone is familiar with the internet and will check their email without a second thought, but who knows how the messages get from one place to another and what processes the data goes through during the trip? Imagine yourself as a digital bit—the basic unit of information—and join the other billions of bits as they race through cyberspace. Trace their routes under seas, across continents, and through space, zooming through beaches, buildings, roads, and pipelines as information crosses the globe. Marvel at the technology that keeps you connected, from the ships installing lines deep in the ocean, to the robots locating wire breaks, the satellites beaming signals across the earth, the teams retrieving and splicing lines together, and the servers directing and feeding internet traffic around the world. The book also takes a look back at the history of the internet, exploring the people and inventions that led to its creation. In this section, you'll tour a virtual museum to see how the technology has progressed over the years, changing the lives of ordinary people everywhere.

Mile Marker Zero William McKeen, 2011-10-04 True stories of writers and pirates, painters and

potheads, guitar pickers and drug merchants in Key West in the 1970s. For Hemingway and Fitzgerald, there was Paris in the twenties. For others, later, there was Greenwich Village, Big Sur, and Woodstock. But for an even later generation—one defined by the likes of Jimmy Buffett, Tom McGuane, and Hunter S. Thompson—there was another moveable feast: Key West, Florida. The small town on the two-by-four-mile island has long been an artistic haven, a wild refuge for people of all persuasions, and the inspirational home for a league of great American writers. Some of the artists went there to be literary he-men. Some went to re-create themselves. Others just went to disappear—and succeeded. No matter what inspired the trip, Key West in the seventies was the right place at the right time, where and when an astonishing collection of artists wove a web of creative inspiration. Mile Marker Zero tells the story of how these writers and artists found their identities in Key West and maintained their friendships over the decades, despite oceans of booze and boatloads of pot, through serial marriages and sexual escapades, in that dangerous paradise. Unlike the “Lost Generation” of Paris in the twenties, we have a generation that invented, reinvented, and found itself at the unending cocktail party at the end—and the beginning—of America’s highway.

I'm Feeling Lucky Douglas Edwards, 2011-07-12 A marketing director’s story of working at a startup called Google in the early days of the tech boom: “Vivid inside stories . . . Engrossing” (Ken Auletta). Douglas Edwards wasn’t an engineer or a

twentysomething fresh out of school when he received a job offer from a small but growing search engine company at the tail end of the 1990s. But founders Larry Page and Sergey Brin needed staff to develop the brand identity of their brainchild, and Edwards fit the bill with his journalistic background at the San Jose Mercury News, the newspaper of Silicon Valley. It was a change of pace for Edwards, to say the least, and put him in a unique position to interact with and observe the staff as Google began its rocket ride to the top. In entertaining, self-deprecating style, he tells his story of participating in this moment of business and technology history, giving readers a chance to fully experience the bizarre mix of camaraderie and competition at this phenomenal company. Edwards, Google's first director of marketing and brand management, describes the idiosyncratic Page and Brin, the evolution of the famously nonhierarchical structure in which every employee finds a problem to tackle and works independently, the races to develop and implement each new feature, and the many ideas that never came to pass. *I'm Feeling Lucky* reveals what it's like to be "indeed lucky, sort of an accidental millionaire, a reluctant bystander in a sea of computer geniuses who changed the world. This is a rare look at what happened inside the building of the most important company of our time" (Seth Godin, author of *Linchpin*). "An affectionate, compulsively readable recounting of the early years (1999–2005) of Google . . . This lively, thoughtful business memoir is more entertaining

than it really has any right to be, and should be required reading for startup aficionados.”

—Publishers Weekly, starred review “Edwards recounts Google’s stumbles and rise with verve and humor and a generosity of spirit. He kept me turning the pages of this engrossing tale.” —Ken Auletta, author of Greed and Glory on Wall Street “Funny, revealing, and instructive, with an insider’s perspective I hadn’t seen anywhere before. I thought I had followed the Google story closely, but I realized how much I’d missed after reading—and enjoying—this book.” —James Fallows, author of China Airborne

Let Your Mind Run Deena Kastor, Michelle Hamilton, 2019-04-09 NEW YORK TIMES BESTSELLER NOW WITH A NEW WORKBOOK Deena Kastor was a star youth runner with tremendous promise, yet her career almost ended after college, when her competitive method—run as hard as possible, for fear of losing—fostered a frustration and negativity and brought her to the brink of burnout. On the verge of quitting, she took a chance and moved to the high altitudes of Alamosa, Colorado, where legendary coach Joe Vigil had started the first professional distance-running team. There she encountered the idea that would transform her running career: the notion that changing her thinking—shaping her mind to be more encouraging, kind, and resilient—could make her faster than she’d ever imagined possible. Building a mind so strong would take years of effort and discipline, but it would propel Kastor to the pinnacle of running—to American records in every distance from the 5K to the marathon—and to the accomplishment

of earning America's first Olympic medal in the marathon in twenty years. *Let Your Mind Run* is a fascinating intimate look inside the mind of an elite athlete, a remarkable story of achievement, and an insightful primer on how the small steps of cultivating positivity can give anyone a competitive edge.

Building Mobile Apps at Scale Gergely

Orosz, 2021-04-06 While there is a lot of appreciation for backend and distributed systems challenges, there tends to be less empathy for why mobile development is hard when done at scale. This book collects challenges engineers face when building iOS and Android apps at scale, and common ways to tackle these. By scale, we mean having numbers of users in the millions and being built by large engineering teams. For mobile engineers, this book is a blueprint for modern app engineering approaches. For non-mobile engineers and managers, it is a resource with which to build empathy and appreciation for the complexity of world-class mobile engineering. The book covers iOS and Android mobile app challenges on these dimensions: Challenges due to the unique nature of mobile applications compared to the web, and to the backend. App complexity challenges. How do you deal with increasingly complicated navigation patterns? What about non-deterministic event combinations? How do you localize across several languages, and how do you scale your automated and manual tests? Challenges due to large engineering teams. The larger the mobile team, the more challenging it becomes to ensure a consistent architecture. If your company builds multiple

apps, how do you balance not rewriting everything from scratch while moving at a fast pace, over waiting on centralized teams? Cross-platform approaches. The tooling to build mobile apps keeps changing. New languages, frameworks, and approaches that all promise to address the pain points of mobile engineering keep appearing. But which approach should you choose? Flutter, React Native, Cordova? Native apps? Reuse business logic written in Kotlin, C#, C++ or other languages? What engineering approaches do world-class mobile engineering teams choose in non-functional aspects like code quality, compliance, privacy, compliance, or with experimentation, performance, or app size?

The Great Nadar Adam Begley, 2018-07-10 A dazzling, stylish biography of a fabled Parisian photographer, adventurer, and pioneer. A recent French biography begins, Who doesn't know Nadar? In France, that's a rhetorical question. Of all of the legendary figures who thrived in mid-19th-century Paris—a cohort that includes Victor Hugo, Baudelaire, Gustave Courbet, and Alexandre Dumas—Nadar was perhaps the most innovative, the most restless, the most modern. The first great portrait photographer, a pioneering balloonist, the first person to take an aerial photograph, and the prime mover behind the first airmail service,

Nadar was one of the original celebrity artist-entrepreneurs. A kind of 19th-century Andy Warhol, he knew everyone worth knowing and photographed them all, conferring on posterity psychologically compelling portraits of Manet, Sarah Bernhardt, Delacroix, Daumier and countless others—a priceless panorama of Parisian celebrity. Born Gaspard-Félix Tournachon, he adopted the pseudonym Nadar as a young bohemian, when he was a budding writer and cartoonist. Later he affixed the name Nadar to the façade of his opulent photographic studio in giant script, the illuminated letters ten feet tall, the whole sign fifty feet long, a garish red beacon on the boulevard. Nadar became known to all of Europe and even across the Atlantic when he launched The Giant, a gas balloon the size of a twelve-story building, the largest of its time. With his daring exploits aboard his humongous balloon (including a catastrophic crash that made headlines around the world), he gave his friend Jules Verne the model for one of his most dynamic heroes. The Great Nadar is a brilliant, lavishly illustrated biography of a larger-than-life figure, a visionary whose outsized talent and canny self-promotion put him way ahead of his time.
