

Global Time

Ian R. Bartky

The Global Transformation of Time Vanessa Ogle, 2015-10-12 As railways, steamships, and telegraph communications brought distant places into unprecedented proximity, previously minor discrepancies in local time-telling became a global problem. Vanessa Ogle's chronicle of the struggle to standardize clock times and calendars from 1870 to 1950 highlights the many hurdles that proponents of uniformity faced.

Global Time Zone Widaly L DeSoto-Burt, 2020-04-27 It is 2075. Oppression from the New Orient Empire and propaganda on the dangers of sun exposure have forced the citizens of Region 12, part of the former United States, to switch to a nocturnal schedule. In the name of progress, all countries have been required to move to a single, global time zone. After perplexing events unfold that include a visit from a mysterious stranger and rumors of a secret door in her father's study, Yvanya McKenzie's teenage life goes from unpredictable to worse when her father attempts to arrange a marriage between her and a wealthy colleague's son. While she does her best to hide her disdain for his decision amid an ever-changing world, Yvanya rebels against the Empire's strict rules and sneaks out to hang with her friends, even as soldiers patrol the streets. But when her family suddenly disappears one day, Yvanya must risk everything and join forces with unexpected allies to rescue her family, if she ever wants to see them again. *Global Time Zone* is the action-packed tale of a teenager's quest to save her family amid a futuristic dystopian world where love, responsibility, and courage define her existence.

The Global Transformation of Time Vanessa Ogle, 2015-10-12 This book is a revisionist account of attempts to unify clock times, calendars, and social time, and a methodological intervention in discussions about writing global and transnational history. The book uses the reform of time between 1870 and 1950 as a lens through which to understand the dynamics of globalization. Based on research in archives around the world in multiple languages, individual chapters take the story of uniform time to France and Germany, Britain, the British Empire/German colonies/Latin America, British India, Arab elites in the Levant, Muslim scholars in Egypt, and to the League of Nations. The author shows how cross-border flows of ideas and concepts of uniform time resulted in a nationalization and regionalization of temporal identities. As a consequence, uniform, accurate clock time remained nonstandardized, unstable, and incomplete as late as the 1930s and 1940s. Calendar reform, just as vivid and vast a field of activism as clock time, never came to pass altogether due to strong national and religious objections to a uniform World Calendar. When ideas about uniform time moved across borders and continents, they often did so along lateral, informal trajectories of transmission. Local initiatives often preceded national time politics. Top-down attempts to devise time reform schemes at international conferences, to implement them nationally, and assure application in the most remote local contexts rarely succeeded. Rather, globalization disheveled such hierarchies of the international, the national, and the local. The book, then, emphasizes the importance of nationalism and states as well as attention to scale in writing the history of global flows and connections--

Time and world politics Kimberly Hutchings, 2013-07-19 This book offers the first authoritative guide to assumptions about time in theories of contemporary world politics. It demonstrates how predominant theories of the international or global 'present' are affected by temporal assumptions, grounded in western political thought, that fundamentally shape what we can and cannot know about world politics today. The first part of the book traces the philosophical roots of assumptions about time in contemporary political theory. The second part examines contemporary theories of world politics, including liberal and realist International Relations theories and the work of Habermas, Hardt and Negri, Virilio and Agamben. In each case, it is argued, assumptions about political time ensure the identification of the particular temporality of western experience with the political temporality of the world as such and put the theorist in the unsustainable position of holding the key to the direction of world history. In the final chapter, the book draws on postcolonial and feminist thinking, and the philosophical accounts of political time in the work of Derrida and Deleuze, to develop a new 'untimely' way of thinking about time in world politics.

Time Geography in the Global Context Kajsa Ellegård, 2018-09-18 Time-geography is a mode of thinking that helps us understand change processes in society, the wider context and the ecological consequences of human actions. This book brings together international time-geographic research from a range of disciplines. Swedish geographer Torsten Hägerstrand is a key foundation for this book, and an introductory biography charts the influences that led to the formation of his theories. A central theme across time-geography research is recognizing time and space as unity. Contributions from the Netherlands, the USA, Japan, China, Norway and Sweden showcase the diverse palette of time-geography research. Chapters study societies adjusting to rapid urbanization, or investigate the need for structural changes in childcare organization. The book also delves into green transportation and the interplay between humans and nature in landscape transformation. Application chapters look at ICT effects on young people's daily life and methods for engaging clients in treatment practice. This book situates the outlook for this developing branch of research and the application of time-geography to societal and academic contexts. Its interdisciplinary nature will appeal to postgraduates and researchers who are interested in human geography, urban and regional planning and sociology.

All the Time in the World Jessica Kerwin Jenkins, 2013-10-29 Entertaining, unexpected, and full of charm, the follow-up to Jessica Kerwin Jenkins's *Encyclopedia of the Exquisite* presents a miscellany of engaging stories, detailing the intriguing customs, traditions, and guilty pleasures pursued throughout the ages. *All the Time in the World* takes its cue from an iconic component of medieval life, the book of hours, which prescribed certain readings and contemplations for certain parts of the day throughout the year. Divided into more than seventy-five entries, *All the Time in the World* is brimming with witty *bons mots*, interesting etymologies, and arresting anecdotes encompassing an array of cultures and eras. Subjects covered include the daylong ceremony of laying a royal Elizabethan tablecloth; the radicalization of sartorial chic in 1890s Paris; Nostradamus's belief in the aphrodisiac power of jam; the sensuous practice of sniffing incense in fifteenth-century Japan; the American fascination with flaming desserts; the short-lived artistic discipline of "lumia," or visual music; the evolution of coffee from a religious ritual to a forbidden delight in the Middle East; Henriette d'Angeville's fearless and wine-fueled ascent of Mont Blanc; the elaborate treasure hunts concocted by London's Bright Young Things; and the musical revolution known as bebop. An antidote to the contemporary cult of "getting things done," *All the Time in the World* revives forgotten treasures of the past while inspiring a passion for good living in the present.

Covering both calendrical time and clock time, the volume shows how significant changes in conceptions of time are in world history, as they translate many key historical developments from religion to industrialization, into daily experience. The book explores why and how early societies became interested in measuring time, as well as explaining the causes and ongoing consequences of the modern sense of time. International Organization in Time Tine Hanrieder, 2015-06-18 *International Organization in Time* investigates why reformers often pledge to unify international organizations (IOs), but end up fragmenting them instead. The book reconstructs the institutional history of the World Health Organization (WHO) since its creation in 1946. It theorizes the fragmentation trap, which is both a cause and a consequence of reform failure in the WHO. A comparison between the International Labour Organization (ILO) and the United Nations Educational, Scientific and Cultural Organization (UNESCO) illustrates the relevance of path dependence and fragmentation across the United Nations (UN) system. As the UN approaches its 70th anniversary, this book helps to understand the path dependent dynamics that reformers encounter in international organizations.

The Year Time Stopped Christina Hawatmeh, Nour Chamoun, 2022-06-21 Curated by the founders of Scpio, a community-based image marketplace, a stunning and unforgettable visual history that captures the world's response to major events that defined 2020: the COVID pandemic and the sweeping movements for racial and social justice. In 2020, the world experienced massive change. Millions of lives were ended—and millions more upended—by the Covid-19 pandemic. The shocking police killings of Black men and women gave rise to powerful social movements and widespread collective action to rectify centuries of injustice and racism in the United States and globally. Together, these three colossal events tested the resilience of the social fabric bringing us all together. Attempting to illuminate and make sense of this new reality, photographers from around the world documented these transformational moments as they unfolded. Carefully combing through their archive, the founders of Scpio have curated these photographs to tell the story of the

year 2020. It began with a collective sense of isolation and fear to eventually people coming together and protesting the social injustices that were uncovered later that year. Representing artists from around the globe, *The Year Time Stopped* seeks to empower us and give credence to the extraordinary circumstances that changed our world. The 200 images in this striking visual collection are indelible, impassioned, and unforgettable. Taken together, they are a singular testament to this unprecedented time.
