The Yugas Joseph Selbie,David Steinmetz,2011-08-16 Millions are wondering what the future holds for mankind, and if we are soon due for a world-changing global shift. Paramhansa Yogananda (author of the classic Autobiography of a Yogi) and his teacher, Sri Yukteswar, offered key insights into this subject. They presented a fascinating explanation of the rising and falling eras that our planet cycles through every 24,000 years. According to their teachings, we have recently passed through the low ebb in that cycle and are moving to a higher age—an Energy Age that will revolutionize the

world. Over one hundred years ago Yukteswar predicted that we would live in a time of extraordinary change, and that much that we believe to be fixed and true—our entire way of looking at the world — would be transformed and uplifted. In *The Yugas*, authors Joseph Selbie and David Steinmetz present substantial and intriguing evidence from the findings of historians and scientists that demonstrate the truth of Yukteswar's and Yogananda's revelations.

The Inscriptions of the Indus Civilization Rainer Hasenpflug, 2006 World Novelty! One of the biggest mysteries of world history is now solved. The deciphered texts of the ancient south Asian high culture in present-day Pakistan and India from the time between 3000 and 1700 BC are available for the first time here. All of the approximately 2000 texts are arranged and analysed so that the content is now clearly understandable for everyone. The result is the complete self-description of the Indus Civilization which is also known as the Harappa Culture and the Sindhu Sarasvati Culture. The Indus Civilization is already known as the largest and one of the most developed contemporary ancient cultures - at the same level with the then Egyptian and Mesopotamian cultures. Even in some fields, like town building, it was already known as the most progressive society in the world. Its popularity has suffered until now only from the less intimate knowledge due to its unreadable inscriptions and the lack of discovered pyramids. Many attempts of deciphering had failed in the past because of several fatally incorrect prejudices and unrealistic assumptions. It has now been discovered that the system of inscribed stamps was a highly advanced national education program of high-grade, intelligent leaders. Nothing was there by chance. Not only was a system of syllabics and pictograms discovered, but also countless logical cross references like the logical connection of the texts with the accompanying pictures, the consequently followed system of symbolic numbers,

metaphors, phrases, curses, etc., as well as the Indian/Persian/Indo-European religious system and Sanskrit language, the traditional values of the society whose roots go even much further back in the past, the tribal structures, the international relationships, the social and political problems in this early time, and much more. Finally the Indus Civilization is in fact shown as the mythological Vedic age. Altogether the texts are a manifest of the high intelligence of our ancestors 5000 year

The Four Great Questions of Life James N. Judd, Ms.D., D.D., N.

James, 2000-03-16 Rare is the person who, at some time or another, has not found himself/herself pondering one or more of the four great questions of life – Who am I? Where did I come from? What is my purpose? And, Where am I going? Such questions invariably arise when there is some crisis in one's personal affairs, but due to the emotional confusion that usually accompanies such crises it is difficult to reason out answers to such profound metaphysical questions. Answers appear in the world's religions, but there is such a variance of opinion between the different theologies that trying to find a definitive solution among all of those divergent teachings only develops more confusion. There is, however, a common inner or mystical foundation to all religions – that supports their man-made dogmas, creeds and rituals – which provides the clear answers all of us are looking for. This

consistency and enduring nature of the ideas that form this foundation or ground of religion has resulted in those ideas being collectively referred to as the “Perennial Philosophy” of mysticism. There can be some difficulty, however, in finding the answers within this Perennial Philosophy because the concepts are metaphysical in nature; and this means they are beyond the range of our normal linear way of thinking and, so, not readily obvious. They are, so to speak, ‘locked-up,’ and a ‘key’ is needed for us to be able to discover their wisdom. In this book, *The Four Great Questions of Life*, Dr. Judd provides that ‘key’ and, clearly shows where these answers appear in various religious teachings Uses down-to-earth illustrations to explain what they mean Shows the universal application of the ideas embodied in the Christian Trinity Describes how the Law of Karma (cause/effect) and Reincarnation are compatible with Christianity Provides a logical explanation and definition that removes the mystery of the nature of good and evil. For anyone who has ever struggled to find any meaning in such questions as, Who am I? What is my purpose in living? and so on, this book offers clear-cut and practical answers which, irrespective of one’s religious background, show the way to a happy and fulfilling life.

Political Landscapes of Capital Cities Jessica Joyce Christie, Jelena Bogdanovic, Eulogio Guzmán, 2016-08-08 *Political Landscapes of Capital Cities* investigates the processes of transformation of the natural landscape into the culturally constructed and ideologically defined political environments

of capital cities. In this spatially inclusive, socially dynamic interpretation, an interdisciplinary group of authors including archaeologists, anthropologists, and art historians uses the methodology put forth in Adam T. Smith's *The Political Landscape: Constellations of Authority in Early Complex Polities* to expose the intimate associations between human-made environments and the natural landscape that accommodate the sociopolitical needs of governmental authority. *Political Landscapes of Capital Cities* blends the historical, political, and cultural narratives of capital cities such as Bangkok, Cusco, Rome, and Tehran with a careful visual analysis, hinging on the methodological tools of not only architectural and urban design but also cultural, historiographical, and anthropological studies. The collection provides further ways to conceive of how processes of urbanization, monumentalization, ritualization, naturalization, and unification affected capitals differently without losing grasp of local distinctive architectural and spatial features. The essays also articulate the many complex political and ideological agendas of a diverse set of sovereign entities that planned, constructed, displayed, and performed their societal ideals in the spaces of their capitals, ultimately confirming that political authority is profoundly spatial. The Oxford Handbook of Edgar Allen Poe J. Gerald Kennedy, Scott

Peeples, 2019-01-08 No American author of the early 19th century enjoys a larger international audience than Edgar Allan Poe. Widely translated, read, and studied, he occupies an iconic place in global culture. Such acclaim would have gratified Poe, who deliberately wrote for the world at large and mocked the provincialism of strictly nationalistic themes. Partly for this reason, early literary historians cast Poe as an outsider, regarding his dark fantasies as extraneous to American life and experience. Only in the 20th century did Poe finally gain a prominent place in the national canon. Changing critical approaches have deepened our understanding of Poe's complexity and revealed an author who defies easy classification. New models of interpretation have excited fresh debates about his essential genius, his subversive imagination, his cultural insight, and his ultimate impact, urging an expansive reconsideration of his literary achievement. Edited by leading experts J. Gerald Kennedy and Scott Peeples, this volume presents a sweeping reexamination of Poe's work. Forty-five distinguished scholars address Poe's troubled life and checkered career as a magazinist, his poetry and prose, and his reviews, essays, opinions, and marginalia. The chapters provide fresh insights into Poe's lasting impact on subsequent literature, music, art, comics, and film and illuminate his radical conception of the universe, science, and the human mind. Wide-ranging and thought-provoking, this Handbook reveals a thoroughly modern Poe, whose timeless fables of peril and loss will continue to attract new generations of readers and scholars.

Early Buddhist Transmission and Trade Networks Jason Neelis, 2010-11-19 This exploration of early paths for Buddhist transmission within and beyond South Asia retraces the footsteps of monks, merchants, and other agents of cross-cultural exchange. A reassessment of literary, epigraphic, and archaeological sources reveals historical contexts for the growth of the Buddhist saṅgha from approximately the 5th century BCE to the end of the first millennium CE. Patterns of dynamic Buddhist mobility were closely linked to transregional trade networks extending to the northwestern borderlands and joined to Central Asian silk routes by capillary routes through transit zones in the upper Indus and Tarim Basin. By examining material conditions for Buddhist establishments at nodes along these routes, this book challenges models of gradual diffusion and develops alternative explanations for successful Buddhist movement.

Framing the Sacred Eleanor Wake, 2012-11-08 Christian churches erected in Mexico during the early colonial era represented the triumph of European conquest and religious domination. Or did they? Building on recent research that questions the “cultural” conquest of Mesoamerica, Eleanor Wake shows that colonial Mexican churches also reflected the beliefs of the indigenous communities that built them. European authorities failed to recognize that the meaning of the edifices they so admired was being challenged: pre-Columbian iconography integrated into Christian imagery, altars oriented toward indigenous sacred landmarks, and carefully recycled masonry. In *Framing the Sacred*, Wake examines how the art and architecture of Mexico’s religious structures reveals the indigenous people’s own decisions regarding the conversion program and their accommodation of the Christian message. As Wake shows, native peoples selected aspects of the invading culture to secure their own culture’s survival. In focusing on anomalies present in indigenous art and their relationship to orthodox Christian iconography, she draws on a

wide geographical sampling across various forms of Indian artistic expression, including religious sculpture and painting, innovative architectural detail, cartography, and devotional poetry. She also offers a detailed analysis of documented native ritual practices that—she argues—assist in the interpretation of the imagery. With more than 200 illustrations, including 24 in color, *Framing the Sacred* is the most extensive study to date of the indigenous aspects of these churches and fosters a more complete understanding of Christianity's influence on Mexican peoples.

Millennial Prognostications / Poems Daniel Abdal-Hayy Moore, 2009-01-01

MILLENNIAL PROGNOSTICATIONS: This is not a book of poetic futuristics, oracle-like I-Ching countings or consciousness Tarot readings, nothing so formal nor formulated. Perhaps its prognostication aspect is in trying to be open-hearted and sense-aware of images and their meanings, or meanings and their images, as they occur in the world both most immediate to us and by extension universal and even cosmic, detail by detail, focusing on what Blake called minute particulars. It's a kind of lengthy prayer with sidebars, digressions and returns, hopefully each time more earnestly to the Source of all and of Whom, as it was said by the Prophet Muhammad, peace of Allah be upon him, Do not curse time, for time is Allah...
