The Power to Go Merrill Denison, 1956

Go Like Hell Albert J. Baime, 2009 By the early 1960s, the Ford Motor Company, built to bring automobile transportation to the masses, was falling behind. Young Henry Ford II, who had taken the reins of his grandfather's company with little business experience to speak of, knew he had to do something to shake things up. Baby boomers were taking to the road in droves, looking for speed not safety, style not comfort. Meanwhile, Enzo Ferrari, whose cars epitomized style, lorded it over the European racing scene. He crafted beautiful sports cars, science fiction on wheels, but was also called the Assassin because so many drivers perished while racing them. **Go Like Hell** tells the remarkable story of how Henry Ford II, with the help of a young visionary named Lee Iacocca and a former racing champion turned engineer, Carroll Shelby, concocted a scheme to reinvent the Ford company. They would enter the high-stakes world of European car racing, where an adventurous few threw safety and sanity to the wind. They would design, build, and race a car that could beat Ferrari at his own game at the most prestigious and brutal race in the world, something no American car had ever done. **Go Like Hell** transports readers to a risk-filled, glorious time in this brilliant portrait of a rivalry between two industrialists, the cars they built, and the pilots who would drive them to victory, or doom.

Let 'Em All Go! Chris Economaki, 2006 Chris Economaki is the world's best-known reporter of the auto racing scene. No man, with either the written or electronic word, has had an effect on auto racing like Economaki. ... Now, Economaki tells the story of the sport from the perspective of the man who was there to see it all.--Back cover.

From the Issigonis Mini that changed design and social mores, to racers so successful they were banned from competition, from cars produced in millions, to one-offs, all created by those marching to the beat of their own drum.

Buying a Car on the Internet Jeremy Lieb, Joel Lieb, Commerce Net, 1999 The world's leading e-commerce association shows how to find the best new and used car deals online. Are you looking to bargain up from the dealer's price instead of down from the sticker price? Do you know where to find the latest safety information on new and used cars? How accurate is the information you find online? Are online dealers reputable? How can you make sure you're getting the best car for the price you can pay? Now Commerce Net provides potential car buyers with the time-saving guide to: finding the right dealer for your online search; financing your car loan online; negotiating the best deals online; test-driving cars online; comparison shopping online. According to the renowned consumer group J.D. Power, savvy shoppers are turning to the Internet to buy the car of their dreams--and they project that in two years more than half of new cars will be bought on the Internet. But why wait? This is the guide buyers can turn to now!

Effective Car Dealer Max Zanan, 2020-07-13 This is my fourth book on the auto industry, and I have written it because this business is complicated, sophisticated, and ever-changing. Automotive retail is changing slowly, and one of the main reasons for that are the franchise laws. I want to urge you to operate as though franchise laws don't exist to protect you. Carvana is not going anywhere and neither is Amazon. At some point they will join forces. Also, OEM's such as Tesla, Rivian, and many more are going to go directly to the consumer, bypassing the dealer network altogether. At the end of the day, awesome customer service, whether in sales, service, or parts, will keep your customers coming back for more. Poor service and a cumbersome sales experience will drive them elsewhere—Carvana, CarMax, Tesla, Jiffy Lube, Firestone, Good Year, Valvoline, NAPA Parts, Pep Boys, etc. COVID-19 is already having a profound effect on consumer behavior and the way in which we buy and service cars. I predict that there will be two types of dealers after this pandemic abates—the first will change their business operations, adopting frictionless digital and showroom retail; the second will hope that things go back to normal and that nothing needs to change. Unfortunately, the second type of dealer will be out of business. It is ultimately your choice whether to accept change. Consumers will continue to purchase cars. The only question is: Will they will be buying from you?

High-Performance Automotive Cooling Systems John F. Kershaw, 2019-06-15 When considering how well modern cars perform in many areas, it is easy to forget some of the issues motorists had on a regular basis 40+ years ago. Cars needed maintenance regularly: plugs and points had to be replaced on a frequent basis, the expected engine life was 100,000 miles rather than double and triple the expectation that you see today, and an everyday hassle, especially in warm climates, was being the victim of an overheating car. It was not uncommon on a hot day to see cars stuck in traffic, spewing coolant onto the ground with the hoods up in a desperate attempt to cool off. Fast-forward to today, and it's easy to forget that modern cars even have coolant. The temp needle moves to where it is supposed to be and never moves again until you shut the car off. For drivers of vintage cars, this level of reliability is also attainable. In *High-Performance Automotive Cooling Systems*, author Dr. John Kershaw explains the basics of a cooling system operation, provides an examination of coolant and radiator options, explains how to manage coolant speed through your engine and why it is important, examines how to manage airflow through your radiator, takes a thorough look at cooling fans, and finally uses all this information in the testing and installation of all these components. Muscle cars and hot rod engines today are pushed to the limit with stroker kits and power adders straining the capabilities of your cooling system to extremes never seen before. Whether you are a fan of modern performance cars or a fan of more modern performance in vintage cars, this book will help you build a robust cooling system to match today's horsepower demands and help you keep your cool.

The Chandler Automobile James H. Lackey, 2018-05-21 Incorporated by veteran automakers in 1913, the Chandler Motor Car Company was initially successful in a fiercely competitive industry, manufacturing an array of quality automobiles at a range of prices. Yet by the late 1920s the company was floundering under mismanagement. Producing four lines of cars with numerous body styles, Chandler and its lower-priced companion marque, Cleveland, were unable to find markets for their numerous models and seemed in effect to be competing against themselves. Drawing on numerous automotive histories

and two large private collections of memorabilia, this exhaustive study of the Chandler Motor Car Company covers the automobiles in detail, including all body styles, and their changes during production. The author chronicles the growth, expansion and later troubles of Chandler and Cleveland, providing fresh insight into the formative years of the auto industry and the personalities who made it go.
