Glo Fatima Munroe,2024-02-24 School. Work. Bills. Repeat. As her grandmother's only caregiver, Glo has little time for anything outside of her bubble. Still holding on to love, she remains dedicated to her fiancé Javon, even when she questions their bond. Second in command to the king of the streets, women bow down at the cadence in Ace's demands. But when he bumps into the overworked and under loved college student at Wally's one night on his way home, her beautiful spirit and radiant countenance pulls him in. He wants her, but all she wants is her college degree; nothing more, nothing less. If I didn't learn anything else on this journey, I learned to never let a man love bomb you to the point you don't recognize yourself. This is my story. -Glo

Traveling East, Driving West: Nine Stories Jeffrey W. Klausman,2000-12-20 These stories are about rebirth: learning to live in the world again after facing an emotional and spiritual desert, facing space where questions and answers end. Most of the nine stories rely upon imagery and sound to create meaning where story ends. All present characters with life-creating questions, questions whose answers cannot be sought in the company of others or through the words of others; these are questions whose contemplation gives rise to answers as large as our world and as silent. The reader is left at the end of each facing the landscape of the West while oriented toward the spiritual East.

Ideal for parents, volunteers in literacy programs, teachers and friends. *(English) Authentic Korean Food with Edible Wild Herbs* Youngsang Cho,Geol Yu,2021-07-01 JADAM joins a new wave that humans take control of their health, following the efforts to give the initiative in technology back to the farmers. Epigenetics, which has been established as an academic, has proven that genetic changes can occur depending on foods and environmental conditions. On a global level, the diversity of food has disappeared and become simpler including the loss of nutrition. In order to cure common diabetes and high blood pressure, the intake of various nutrients through food is very important. Look at the Mother Nature! In this book, you will find out that the wild herbs around you are a treasure trove of nutrition. Wild herbs solve everything themselves. In search of water and nutrients, they spread their roots deep and wide. Thanks to this, they can accumulate various components necessary for life activities and go strong against temporary drought, cold, or flood. When pests attack, they use their components to generate repellent chemicals to defend themselves. Wild herbs' this know-how of survival is recorded in the DNA in their cells and passed on for tens of millions of years from generation to generation, evolving into a more sophisticated life system. And if we can accept and synchronize with the strong life force and abundant nutrition of wild herbs, we can live a much healthier life.
